RECORD OF TOWN MEETINGS AND ELECTIONS

During the Year 1942

TOWN WARRANT

The Commonwealth of Massachusetts

Norfolk, ss.

To any Constable of the Town of Brookline, Greeting:

In the name of the Commonwealth of Massachusetts, you are hereby required to notify and warn the Inhabitants of the Town of Brookline qualified to vote in elections to meet at the Town Hall in the said town on

TUESDAY, THE TWENTIETH DAY OF JANUARY, 1942

at seven-thirty o'clock in the evening for the following purposes, to wit:

First, To see if the town will raise and appropriate by borrowing or otherwise a sum of money to be expended with the approval of the Board of Selectmen for the preservation of health and the protection of persons and property in the town; for the purchase of equipment, materials, uniforms and supplies; to provide for the training of its citizens in matters essential to civilian defense and for any other purpose authorized by Chapter 487 of the Acts of 1941.

Hereof fail not, and make due return of this warrant, with your doings thereon, to the Selectmen seven days at least before the day of the said meeting.

Given under our hands at Brookline aforesaid, this fifth day of January in the year of our Lord one thousand nine hundred and forty-two.

WILLIAM J. HICKEY, JR.,
DANIEL TYLER, JR.,
RICHARD S. BOWERS,
EDWARD DANE,
DANIEL G. ROLLINS,
Board of Selectmen.

Commonwealth of Massachusetts

Brookline, Mass., January 10, 1942.

Norfolk, ss.

I, Andrew C. Bruce, being a Constable of the Town of Brookline, hereby certify that I have served the within warrant as directed by posting copies of the same in twenty (20) public places in the town of Brookline and by publishing a copy in the Brookline Chronicle, being a newspaper published in the town of Brookline, such posting and publication being at least seven (7) days before the date of the meeting called by such warrant.

ANDREW C. BRUCE,
Constable.

January 12, 1942.

I hereby certify that at least seven days before the time of said meeting, I notified the Town Meeting Members of said meeting by mailing a copy of said Warrant and a copy of the Report of the Selectmen on Articles in the Warrant to the last known address of said members.

ARTHUR J. SHINNERS,
Town Clerk.

Attest:

Pursuant to the Warrant of the Selectmen served according to law upon the inhabitants of the Town of Brookline by a Constable of said Town and written notices sent by mail by the Town Clerk at least seven days before the day of meeting to the Town Meeting members elected and qualified to act in Town Meetings in Brookline under the provision of Chapter 36, Special Acts of 1921, accepted by the Town of Brookline, March 1, 1921, the town-meeting members so qualified met at the Town Hall in said Town on Tuesday, the Twentieth day of January, 1942, at half past seven in the evening.

Lists of the duly qualified town-meeting members were used at the entrances to the space for said members and were in charge of Thomas R. Daley, Thomas H. Finan, John J. Fahey and Stewart Dalzell, Jr., as checkers, who were sworn to the faithful discharge of their duties. The lists contained the names of two hundred sixty-two (262) town-meeting members qualified to participate in and vote in town meetings in Brookline; two hundred forty (240) being the town-meeting members elected from the nine precincts and twenty-two (22) town-meeting members at large.

No town-meeting member was allowed within the guard rail until their name was checked on the list.

At thirty minutes after seven o'clock the checkers reported that one hundred thirty-four (134) names of town-meeting members had been checked, or more than one-half of all the town-meeting members qualified, and the Town Clerk reported that a quorum was present.

The meeting was then called to order by the Moderator, Erland F. Fish.

The following were appointed Tellers: John F. Taylor, John J. Brennan, Kenneth B. Bond, George H. Hooper, Bertram E. Adams and Lawrence Black.

First Article. — To see if the town will raise and appropriate by borrowing or otherwise a sum of money to be expended with the approval of the Board of Selectmen for the preservation of health and the protection of persons and property in the town; for the purchase of equipment, materials, uniforms and supplies; to provide for the training of its citizens in matters essential to civilian defense and for any other purpose authorized by Chapter 487 of the Acts of 1941.

On motion of William J. Hickey,

Voted, To appropriate the sum of fifty thousand dollars (\$50,000) to be expended with the approval of the Board of Selectmen for the preservation of health and the protection of persons and property in the town; for the purchase of equipment, materials, uniforms and supplies; to provide for the training of the citizens of the town in matters essential to civilian defense and for any other purpose authorized by

Chapter 487 of the Acts of 1941; said sum to be taken from any money in the treasury not otherwise appropriated and available for the purpose.

At 8:20 o'clock, on motion of Edward B. Richardson

Voted, That this meeting be now dissolved.

At the close of the meeting, the checkers at the entrances reported that the names of one hundred, forty-nine (149) town-meeting members had been checked on the list.

Attest:

ARTHUR J. SHINNERS,

Town Clerk.

WARRANT

The Commonwealth of Massachusetts

Norfolk, ss.

To any Constable of the Town of Brookline, Greeting:

In the name of the Commonwealth of Massachusetts, you are hereby required to notify and warn the inhabitants of the Town of Brookline qualified to vote in elections to meet at the polling places designated for the several precincts in the said town on

TUESDAY, THE TENTH DAY OF MARCH, 1942

at seven o'clock in the forenoon for the following purposes, to wit:—

To choose by ballot the following town officers: Moderator for one year, two Selectmen for three years, Treasurer for three years, one Assessor for three years, three members of the School Committee for three years, four Trustees of the Public Library for three years, one Trustee of the Public Library for one year to fill vacancy, two Trustees of the Walnut Hills Cemetery for three years, one Park Commissioner for three years, one member of the Water Board for three years, three members of the Committee on Planting Trees for one year, one member of the Planning Board for five years, five Constables for one year, also nine town-meeting members in each precinct for three years, also the following town-meeting members to fill vacancies: in Precinct two, one town-meeting member for one year, in Precinct three, one town-meeting member for one year, in Precinct four, one town-meeting member for one year, in Precinct five, one town-meeting member for one year, in Precinct nine, one town-meeting member for one year.

Also for the purpose of giving their votes “yes” or “no” on the following question:—

“Shall the town adopt the Standard Form of Representative Town Meeting Government, provided by Chapter 43A of the General Laws?”

Yes	
No	

For these purposes the polls will be open at seven o'clock in the forenoon and shall be closed at seven o'clock in the afternoon.

And in the name of the said Commonwealth you are further required to notify and warn the said inhabitants to meet at the Town Hall in the said Town on

TUESDAY, THE TWENTY-FOURTH DAY OF MARCH, 1942

at seven-thirty o'clock in the evening, for the following purposes, to wit:—

First Article, To see if the town will vote that the number of Measurers of Wood and Bark be two, to be appointed by the Selectmen.

Second Article, To see if the town will vote to authorize the Town Treasurer, with the approval of the Selectmen, to borrow money from time to time in anticipation of the revenue of the financial year beginning January 1, 1942, and to issue a note or notes therefor, payable within one year, and to renew any notes or note that may be given for a period of less than one year in accordance with Section 17 of Chapter 44 of the General Laws.

Third Article, To act upon the appropriations asked for or proposed in the annual town reports by the Selectmen or by any town officer or committee.

Fourth Article, To see if the town will raise and appropriate a sum of money to be expended with the approval of the Selectmen and of the various boards and officers concerned for the payment of extra emergency compensation to full time officers, other than elected officers, and permanent employees of the town on account of the increased cost of living, or will take any other action with respect to such compensation.

Fifth Article, To see if the town will increase the appropriation for the Police and Fire Departments to permit an increase of one dollar (\$1.00) per day in the compensation for the members of said departments.

Sixth Article, To see if the town will raise and appropriate the sum of thirty-six thousand four hundred fifty dollars (\$36,450) to be expended by the Fire Commissioner, subject to the approval of the Selectmen, for the purchase of two (2) twelve hundred fifty (1250) gallon pumping engines and eight thousand six hundred (8,600) feet of hose.

Seventh Article, To see if the town will appropriate the sum of twenty thousand dollars (\$20,000) to be expended by the Park Commissioners for the purchase of about one million one hundred nineteen thousand (1,119,000) square feet of land adjoining property of the town occupied by the Edith C. Baker School to be used for playground purposes, and will authorize the Treasurer to borrow the whole or any part thereof.

Eighth Article, To see if the town will appropriate the sum of forty-six thousand dollars (\$46,000) to be expended by the Park Commissioners for the purchase of about four hundred fifty-nine thousand five hundred sixty-one (459,561) square feet of land with the buildings thereon for playground purposes, the aforesaid property being situated on Eliot Street and Ackers and Chestnut Hill Avenues and being commonly known as the Rivers School property, and will authorize the Treasurer to borrow the whole or any part thereof.

Ninth Article, To see if the town will appropriate the sum of eleven thousand seven hundred dollars (\$11,700) to be expended by the Park Commissioners for the purchase of approximately forty-eight thousand nine hundred eighty two (48,982) square feet of land on Addington Road for playground purposes, and will authorize the Treasurer to borrow the whole or any part thereof.

Tenth Article, To see if the town will appropriate the sum of eight thousand one hundred fifty dollars (\$8,150) to be expended by the Park Commissioners for the purchase of approximately twenty-seven thousand seven hundred nineteen (27,719) square feet of land on the westerly side of Babcock Street, adjacent to other land owned by the town, said land to be used for highway, playground or other purposes for which the same may lawfully be used, and will authorize the Treasurer to borrow the whole or any part thereof.

Eleventh Article, To see if the town will raise and appropriate the sum of sixty-nine thousand one hundred twenty-two dollars (\$69,122) for a separate fund to be expended with the approval of the Selectmen, for the purchase or hire of materials, supplies and equipment and the employment of labor for the furtherance of, or for the contribution of the town to, any unemployment relief project in accordance with Chapter 46 of the Acts of 1939, and will authorize four thousand two hundred six dollars and sixty-six cents (\$4,206.66) of said sum to be expended for administration.

Twelfth Article, To see if the town will appropriate the sum of one thousand seven hundred seventy-nine dollars (\$1,799) to be expended by the Selectmen for the purpose of providing quarters for the Selective Service Boards established in the town under the Selective Service System.

Thirteenth Article, To see if the town will raise and appropriate by borrowing or otherwise a sum of money to be expended with the approval of the Board of Selectmen for the preservation of health and the protection of persons and property in the town; for the purpose of equipment, materials, uniforms and supplies; to provide for the training of its citizens in matters essential to civilian defense and for any other purpose authorized by Chapter 487 of the Acts of 1941.

Fourteenth Article, To see if the town will appropriate the sum of nine hundred dollars (\$900) for the leasing of nine voting machines, approved as required by law, for use during the period from April 1, 1942, to April 1, 1943, at polling places in such precinct or precincts of the town as the Board of Selectmen may determine, at primaries and elections of state or town officers, as authorized by Section 34 of Chapter 54 of the General Laws, as amended.

Fifteenth Article, To see if the town will accept Chapter 552 of the Acts of 1941 authorizing the appointment of a Recreation Commission in the town.

Sixteenth Article, To see if the town will amend Section 1 of Article XIV of the By-laws by striking out said section and substituting therefor the following:

RECREATION COMMISSION

"Section 1. The Recreation Commission to be appointed by the Board of Selectmen pursuant to Chapter 552 of the Acts of 1941 shall have the care and management of the Public Baths and Public Gymnasium in addition to such other powers and duties as are conferred and imposed upon it by law. It shall also perform the duties formerly carried on by the Playground Commission and shall have charge of public celebrations in the town. Said Commission shall establish such rules and rates for the regulation and use of the Public Baths and Gymnasium as it may deem best, and shall appoint such officers and assistants for the care and conduct of the same as may be necessary, and shall fix the terms of their compensation."

or will otherwise amend said section.

Seventeenth Article, To see if the town will accept Chapter 555 of the Acts of 1941 relative to the regulation and supervision of wires in the town.

Eighteenth Article, To see if the town will amend Sections 1 to 7, inclusive, of article XIII of the By-laws relating to the Department of Wires and Lights.

Nineteenth Article, To see if the town will vote to accept Chapter 710 of the acts of 1941 entitled "An Act Relative to the Registration and Operation of Certain Bicycles."

Twentieth Article, To see if the town will adopt a by-law authorizing the Superintendent of Streets, for the purpose of removing or plowing snow, or removing ice, from any way, to remove, or cause to be removed, to some convenient place, including a public garage, any vehicle interfering with such work, and imposing liability for the cost of such removal, and of the storage charges, if any, resulting therefrom, upon the owner of such vehicle as authorized by Chapter 346 of the Acts of 1941.

Twenty-First Article, To see if the town will vote to amend the By-laws of the town by inserting a new section prohibiting the sale and use of fireworks in the town except in certain specified cases.

Twenty-Second Article, To see if the town will vote to amend the Zoning By-laws by changing to a 3C District the lots and portions of the lots designated on the Assessors' Plan as follows:

Lots 40 to 52, 66 to 71, and part of Lots 60 to 65, all inclusive, in Block 225, now in a 2B District bounded and described as follows:

Southerly by the center line of Beaconsfield Road

Westerly by the present boundary line of a 3C District

Northerly by lands now or late of F. T. and T. C. Allen, T. J. Hill, A. J. Conlon, et al., trs., E. J. Casey, et al., trs., B. Disek, tr., and J. A. Gow

Northeasterly by the center line of Regent Circle

Southerly by the center line of a passageway separating the lands now or late of W. A. and M. H. Parks and T. J. Regan, et al., trs.

Easterly by land now or late of Thomas J. Regan, et al., trs.

As shown on Zoning Map No 6H, as prepared by Walter A. Devine, Town Engineer, dated November 28, 1941, amending Zoning Map No. 6, prepared by Henry A. Varney, Town Engineer, and verified by the signatures of the Planning Board.

or will amend and adopt said proposed amendment.

Twenty-Third Article, To see if the town will vote to amend the Zoning By-law by changing to a 3C District the lots and portions of the lots designated on the Assessors' Plans as follows:

Lots 1 to 16 inclusive, in Block 302, Lots 1 to 18 inclusive, in Block 303, Lots 3 to 22 inclusive, including Lot 6A in Block 316, Lots 1 to 21 inclusive, including Lot 13A in Block 316A, Lots 20 to 24 inclusive and 26 to 44 inclusive, including part of Lots 25, 1, and 45, in Block 317, now in a 2B District, and part of Lot 2-3 in Block 317 now in a 2B District bounded and described as follows:

Southwesterly by the center line of Chestnut Street

Westerly and Northwesterly by the present boundary line of a 4D District.

Northwesterly, Southwesterly, and Southeasterly by the present boundary line of a 3D District

Southwesterly by the present boundary line of a 4D District

Northwesterly by the present boundary line of a 3D and 3C District

Northeasterly and Easterly by the center lines of Cypress Street and Kendall Street

Northeasterly, Southeasterly and Northwesterly by the present boundary line of a 2B District

Northwesterly, Northeasterly and Easterly by the center lines of Franklin Street and Cypress Street

As shown on Zoning Map No. 6J, as prepared by Walter A. Devine, Town Engineer, dated November 28, 1941, amending Zoning Map No. 6, prepared by Henry A. Varney, Town Engineer, and verified by the signatures of the Planning Board.

or will amend and adopt said proposed amendment.

Twenty-Fourth Article, To accept and allow the relocation and widening of Washington Street at its northeasterly junction with Brookline Avenue as laid out by the Selectmen and reported to the town at this meeting, and to authorize the Selectmen to take land therefor and to make entry for the purpose of construction before all claims for damages are adjusted or determined.

Twenty-Fifth Article, To accept and allow the relocation and widening of the southerly side of Beacon Street from University Road to Winthrop Road as laid out by the Selectmen and reported to the town at

this meeting, and to authorize the Selectmen to take land therefor and to make entry for the purpose of construction before all claims for damages are adjusted or determined.

Twenty-Sixth Article, To accept and ratify the conveyance by The Country Club to the town by deed dated June 22, 1941, without cost to the town, of two small parcels of land adjoining the Municipal Golf Course for the purpose of straightening at certain points the boundary line between The Country Club and the Municipal Golf Course properties.

Twenty-Seventh Article, To see if the town will authorize the Board of Selectmen to petition the General Court for the amendment of Chapter 43A of the General Laws so that it will provide, in substance, that if a town meeting member is a candidate for re-election, the words "Candidate for Re-election," shall be printed against his name as it appears on the ballot for the election of town officers, and that if a town meeting member elected at the election at which said chapter was accepted, or in office at that time under the provisions of a special statute, becomes a candidate for town meeting membership at the next annual election after the adoption by a town of the standard form of representative town meeting government provided by said Chapter 43A of the General Laws, the words "Former Town Meeting Member" shall be printed against his name on the ballot.

Twenty-Eighth Article, To see if the town will authorize the Board of Selectmen to petition the General Court for the amendment of Section 8 of Chapter 43A of the General Laws for the purpose of extending from one to three years the term of office of a town moderator elected under said section.

Twenty-Ninth Article, To see if the town will authorize taking a sum of money voted for the appropriation heretofore made at this town meeting under this warrant, and not voted to be borrowed, from any available funds in the treasury and will authorize the Assessors to use free cash in the treasury in any available funds to that amount in the determination of the 1942 tax rate.

Thirtieth Article, To hear and act upon the Report of the Survey Report Committee appointed by the Moderator pursuant to vote of the Special Town Meeting held June 10, 1941.

Thirty-First Article, To hear and act upon reports of town officers and committees.

Thirty-Second Article, To appropriate and raise by borrowing or otherwise such sums of money as may be necessary for all or any of the purposes mentioned in the foregoing articles.

Hereof fail not, and make due return of this warrant, with your doings thereon, to the Selectmen seven days at least before the day of the said meeting.

Given under our hands at Brookline aforesaid, this second day of February in the year of our Lord one thousand nine hundred and forty-two.

WILLIAM J. HICKEY, JR.
DANIEL TYLER, JR.,
RICHARD S. BOWERS,
EDWARD DANE,
DANIEL G. ROLLINS,

Board of Selectmen.

Commonwealth of Massachusetts

Brookline, Mass., February 10, 1942.

Norfolk, ss.

I, Joseph A. Crowley, being a Constable of the Town of Brookline, hereby certify that I have served the within warrant as directed by posting copies of the same in twenty (20) public places in the Town of Brookline and by publishing a copy in the *Brookline Chronicle*, being a newspaper published in the town of Brookline, such posting and publication being at least seven (7) days before the date of the meeting called by such warrant.

JOSEPH A. CROWLEY,
Constable.

February 27, 1942.

I hereby certify that at least seven days before the time of said meeting, I notified the Town-Meeting Members of said meeting by mailing a copy of said Warrant and a copy of the Report of the Selectmen on Articles in the Warrant to the last known address of said members.

Attest:

ARTHUR J. SHINNERS,
Town Clerk.

In pursuance of the foregoing Warrant the inhabitants of the Town of Brookline, qualified to vote in elections met at the polling places designated for the several precincts in said Brookline, on Tuesday, the tenth day of March, 1942, at seven o'clock in the forenoon.

*Voting Machines used in Precincts 6 and 9, therefore no blanks show.

All ballots, properly sealed, total tally sheets and all other records, pertaining to the election have been preserved in the vault by the Town Clerk during the time required by law.

The voting machines used in Precinct 6 and in Precinct 9 were properly sealed and the records preserved during the legal period.

The persons declared elected town officers were notified as required by the General Laws and the persons elected town-meeting members were notified as required by Chapter 36, Acts of 1921.

Attest:

ARTHUR J. SHINNERS,
Town Clerk.

The result of the count of the votes cast at the town election was forwarded to the Secretary of the Commonwealth.

In accordance with Chapter 51, Section 61, the return of registered voters at the close of registration on February 25 was forwarded to the Secretary of the Commonwealth.

In accordance with Chapter 54, Section 132, as amended by the acts of 1921, the total number of voters checked on the voting lists in each precinct was forwarded to the Secretary of the Commonwealth.

In connection with the work of the Department of Corporations and Taxation, a list of the town officials was forwarded to Theodore N. Waddell, Director of Accounts.

RECOUNT

Brookline, Massachusetts, March 19, 1942.

In accordance with petitions, each signed by more than ten legal voters in each of the nine precincts, and in form prescribed by law for a recount of the votes at an election for Town Officers at the Annual Town Meeting, the Registrars of Voters held a recount to canvass the votes for Selectmen, with the following results:

ANNUAL MEETING, MARCH 24, 1942

Pursuant to the Warrant of the Selectmen served according to law upon the inhabitants of the Town of Brookline by a constable of said town and written notices sent by mail by the Town Clerk at least seven days before the day of meeting to the town-meeting members duly elected and qualified to act in town meetings in Brookline, under the provision of Chapter 36, Special Acts of 1921 as amended, accepted by the Town of Brookline, March 10, 1942, the town-meeting members so qualified met at the Town Hall in said town on Tuesday, the twenty-fourth day of March, 1942, at half past seven in the evening.

Lists of duly qualified town-meeting members were used at the entrances to the meeting place and were in charge of Thomas R. Daley, Thomas H. Finan, John J. Fahey and Stewart Dalzell, Jr., checkers, who were sworn to the faithful discharge of their duties. The lists contained the names of two hundred, sixty-two (262) town-meeting members qualified to participate in and vote in town meetings in Brookline; two hundred forty (240) being the town-meeting members elected from the nine precincts and twenty-two (22) town-meeting members at large.

No town-meeting member was allowed within the guard rail until their name was checked on the list.

At thirty-two minutes after seven o'clock the checkers reported that one hundred fifty-one (151) names of town-meeting members had been checked or more than one-half of all the town-meeting members qualified, and the Town Clerk reported that a quorum was present.

The meeting was then called to order by the Moderator, Charles F. Rowley.

The meeting was opened by prayer offered by the Rev. Daniel F. Burke, Pastor of the Church of the Infant Jesus.

The Moderator then requested the town-meeting members to rise in respect to those members and former members who had died since the last Annual Town Meeting and the Town Clerk read the following list:

DECEASED MEMBERS

Name	Died	Town-Meeting Member	
		From	To
Erland F. Fish	Feb. 18, 1942	Mar. 20, 1920 . . .	Mar. 1936
		Mar. 22, 1938 . . .	Feb. 18, 1942
Elias H. Sondheim	Sept. 11, 1941	Sept. 18, 1930 . . .	Sept. 11, 1941
Leo R. Armstrong	Feb. 16, 1942	Mar. 18, 1918 . . .	Feb. 16, 1942
Frank A. Merrill	July 23, 1941	Mar. 21, 1917 . . .	Mar. 20, 1934

Mr. William J. Hickey, Jr., Chairman of the Board of Selectmen, read the following Resolution and it was unanimously adopted.

March 24, 1942.

It is with extreme regret that We, the members of the Town Meeting, record the death of our former Moderator

ERLAND F. FISH

who died February 18, 1942.

General Fish was born in Cambridge, December 7, 1883. He entered Harvard College and graduated with the class of 1905 and from the Harvard Law School three years later. He served in the State Legislature, having been President of the Senate and later he became our Moderator.

An exacting and thorough public servant, he discharged the duties of his office in a manner so admirable as to reflect great credit upon himself and our municipality. No man in the community was more interested in the history and development of Brookline.

WHEREAS, a public official of fine character and unusual ability has passed from our midst, and we desire to bear true witness of our appreciation of his great service and of our sorrow caused by the death of General Fish; be it therefore

RESOLVED: That we, the members of the Town Meeting, express our deep regret at the loss of so valued an official in our municipal government, a public official who, through the period of his stewardship, conducted his important office with fidelity and rare ability.

RESOLVED: That these resolutions be entered on our records and that a copy thereof be sent to the family of General Fish, to whom in their affliction our sincerest sympathy is most respectfully tendered.

The following were appointed Tellers:

John H. Moran

Scott McNeilly

Herbert A. Horgan

Thomas P. Kendrick

Richard C. Floyd

Kenneth B. Bond

and were sworn by the Town Clerk.

First Article. — To see if the town will vote that the number of Measurers of Wood and Bark be two, to be appointed by the Selectmen.

On motion of William J. Hickey, Jr.:

Voted, That the number of Measurers of Wood and Bark be two, to be named by the Selectmen.

Second Article. — To see if the town will vote to authorize the Town Treasurer with the approval of the Selectmen to borrow money from time to time in anticipation of the revenue of the financial year beginning January 1, 1942, and to issue a note or notes therefor, payable within one year, and to renew any note or notes that may be given for a period of less than one year in accordance with Section 17, Chapter 44, General Laws.

On motion of William J. Hickey, Jr.:

Voted, That the Town Treasurer, with the approval of the Selectmen, be and hereby is authorized to borrow money from time to time in anticipation of the revenue of the financial year beginning January 1, 1942, and to issue a note or notes therefor, payable within one year, and to renew any note or notes that may be given for a period of less than one year in accordance with Section 17, Chapter 44, General Laws.

Third Article. — To act upon the appropriations asked for or proposed in the annual town report by the selectmen or by any town officer or committee.

On motion of Albert F. Bigelow:

Voted, That action on Article 3 in the Warrant for this annual town meeting be postponed until Tuesday, April 21, 1942, or until such other time as this meeting may be adjourned to, and that said article be referred back to the Advisory Committee for further study and that it be requested to report any changes in its previous recommendations with respect to said article at such adjourned annual town meeting.

The vote on this motion was taken by count: Yes—one hundred and eighteen (118)—No—ninety-one (91).

Fourth Article. — To see if the town will raise and appropriate a sum of money to be expended with the approval of the Selectmen and of the various boards and offices concerned for the payment of extra emergency compensation to full time officers, other than elected officers, and permanent employees of the town on account of the increased cost of living, or will take any other action with respect to such compensation.

On motion of Albert F. Bigelow:

Voted, That action on Article 4 in the Warrant for this annual town meeting be postponed until Tuesday, April 21, 1942, or until such other time as this meeting may be adjourned to, and that said article be referred back to the Advisory Committee for further study and that it be requested to report any changes in its previous recommendations with respect to said article at such adjourned annual town meeting.

The vote was taken by count: Yes—one hundred and fifteen (115)—No—eighty-seven (87).

Fifth Article. — To see if the town will increase the appropriations for the Police and Fire Departments to permit an increase of one dollar (\$1.00) per day in the compensation for the members of said departments.

On motion of Albert F. Bigelow:

Voted, That action on Article 5 in the Warrant for this annual town meeting be postponed until Tuesday, April 21, 1942, or until such other time as this meeting may be adjourned to, and that said article be referred back to the Advisory Committee for further study and that it be requested to report any changes in its previous recommendations with respect to said article at such adjourned annual town meeting.

Sixth Article. — To see if the town will raise and appropriate the sum of thirty-six thousand four hundred fifty dollars (\$36,450) to be expended by the Fire Commissioner, subject to the approval of the Selectmen, for the purchase of two (2) twelve hundred fifty (1250) gallon pumping engines and eight thousand six hundred (8,600) feet of hose.

On motion of William A. Bryant:

Voted, To raise and appropriate the sum of thirty-six thousand and four hundred fifty dollars (\$36,450) to be expended by the Fire Commissioner, subject to the approval of the Selectmen, for the purchase of two (2) twelve hundred fifty (1250) gallon pumping engines and eight thousand six hundred (8,600) feet of hose.

Seventh Article. — To see if the town will appropriate the sum of twenty thousand dollars (\$20,000) to be expended by the Park Commissioners for the purchase of about one million one hundred nineteen thousand (1,119,000) square feet of land adjoining property of the town occupied by the Edith C. Baker School to be used for playground purposes, and will authorize the Treasurer to borrow the whole or any part thereof.

Eighth Article.—To see if the town will appropriate the sum of forty-six thousand dollars (\$46,000) to be expended by the Park Commissioners for the purchase of about four hundred fifty-nine thousand five hundred sixty-one (459,561) square feet of land with the buildings thereon for playground purposes, the aforesaid property being situated on Eliot Street and Ackers and Chestnut Hill Avenues and being commonly known as the Rivers School property, and will authorize the Treasurer to borrow the whole or any part thereof.

Ninth Article. — To see if the town will appropriate the sum of eleven thousand seven hundred dollars (\$11,700) to be expended by the Park Commissioners for the purchase of approximately forty-eight thousand nine hundred eighty-two (48,982) square feet of land on Addington Road for playground purposes, and will authorize the Treasurer to borrow the whole or any part thereof.

Tenth Article. — To see if the town will appropriate the sum of eight thousand one hundred fifty dollars (\$8,150) to be expended by the Park Commissioners for the purchase of approximately twenty-seven thousand

seven hundred nineteen (27,719) square feet of land on the westerly side of Babcock Street, adjacent to other land owned by the town, said land to be used for highway, playground or other purposes for which the same may lawfully be used, and will authorize the Treasurer to borrow the whole or any part thereof.

Eleventh Article. — To see if the town will raise and appropriate the sum of sixty-nine thousand one hundred twenty-two dollars (\$69,122) for a separate fund to be expended with the approval of the Selectmen, for the purchase or hire of materials, supplies and equipment and the employment of labor for the furtherance of, or for the contribution of the town to, any unemployment relief project in accordance with Chapter 46 of the Acts of 1939, and will authorize four thousand two hundred six dollars and sixty-six cents (\$4,206.66) of said sum to be expended for administration.

Twelfth Article. — To see if the town will appropriate the sum of one thousand seven hundred seventy-nine dollars (\$1,779) to be expended by the Selectmen for the purpose of providing quarters for the Selective Service Boards established in the town under the Selective Service System.

Thirteenth Article. — To see if the town will raise and appropriate by borrowing or otherwise a sum of money to be expended with the approval of the Board of Selectmen for the preservation of health and the protection of persons and property in the town; for the purchase of equipment, materials, uniforms and supplies; to provide for the training of its citizens in matters essential to civilian defense and for any other purpose authorized by Chapter 487 of the Acts of 1941.

Twenty-ninth Article. — To see if the town will authorize taking a sum of money voted for the appropriations heretofore made at this town meeting under this warrant, and not voted to be borrowed, from any available funds in the treasury and will authorize the Assessors to use free cash in the treasury in any available funds to that amount in the determination of the 1942 tax rate.

On motion of Albert F. Bigelow:

Voted, That action on the above articles 7, 8, 9, 10, 11, 12, 13 and 29 in the Warrant for this annual town meeting be postponed until Tuesday, April 21, 1942, or until such other time as this meeting may be adjourned to, and that said articles be referred back to the Advisory Committee for further study and that it be requested to report any changes in its previous recommendations with respect to said articles at such adjourned annual town meeting.

Fourteenth Article. — To see if the town will appropriate the sum of nine hundred dollars (\$900) for the leasing of nine voting machines, approved as required by law, for use during the period from April 1, 1942, to April 1, 1943, at polling places in such precinct or precincts of the town as the Board of Selectmen may determine, at primaries and elections of state or town officers, as authorized by Section 34 of Chapter 54 of the General Laws, as amended.

On motion of William J. Hickey, Jr.:

Voted, To raise and appropriate the sum of nine hundred dollars (\$900) for the leasing of nine voting machines, approved as required by law, for use during the period from April 1, 1942, to April 1, 1943, at polling places in such precinct or

precincts of the town as the Board of Selectmen may determine, at primaries and elections of state or town officers, as authorized by Section 34 of Chapter 54 of the General Laws, as amended.

Fifteenth Article.— To see if the town will accept Chapter 552 of the Acts of 1941 authorizing the appointment of a Recreation Commission in the town.

On motion of William J. Hickey, Jr.:

Voted, To accept Chapter 552 of the Acts of 1941 authorizing the appointment of a Recreation Commission in the town.

Sixteenth Article.— To see if the town will amend Section 1 of Article XIV of the By-laws by striking out said section and substituting therefor the following:

Recreation Commission

"Section 1. The Recreation Commission to be appointed by the Board of Selectmen pursuant to Chapter 552 of the Acts of 1941 shall have the care and management of the Public Baths and Public Gymnasium in addition to such other powers and duties as are conferred and imposed upon it by law. It shall also perform the duties formerly carried on by the Playground Commission and shall have charge of public celebrations in the town. Said Commission shall establish such rules and rates for the regulation and use of the Public Baths and Gymnasium as it may deem best, and shall appoint such officers and assistants for the care and conduct of the same as may be necessary, and shall fix the terms of their compensation."

or will otherwise amend said section.

On motion of William J. Hickey, Jr.:

Voted, To amend Section 1 of Article XIV of the By-laws by striking out said section and substituting therefor the following:

Recreation Commission

Section 1. The Recreation Commission to be appointed by the Board of Selectmen pursuant to Chapter 552 of the Acts of 1941 shall have the care and management of the Public Baths and Public Gymnasium in addition to such other powers and duties as are conferred and imposed upon it by law. It shall also perform the duties formerly carried on by the Playground Commission and shall have charge of public celebrations in the town. Said Commission shall establish such rules and rates for the regulation and use of the Public Baths and Gymnasium as it may deem best, and shall appoint such officers and assistants for the care and conduct of the same as may be necessary, and shall fix the terms of their compensation.

Seventeenth Article.— To see if the town will accept Chapter 555 of the Acts of 1941 relative to the regulation and supervision of wires in the town.

On motion of William J. Hickey, Jr.:

Voted, To accept Chapter 555 of the Acts of 1941 relative to the regulation and supervision of wires in the town.

Eighteenth Article.—To see if the town will amend Sections 1 to 7, inclusive, of Article XIII of the By-laws relating to the Department of Wires and Lights.

On motion of William J. Hickey, Jr.:

Voted, To amend Sections 1 to 7, inclusive, of Article XIII of the By-laws by striking out said Sections and substituting therefore the following:

Section 1. The Board of Selectmen shall annually in April appoint an inspector or inspectors of wires who shall be chosen from or be under the general direction and supervision of such town officer or officers as said Board may determine. If more than one inspector of wires be appointed, the duties and responsibilities of such inspectors shall be divided among them as said Board may order.

Section 2. Such inspector or inspectors, subject only to any limitations imposed upon them by the Board of Selectmen, shall have supervision of all electric and other wires erected in, upon, over or under any street or building, of all poles supporting wires or lamps and street lights, and of all electric wire systems or other electric systems now or hereafter owned by the town, and shall require all persons and corporations owning or operating wires to conform to the conditions and requirements imposed by law.

Section 3. Any person or corporation operating electric or other wires within the town shall, upon request of any inspector of wires appointed as aforesaid, furnish him with such information as may be necessary to the faithful and effectual discharge of his duties under this By-law.

Section 4. Any inspector appointed as aforesaid shall have access at all reasonable times to all wires, appliances, and apparatus in the interior of a public building or on private premises, which are intended for carrying an electric light or power current, and no person shall arrange, affix, or change any such wires or apparatus without giving such inspector reasonable opportunity to inspect such wires and their arrangement and fixtures before the same are covered or enclosed; and no person shall place such wires in any building in process of construction until all gas, steam, sewer, water, and furnace pipes have been placed in proper position. No person shall connect such wires in the interior of buildings and on private premises with an outside circuit which crosses or runs along, over or under, any street or way of the town, without written permission having first been obtained from the inspector or inspectors having jurisdiction thereof.

Section 5. No person or corporation shall attach any wire or line for the transmission of electricity for any purpose, except the lines and wires of the Town of Brookline, to any post, except on his own premises or upon other lands with the consent of the owner thereof, nor insert the same into any underground conduit, except with the consent of the owner and by order of the Board of Selectmen.

Nineteenth Article.—To see if the town will vote to accept Chapter 710 of the Acts of 1941 entitled "An Act Relative to the Registration and Operation of Certain Bicycles."

On motion of William J. Hickey, Jr.:

Voted, To accept Chapter 710 of the Acts of 1941 entitled "An Act Relative to the Registration and Operation of Certain Bicycles."

Twentieth Article.— To see if the town will adopt a By-law authorizing the Superintendent of Streets, for the purpose of removing or plowing snow, or removing ice, from any way, to remove or cause to be removed, to some convenient place, including a public garage, any vehicle interfering with such work, and imposing liability for the cost of such removal, and of the storage charges, if any, resulting therefrom, upon the owner of such vehicle as authorized by Chapter 346 of the Acts of 1941.

On motion of William J. Hickey, Jr.:

Voted, To amend the By-laws of the Town by inserting in Article XVIII a new section to be known as Section 25 as follows:

Removal of Vehicles from Ways in the Town

Section 25. The Superintendent of Streets for the purpose of removing or plowing snow, or removing ice, from any way, may remove or cause to be removed to some convenient place, including a public garage, any vehicle interfering with such work. He shall keep or cause to be kept records of the registration number of each vehicle so removed and the place to which it is removed, and shall within forty-eight hours after the removal of any such vehicle send notice by mail to the owner of such vehicle, at his address as recorded at the Registry of Motor Vehicles, of the place to which such vehicle has been removed. If the owner of the vehicle be unknown or be not on record at the Registry of Motor Vehicles for this Commonwealth, the Superintendent of Streets shall on the business day following the day of removal publish, at least once in a newspaper published and having a general circulation in Brookline or Boston, notice of the removal, the registration number, if any, the type of vehicle and the place to which the same was removed.

Before the owner or his agent shall be permitted to remove a vehicle which has been removed as aforesaid to a public garage or other convenient place, he shall

(a) Furnish satisfactory evidence to the owner or person in charge of said public garage or to the Superintendent of Streets of his identity and ownership or right to the possession of said vehicle;

(b) Pay the reasonable cost, not exceeding five dollars, of removing said vehicle to the place of storage and all storage charges, if any, not exceeding fifty cents per day, together with the cost of publishing or sending any notices required hereunder.

Twenty-first Article.— To see if the town will vote to amend the By-laws of the town by inserting a new section prohibiting the sale and use of fireworks in the town except in certain specified cases.

On motion of William J. Hickey, Jr.:

Voted, To amend the By-laws of the town by inserting in Article XIX after Section 17 thereof a new section to be known as Section 17A as follows:

Sale and Use of Fireworks Prohibited

Section 17A. The sale or use of fireworks, fire crackers, blank cartridges, pistol caps or other similar noise making devices is hereby prohibited in the Town of Brookline, except that this prohibition shall

not apply to a public display of fireworks for which a permit in writing shall have been issued by the State Fire Marshal or by some officer of the town duly authorized by him and this prohibition further shall not apply to such of the above articles as may be used by railroads or in connection with athletic events, by the police, the firemen, or by the State or Federal military forces.

Whoever violates this section shall pay for each offense a fine not exceeding twenty dollars.

Twenty-second Article.— To see if the town will vote to amend the Zoning By-law by changing to a 3C District the lots and portions of the lots designated on the Assessors' Plan as follows:

Lots 40 to 52, 66 to 71, and part of Lots 60 to 65, all inclusive, in Block 225, now in a 2B District bounded and described as follows:

Southerly by the center line of Beaconsfield Road

Westerly by the present boundary line of a 3C District

Northerly by lands now or late of F. T. and T. C. Allen, T. J. Hill, A. J. Conlon, et al., trs., F. J. Casey, et al., trs., B. Dizek, tr., and J. A. Gow

Northeasterly by the center line of Regent Circle

Southerly by the center line of a passageway separating the lands now or late of W. A. and M. H. Parks and T. J. Regan, et al., trs.

Easterly by land now or late of Thomas J. Regan, et al., trs.

As shown on Zoning Map No. 6H, as prepared by Walter A. Devine, Town Engineer, dated November 28, 1941, amending Zoning Map No. 6, prepared by Henry A. Varney, Town Engineer, and verified by the signatures of the Planning Board,

or will amend and adopt said proposed amendment.

On motion of William J. Hickey, Jr.:

Voted, To amend the Zoning By-laws by changing to a 3C District the lots and portions of the lots designated on the Assessors' Plan as follows:

Lots 40 to 52, 66 to 71, and part of Lots 60 to 65, all inclusive, in Block 225, now in a 2B District bounded and described as follows:

Southerly by the center line of Beaconsfield Road

Westerly by the present boundary line of a 3C District

Northerly by lands now or late of F. T. and T. C. Allen, T. J. Hill, A. J. Conlon, et al., trs., E. J. Casey, et al., trs., B. Dizek, tr., and J. A. Gow

Northeasterly by the center line of Regent Circle

Southerly by the center line of a passageway separating the lands now or late of W. A. and M. H. Parks and T. J. Regan et al., trs.

Easterly by land now or late of Thomas J. Regan, et al., trs.

As shown on Zoning Map No. 6H, as prepared by Walter A. Devine, Town Engineer, dated November 28, 1941, amending Zoning Map No. 6, prepared by Henry A. Varney, Town Engineer, and verified by the signatures of the Planning Board.

The foregoing vote was passed unanimously, and was so declared by the Moderator, and is so recorded.

Twenty-third Article.— To see if the town will vote to amend the Zoning By-law by changing to a 3C District the lots and portions of the lots designated on the Assessors' Plans as follows:

Lots 1 to 16 inclusive, in Block 302, Lots 1 to 18 inclusive, in Block 303, Lots 3 to 22 inclusive, including Lot 6A in Block 316, Lots 1 to 21 inclusive,

including Lot 13A in Block 316A, Lots 20 to 24 inclusive and 26 to 44 inclusive, including part of Lots 25, 1 and 45, in Block 317, now in a 2B District bounded and described as follows:

Southwesterly by the center line of Chestnut Street

Westerly and Northwesterly by the present boundary line of a 4D District

Northwesterly, Southwesterly, and Southeasterly by the present boundary line of a 3D District

Southwesterly by the present line of a 4D District

Northwesterly by the present boundary line of a 3D and 3C District

Northeasterly and Easterly by the center lines of Cypress Street and Kendall Street

Northeasterly, Southeasterly and Northwesterly by the present boundary line of a 2B District

Northwesterly, Northeasterly and Easterly by the center lines of Franklin Street and Cypress Street

As shown on Zoning Map No. 6J, as prepared by Walter A. Devine, Town Engineer, dated November 28, 1941, amending Zoning Map No. 6, prepared by Henry A. Varney, Town Engineer, and verified by the signatures of the Planning Board.

or will amend and adopt said proposed amendment.

On motion of William J. Hickey, Jr.:

Voted, To amend the Zoning By-law by changing to a 3C District the lots and portions of the lots designated on the Assessors' Plans as follows:

Lots 1 to 16 inclusive, in Block 302, Lots 1 to 18 inclusive, in Block 303, Lots 3 to 22 inclusive, including Lot 6A in Block 316, Lots 1 to 21 inclusive, including Lot 13A in Block 316A, Lots 20 to 24 inclusive and 26 to 44 inclusive, including part of Lots 25, 1 and 45, in Block 317, now in a 2B District, and part of Lot 2-3 in Block 317 now in a 2B District bounded and described as follows:

Southwesterly by the center line of Chestnut Street

Westerly and Northwesterly by the present boundary line of a 4D District

Northwesterly, Southwesterly, and Southeasterly by the present boundary line of a 3D District

Southwesterly by the present boundary line of a 4D District

Northwesterly by the present boundary line of a 3D and 3C District

Northeasterly and Easterly by the center lines of Cypress Street and Kendall Street

Northeasterly, Southeasterly and Northwesterly by the present boundary line of a 2B District

Northwesterly, Northeasterly and Easterly by the center lines of Franklin Street and Cypress Street

As shown on Zoning Map No. 6J, as prepared by Walter A. Devine, Town Engineer, dated November 28, 1941, amending Zoning Map No. 6, prepared by Henry A. Varney, Town Engineer, and verified by the signatures of the Planning Board.

The foregoing vote was passed unanimously, and was so declared by the Moderator, and is so recorded.

Twenty-fourth Article. — To accept and allow the relocation and widening of Washington Street at its northeasterly junction with Brookline Avenue as laid out by the Selectmen and reported to the town at this meeting, and to authorize the Selectmen to take land therefor and to make entry for the purpose of construction before all claims for damages are adjusted or determined.

On motion of William J. Hickey, Jr.:

Voted, To accept and allow the relocation and widening of Washington Street at its northeasterly junction with Brookline Avenue as laid out by the Selectmen and reported to the town at this meeting, and to authorize the Selectmen to take land therefor and to make entry for the purpose of construction before all claims for damages are adjusted or determined.

Laying Out, Alteration, Relocation and Widening of Northeasterly Corner of Washington Street and Brookline Avenue

We, the undersigned, Selectmen of Brookline, gave written notice of our intention to lay out, alter, relocate, and widen Washington Street at its northeasterly junction with Brookline Avenue, such notice requiring all persons interested to appear before us at our room in the Town Hall, on Monday, January 12, 1942, at 4.25 o'clock p.m., and caused such notice to be actually served according to law by a constable of this town at least seven days before the day so appointed for the hearing, upon

Gulf Oil Corporation

being all the parties known to us from whom land may be taken, or who may be interested in the subject-matter, and gave notice to them and all other persons and corporations, if any, who may be interested in the subject-matter, whose names are not known to us, by posting up true and attested copies of such notice in three public places in the town seven days at least before the day appointed for the hearing.

Pursuant to such notice, we met at the time and place appointed for the hearing, and heard the remarks and objections of all persons, if any, who desired to be heard, and having viewed and examined the route of the street as hereinafter described, we do adjudge that common convenience and necessity require that said street should be laid out, altered, relocated, and widened, and it is hereby so laid out, altered, relocated, and widened.

Description of the Northeasterly Corner of Washington Street and Brookline Avenue

Beginning at a point on the northerly side line of Washington Street as widened May 29, 1894, said point being situated 72.51 feet easterly from the intersection of the said northerly side line of Washington Street with the southeasterly side line of Brookline Avenue as accepted by the Town November 19, 1868.

Thence running westerly by a straight line for a distance of 5.50 feet to an intersection.

Thence continuing westerly by a straight line for a distance of 25.24 feet.

The last described lines being the said northerly side lines of Washington Street.

Thence running northwesterly and northerly by a curve to the right having a radius of 20.00 feet for a distance of 44.97 feet.

Thence running northeasterly by a straight line for a distance of 34.07 feet.

The last described line being the said southeasterly side line of Brookline Avenue.

Thence running southwesterly by a straight line for a distance of 35.00 feet.

As shown on Zoning Map No. 6J, as prepared by Walter A. Devine, Town Engineer, dated November 28, 1941, amending Zoning Map No. 6, prepared by Henry A. Varney, Town Engineer, and verified by the signatures of the Planning Board.

Twenty-fifth Article. — To accept and allow the relocation and widening of the southerly side of Beacon Street from University Road to Winthrop Road as laid out by the Selectmen and reported to the town at this meeting, and to authorize the Selectmen to take land therefor and to make entry for the purpose of construction before all claims for damages are adjusted or determined.

On motion of Edward Dane:

Voted, To accept and allow the relocation and widening of the southerly side of Beacon Street from University Road to Winthrop Road as laid out by the Selectmen and reported to the town at this meeting, and to authorize the Selectmen to take land therefor and to make entry for the purpose of construction before all claims for damages are adjusted or determined.

Laying Out, Alteration, Relocation and Widening of Southerly Side of Beacon Street From University Road to Winthrop Road

We, the undersigned, Selectmen of Brookline, gave written notice of our intention to lay out, alter, relocate, and widen the Southerly side of Beacon Street, from University Road to Winthrop Road, such notice requiring all persons interested to appear before us at our room in the Town Hall, on Monday, January 12, 1942, at 4.15 o'clock p. m., and caused such notice to be actually served according to law by a constable of this town at least seven days before the day so appointed for the hearing, upon

Brewster Realty Company
Philip J. Marget, et al., trs.
Downtown Investment Association

being all the parties known to us from whom land may be taken, or who may be interested in the subject-matter, and gave notice to them and all other persons and corporations, if any, who may be interested in the subject-matter, whose names are not known to us, by posting up true and attested copies of such notice in three public places in the town seven days at least before the day appointed for the hearing,

Pursuant to such notice, we met at the time and place appointed for the hearing, and heard the remarks and objections of all persons, if any, who desired to be heard, and having viewed and examined the route of the street as hereinafter described, we do adjudge that common convenience and necessity require that said street should be laid out, altered, relocated, and widened, and it is hereby so laid out, altered, relocated, and widened.

Description of Alteration, Relocation and Widening of the Southerly Side of Beacon Street, from University Road to Winthrop Road

Beginning at a point on the southerly side line of Beacon Street as widened by the town, March 29, 1887, said point being situated on the

westerly end of the curve marking the southwesterly junction of Beacon Street with University Road.

Thence running easterly and southeasterly by a curve to the right having a radius of 40.00 feet for a distance of 47.07 feet.

Thence running northwesterly and westerly by a curve to the left having a radius of 35.13 feet for a distance of 41.34 feet.

Thence running westerly by a straight line for a distance of 267.31 feet.

Thence running southwesterly by a curve to the left having a radius of 19.00 feet for a distance of 19.90 feet to a point on the easterly side line of Winthrop Road, as accepted by the town September 18, 1890.

Thence running northeasterly by a curve to the right having a radius of 25.00 feet for a distance of 26.18 feet to a point on the said southerly side line of Beacon Street.

Thence running easterly by a straight line for a distance of 257.61 feet to the point of beginning.

The last described line being the southerly side line of Beacon Street as accepted by the town, March 29, 1887, and parallel with and 3.00 feet distant northerly from the line previously described as having a length of 267.31 feet.

For a further identification of this description and location reference is hereby made to a plan and profile made by Walter A. Devine, Town Engineer, dated, January 2, 1942, approved by us, verified by our signatures, and adopted as a part of this record. Said street is to be constructed in accordance with said plan and profile.

The foregoing description has been compared with the plan and is correct.

WALTER A. DEVINE,
Town Engineer.

January 12, 1942.

Said street so laid out, altered, relocated and widened is hereby reported to the town for acceptance, southerly side of Beacon Street, from University Road to Winthrop Road.

The said plan, profile, and this record are this day filed by us in the office of the Town Clerk.

WILLIAM J. HICKEY, JR.,
DANIEL TYLER, JR.,
RICHARD S. BOWERS,
DANIEL G. ROLLINS,

Selectmen of Brookline.

Brookline, January 12, 1942.

Received and filed with plan and profile as stated.

ARTHUR J. SHINNERS,
Town Clerk.

Brookline, Mass., January 12, 1942.

Twenty-sixth Article.—To accept and ratify the conveyance by The Country Club to the town by deed dated June 22, 1941, without cost to the town, of two small parcels of land adjoining the Municipal Golf Course for the purpose of straightening at certain points the boundary line between The Country Club and the Municipal Golf Course properties.

On motion of William J. Hickey, Jr.:

Voted, To accept and ratify the conveyance by The Country Club to the town by deed dated June 22, 1941, without cost

to the town, of two small parcels of land adjoining the Municipal Golf Course for the purpose of straightening at certain points the boundary line between The Country Club and the Municipal Golf Course properties.

Twenty-seventh Article.— To see if the town will authorize the Board of Selectmen to petition the General Court for the amendment of Chapter 43A of the General Laws so that it will provide, in substance, that if a town meeting member is a candidate for re-election, the words "Candidate for Re-election," shall be printed against his name as it appears on the ballot for the election of town officers, and that if a town meeting member elected at the election at which said Chapter was accepted, or in office at that time under the provisions of a special statute, becomes a candidate for town meeting membership at the next annual election after the adoption by a town of the standard form of representative town meeting government provided by said Chapter 43A of the General Laws, the words "Former Town Meeting Member" shall be printed against his name on the ballot.

On motion of Daniel G. Rollins:

Voted, To authorize the Board of Selectmen to petition the General Court for the amendment of Chapter 43A of the General Laws so that it will provide, in substance, that if a town meeting member is a candidate for re-election, the words "Candidate for Re-election," shall be printed against his name as it appears on the ballot for the election of town officers, and that if a town meeting member elected at the election at which said Chapter was accepted, or in office at that time under the provisions of a special statute, becomes a candidate for town meeting membership at the next annual election after the adoption by a town of the standard form of representative town meeting government provided by said Chapter 43A of the General Laws, the words "Former Town Meeting Member" shall be printed against his name on the ballot.

Twenty-eighth Article.— To see if the town will authorize the Board of Selectmen to petition the General Court for the amendment of Section 8 of Chapter 43A of the General Laws for the purpose of extending from one to three years the term of office of a town moderator elected under said section.

No action was taken under the twenty-eighth article.

Thirtieth Article.— To hear and act upon the Report of the Survey Report Committee appointed by the Moderator pursuant to vote of the Special Town Meeting held June 10, 1941.

On motion of William J. Hickey, Jr.:

Voted, To accept and place on file the interim report of the Survey Report Committee and to authorize said Committee to make its report at the next Town Meeting.

Thirty-first Article.— To hear and act upon reports of town officers and committees.

Thirty-second Article.— To appropriate and raise by borrowing or otherwise such sums of money as may be necessary for all or any of the purposes mentioned in the foregoing articles.

On motion of William J. Hickey, Jr.:

Voted, To adjourn this meeting until April 21, at half past seven o'clock.

At the close of this meeting the checkers at the entrances reported that the names of Two Hundred Fourteen (214) town meeting members had been checked as present at the meeting.

Adjourned.

Attest:

ARTHUR J. SHINNERS,
Town Clerk.

ADJOURNED ANNUAL TOWN MEETING APRIL 21, 1942

Pursuant to the Adjournment in accordance with the vote passed at the Annual Town Meeting, March 24, 1942, the duly elected members met at the Town Hall, on Tuesday, the twenty-first day of April at half past seven o'clock in the evening.

Lists of duly qualified Town-Meeting Members were used at the entrances to the meeting place and were in charge of Thomas R. Daley, Thomas H. Finan, John J. Fahey and Stewart Dalzell, Jr., Checkers, who were sworn to the faithful discharge of their duties. The lists contained the names of Two Hundred Sixty-three (263) Town-Meeting Members qualified to participate in and vote in town meetings in Brookline; Two Hundred Forty-One (241) being the Town-Meeting Members elected from the nine precincts and Twenty-two (22) Town-Meeting Members at large.

No Town-Meeting Member was allowed within the guard rail until their name was checked on the list.

At forty minutes after seven o'clock the checkers reported that one hundred thirty-seven (137) names of Town-Meeting Members had been checked or more than one-half of all the Town-Meeting Members qualified, and the Town Clerk reported that a quorum was present.

The meeting was then called to order by the Moderator, Charles F. Rowley.

Annual Appropriation Vote

Third Article. — To act upon the appropriations asked for or proposed in the annual town report by the Selectmen or by any town officer or committee.

Voted, The following sums are hereby appropriated for the current annual expenses, for the purposes and subject to the limitations specified; a total of \$4,960,289.00.

| 58. Metropolitan Park Taxes or such sum as may be assessed..... | 46,542 00 |
| 59. Metropolitan Water Taxes or such sum as may be assessed..... | 194,702 00 |
| 60. Boston Elevated Taxes or such sum as may be assessed | 57,531 00 |
| 61. Previous Year State Underestimate or such sum as may be assessed. | 725 00 |
| | <hr/> |
| To be paid from the Treasury upon the orders of the Selectmen..... | \$826,615 00 |

The rate of salaries fixed in this vote is fixed for the twelve months from and after April 1, 1942.

All money received by departments under any of the items in the above vote shall be paid into the Town Treasury and is not appropriated for the use of the departments receiving the same.

Whenever work is done or materials furnished by one department for another department, the cost of which is charged in the first instance to the appropriation of the former department, credit shall forthwith be given to the former department upon the books of the Accountant, upon the approval of the latter department, and the officers authorized to draw orders against the appropriations therefor.

Voted, That such sums are hereby appropriated as may be required for so much of the principal of the town debt as matures during the current fiscal year, including that which matures January 1, 1943, and for a year's installments on loans authorized but not issued at the beginning of the year, and on loans which may be authorized during the year.

Fourth Article. — To see if the town will raise and appropriate a sum of money to be expended with the approval of the Selectmen and of the various boards and offices concerned for the payment of extra emergency compensation to full time officers, other than elected officers, and permanent employees of the town on account of the increased cost of living, or will take any other action with respect to such compensation.

On Motion of William J. Hickey, Jr.

Voted, To raise and appropriate the sum of \$184,926.00 to be expended with the approval of the Selectmen and of the various boards and heads of departments concerned, for the payment during the 12 months from and after April 1, 1942, or until otherwise voted by the town, of extra emergency compensation to full time officers and permanent employees of the town receiving wages or salaries at the rate of less than \$3,000 a year, said compensation to be paid monthly during the first 15 days of each month and in each case to be the amount obtained by multiplying the base salary or wage of each such officer or employee for the preceding month by the difference in percentage between the combined cost of living index issued by the Division on the Necessaries of Life of the Dept. of Labor & Industries of the Commonwealth of Massachusetts for such preceding month and the average combined cost of living index issued by said Division for the years 1935-1939, inclusive, using the integer or, if a fraction, the next higher integer of percentage, as the case may be. Said compensation shall not exceed 10% of such base salary or wage of any such officer or employee up to but not exceeding \$208.33 per month, i. e. at the rate of \$2,500 a year nor shall the total of such base salary or wage plus said compensation in any case exceed the rate of \$3,000 a year. Said compensation shall be discontinued when said monthly cost of living index declines to within 1% of the 1935-1939 base.

Fifth Article. — To see if the town will increase the appropriations for the Police and Fire Departments to permit an increase of one dollar (\$1.00) per day in the compensation for the members of said departments.

On being put to a vote, the motion was lost.

Seventh Article. — To see if the town will appropriate the sum of twenty thousand dollars (\$20,000) to be expended by the Park Commissioners for the purchase of about one million one hundred nineteen thousand (1,119,000) square feet of land adjoining property of the town occupied by the Edith C. Baker School to be used for playground purposes, and will authorize the Treasurer to borrow the whole or any part thereof.

No action was taken under this Article.

Eighth Article. — To see if the town will appropriate the sum of forty-six thousand dollars (\$46,000) to be expended by the Park Commissioners for the purchase of about four hundred fifty-nine thousand five hundred sixty-one (459,561) square feet of land with the buildings thereon for playground purposes, the aforesaid property being situated on Eliot Street and

Ackers and Chestnut Hill Avenues and being commonly known as the Rivers School property, and will authorize the Treasurer to borrow the whole or any part thereof.

On being put to a vote, the motion was lost.

Ninth Article. — To see if the town will appropriate the sum of eleven thousand seven hundred dollars (\$11,700) to be expended by the Park Commissioners for the purchase of approximately forty-eight thousand nine hundred eighty-two (48,982) square feet of land on Addington Road for playground purposes, and will authorize the Treasurer to borrow the whole or any part thereof.

Action on appropriating this money was lost.

Tenth Article. — To see if the town will appropriate the sum of eight thousand one hundred fifty dollars (\$8,150) to be expended by the Park Commissioners for the purchase of approximately twenty-seven thousand seven hundred nineteen (27,719) square feet of land on the westerly side of Babcock Street, adjacent to other land owned by the town, said land to be used for highway, playground or other purposes for which the same may lawfully be used, and will authorize the Treasurer to borrow the whole or any part thereof.

No action was taken under this Article.

Eleventh Article. — To see if the town will raise and appropriate the sum of sixty-nine thousand one hundred twenty-two dollars (\$69,122) for a separate fund to be expended with the approval of the Selectmen, for the purchase or hire of materials, supplies and equipment and the employment of labor for the furtherance of, or for the contribution of the town, to any unemployment relief project in accordance with Chapter 46 of the Acts of 1939, and will authorize four thousand two hundred six dollars and sixty-six cents (\$4,206.66) of said sum to be expended for administration.

On motion of William J. Hickey, Jr.

Voted, To appropriate the sum of sixty-nine thousand one hundred twenty-two dollars (\$69,122) for a separate fund to be expended with the approval of the Selectmen, for the purchase or hire of materials, supplies and equipment and the employment of labor for the furtherance of, or for the contribution of the Town to, any unemployment relief project in accordance with Chapter 46 of the Acts of 1939, and to authorize four thousand two hundred six dollars and sixty-six cents (\$4,206.66) of said sum to be expended for administration; said sum of sixty-nine thousand one hundred twenty-two dollars (\$69,122) to be taken from the unexpended balance of the special appropriation made under the Fourteenth Article of the Warrant for the Annual Town Meeting of 1941 for similar purposes.

This vote was passed unanimously, was so declared by the Moderator and is so recorded.

Twelfth Article. — To see if the town will appropriate the sum of one thousand seven hundred seventy-nine (\$1,779) to be expended by the Selectmen for the purpose of providing quarters for the Selective Service Boards established in the town under the Selective Service System.

On motion of William J. Hickey, Jr.

Voted, To raise and appropriate the sum of one thousand seven hundred seventy-nine dollars (\$1,779) to be expended by the Selectmen for the purpose of providing quarters for the Selective Service Boards established in the town under the Selective Service System.

Thirteenth Article. — To see if the town will raise and appropriate by borrowing or otherwise a sum of money to be expended with the approval of the Board of Selectmen for the preservation of health and the protection of persons and property in the town; for the purchase of equipment, materials, uniforms and supplies; to provide for the training of its citizens in matters essential to civilian defense and for any other purpose authorized by Chapter 487 of the Acts of 1941.

On motion of William J. Hickey, Jr.

Voted, To raise and appropriate the sum of fourteen thousand six hundred fourteen dollars (\$14,614) to be expended with the approval of the Board of Selectmen for the preservation of health and the protection of persons and property in the town; for the purchase of equipment, materials, uniforms and supplies; to provide for the training of its citizens in matters essential to civilian defense and for any other purpose authorized by Chapter 487 of the Acts of 1941.

Twenty-ninth Article. — To see if the town will authorize taking a sum of money voted for the appropriations heretofore made at this town meeting under this warrant, and not voted to be borrowed, from any available funds in the treasury and will authorize the Assessors to use free cash in the treasury in any available funds to that amount in the determination of the 1942 tax rate.

No action was taken under the above Article.

Thirty-first Article. — To hear and act upon reports of town officers and committees.

Thirty-second Article. — To appropriate and raise by borrowing or otherwise such sums of money as may be necessary for all or any of the purposes mentioned in the foregoing articles.

No action was taken under the Thirty-first and Thirty-second Articles.

At twenty-five minutes after eleven o'clock, on motion of William J. Hickey, Jr.

Voted that this meeting be dissolved.

At the close of the meeting the checkers at the entrances reported that the names of Two Hundred and six (206) Town-Meeting Members had been checked as present.

Dissolved:

The ballots cast in the several precincts were returned to the Town Clerk in sealed packages. The voting lists used at the entrances to the polling places and at the ballot boxes with tally sheets and copy of the precinct record of the primary, were also returned, all properly sealed in conformity with the laws governing elections..

Voting machines were used in Precincts 6, 10, 11 and 12. They were sealed in accordance with the election laws and the records preserved.

Attest:

ARTHUR J. SHINNERS,
Town Clerk.

Brookline, Mass., September 16, 1942.

The votes cast were canvassed and certificates setting forth the results mailed to the Secretary of the Commonwealth, using therefor the blank forms issued for the purpose.

Attest:

ARTHUR J. SHINNERS,
Town Clerk.

STATE AND COUNTY ELECTION

WARRANT

The Commonwealth of Massachusetts

Norfolk, ss.

To either of the Constables of the Town of Brookline, Greeting:

In the name of the Commonwealth you are hereby required to notify and warn the inhabitants of said town who are qualified to vote in elections, to meet at the polling places designated for the several precincts, in the said town, on Tuesday, the third day of November, 1942 it being the first Tuesday after the first Monday in the said month, at seven o'clock in the forenoon, to give in their votes for the following State and County officers, to wit:

Governor for this Commonwealth.

Lieutenant Governor for this Commonwealth.

Secretary of the Commonwealth for this Commonwealth.

Treasurer and Receiver-General for this Commonwealth.

Auditor of the Commonwealth for this Commonwealth.

Attorney General for this Commonwealth.

Senator in Congress for this Commonwealth.

Representative in Congress for 10th Congressional District.

Councillor for 2nd Councillor District.

Senator for Norfolk & Suffolk Senatorial District.

Three Representatives in General Court for 10th Representative District.

District Attorney for Southeastern District.

Register of Probate and Insolvency for Norfolk County.

County Commissioner for Norfolk County.

County Treasurer for Norfolk County.

Clerk of Courts (to fill vacancy) for Norfolk County.

Also for the purpose of giving in their votes "Yes" or "No" on the following questions:

QUESTION NO 1.

Law Proposed by Initiative Petition.

Shall the proposed measure which provides that the present statutes which make it a crime punishable by fine or imprisonment knowingly to advertise, print, publish, distribute or circulate any matter containing reference to any person from whom or place where any drug, instrument or means whatever, or any advice or information may be obtained, for the purpose of preventing pregnancy, or to sell, lend, give away, exhibit, offer or advertise any drug, medicine, instrument or other article for the prevention of conception, or to write or print information of any kind stating when, where, how, of whom, or by what means such article can be obtained, or to manufacture or make such article, shall not apply to treatment or prescription given to married persons for protection of life or health by or under the direction of registered physicians nor to teaching in chartered medical schools nor to publication or sale of medical treatises or journals, which was disapproved in the House of Representatives by a vote of 77 in the affirmative and 133 in the negative and in the Senate by a vote of 16 in the affirmative and 18 in the negative, be approved?

YES	
NO	

To obtain a full expression of opinion, voters should vote on all three of the following questions:

(a) If a voter desires to permit the sale in this town of any and all alcoholic beverages to be drunk on and off the premises where sold, he will vote "Yes" on all three questions.

(b) If he desires to permit the sale herein of wines and malt beverages only to be drunk on and off the premises where sold, he will vote "No" on question one, "Yes" on question two and "No" on question three.

(c) If he desires to permit the sale herein of all alcoholic beverages, but only in packages, so called, not to be drunk on the premises where sold, he will vote "No" on questions one and two and "Yes" on question three.

(d) If he desires to permit the sale herein of wines and malt beverages to be drunk on and off the premises where sold and in addition other alcoholic beverages but only in packages, so called, not to be drunk on the premises where sold, he will vote "No" on question one and "Yes" on questions two and three.

(e) If he desires to prohibit the sale herein of any and all alcoholic beverages whether to be drunk on or off the premises where sold, he will vote "No" on all three questions.

1. Shall licenses be granted in this town for the sale therein of all alcoholic beverages (whisky, rum, gin, malt beverages, wines and all other alcoholic beverages)?

YES	
NO	

2. Shall licenses be granted in this town for the sale therein of wines and malt beverages (wines and beer, ale and all other malt beverages)?

YES	
NO	

3. Shall licenses be granted in this town for the sale therein of all alcoholic beverages in packages, so called, not to be drunk on the premises?

YES	
NO	

1. Shall the pari-mutuel system of betting on licensed horse races be permitted in this county?

YES	
NO	

2. Shall the pari-mutuel system of betting on licensed dog races be permitted in this county?

YES	
NO	

QUESTION OF PUBLIC POLICY

"Shall the Representatives in the General Court from this district be instructed to vote to request the President and Congress to call at the earliest possible moment a convention of Representatives of all free peoples, to frame a Federal Constitution under which they may unite in a Democratic World Government?"

YES	
NO	

All to be voted for upon one ballot.

For these purposes the polls will be opened at seven o'clock in the forenoon and will be closed at eight o'clock in the evening.

Hereof fail not, and make due return of this warrant, with your doings thereon, to the Selectmen, seven days at least before the day of said meeting.

Given under our hands this nineteenth day of October A. D. 1942.

WILLIAM J. HICKEY, JR.,
DANIEL TYLER, JR.,
EDWARD DANE,
DANIEL G. ROLLINS,
EUGENE P. CARVER, JR.,
Board of Selectmen of Brookline.

A true copy. Attest:

ROBERT M. BOEHNER, *Constable.*

Commonwealth of Massachusetts

Brookline, Mass., October 24, 1942.

Norfolk, ss.

I, Robert M. Boehner, being a Constable of the Town of Brookline, hereby certify that I have served the within warrant as directed by posting copies of the same in twenty (20) public places in the Town of Brookline and by publishing a copy in the *Brookline Chronicle* being a newspaper published in the Town of Brookline, such posting and publication being at least seven (7) days before the date of the meeting called by such warrant.

ROBERT M. BOEHNER,
Constable.

In pursuance of the foregoing warrant the inhabitants of the town of Brookline qualified to vote in elections met at the polling places designated for the several precincts in said Brookline on Tuesday, the third day of November, 1942, at seven o'clock a.m. and were closed at eight o'clock p.m.

The polling places had been designated as follows:

Precinct 1, Temple Center; Precinct 2, St. Aidan's School Hall; Precinct 3, Harvard Church; Precinct 4, Elk's Home; Precinct 5, Sewell School; Precinct 6, Pierce Primary School; Precinct 7, Gardner Manor; Precinct 8, Devotion School; Precinct 9, Driscoll School; Precinct 10, Runkle School; Precinct 11, Heath School; Precinct 12, Fire Station No. 6, Hammond Street.

The following served as election officers in their respective precincts by appointment of the Selectmen or by the Warden of the precinct by authority of his position as presiding election officer:

Precinct Four

Thomas B. McCaffery, Warden
 Eugene E. Allen, Clerk
 Genevieve Reid, Inspector
 Frederick S. Bowers, Inspector
 James A. Huban, Inspector
 Agnes Sullivan, Inspector
 Genevieve A. FitzGerald, Inspector
 Joseph D. Mahoney, Inspector
 Mary F. Doolan, Inspector
 Catherine A. Coakley, Inspector
 Mary A. Curry, Inspector
 Henry McCullough, Inspector
 Geraldine Mackey, Inspector
 Walter W. Smith, Inspector
 Robert H. M. Clark, Inspector
 Evelyn M. DeBow, Inspector
 William C. Dunnells, Inspector
 Catherine Burns, Inspector

Precinct Five

James M. Driscoll, Warden
 Harriet E. Woods, Clerk
 Mary H. Scully, Inspector
 Annie P. McCarthy, Inspector
 E. Evelyn Lisherness, Inspector
 Alice Sherburne Reidy, Inspector
 Elizabeth D. Wallace, Inspector
 Matilda Tonra, Inspector
 Leona B. MacLeod, Inspector
 Mary A. Graham, Inspector
 Henrietta W. Richardson, Inspector
 Florence Dawson, Inspector
 James F. Hughes, Inspector
 Margaret F. Kelly, Inspector
 Donald MacMillan, Inspector
 Helen McKendry, Inspector
 John A. Curry, Inspector
 Catherine Nixon, Inspector

Precinct Six

Margaret T. Cahill, Warden
 Alfred H. Cornell, Clerk
 John H. Day, Jr., Inspector
 John L. Gamble, Inspector
 Mary Keegen, Inspector
 Louise P. Jaques, Inspector
 Stewart Dalzell, Jr., Inspector
 Sara C. White, Inspector
 Margaret L. Higgs, Inspector
 Ruth Gilman, Inspector

Precinct Seven

Edwin L. Riley, Warden
 Mary B. Lehnehan, Clerk
 Francis A. Niccolls, Inspector
 George P. McGinnis, Inspector
 Thomas J. Connelly, Inspector
 Elizabeth Walsh, Inspector
 William T. Livingston, Inspector
 Fred H. Smyth, Inspector
 Sarah F. Slattery, Inspector
 Christine M. Ayars, Inspector
 May C. Lima, Inspector
 Lillian R. Cronin, Inspector
 Myrtle Niccolls, Inspector
 Mabel C. R. Hayward, Inspector
 Rena B. Butler, Inspector
 Harvey Breger, Inspector
 Gladys J. Fogarty, Inspector
 Albert C. Aldrich, Inspector

Precinct Eight

Harry E. Adams, Warden
 Grace L. Flynn, Clerk
 Dexter B. Wiswell, Inspector
 Emma C. Collins, Inspector

Pauline M. Jaffe, Inspector
 Martha J. Steeves, Inspector
 Raymond A. Potter, Inspector
 Florence M. Greene, Inspector
 Lillian G. McGruder, Inspector
 William L. Aldrich, Inspector
 Jessica S. Lavine, Inspector
 Katherine J. McGarry, Inspector
 Alice L. Wort, Inspector
 Sadie Giddon, Inspector
 Florence B. Brackett, Inspector
 John J. Geary, Inspector
 Martin Colten, Inspector

Precinct Nine

George V. Nauman, Warden
 Alice M. Nixon, Clerk
 Arthur E. Haid, Inspector
 Gertrude K. Goulston, Inspector
 Kathryn F. McLaren, Inspector
 Isabella M. Conley, Inspector
 Bertha G. Andrews, Inspector
 Joaquina Rigor da Eva, Inspector
 Jane F. Dillworth, Inspector
 Doris McNeilly, Inspector
 Mary A. Barnicle, Inspector
 Harry I. May, Inspector
 Irene E. Bayne, Inspector
 Mabel E. Gray, Inspector
 Olive Kellett, Inspector
 Christine J. McCarthy, Inspector
 Bertha E. Barnes, Inspector
 Edward H. Duffy, Inspector

Precinct Ten

Lyla M. Barry, Warden
 John A. Andrew, Jr., Clerk
 Woodbury H. Rand, Inspector
 Bertram M. Linsky, Inspector
 Donald Connolly, Inspector
 Priscilla White, Inspector

Margaret G. White, Inspector
 Helen Rofes, Inspector
 Irma R. Tufts, Inspector
 Mary R. Donovan, Inspector
 Mary G. Pepper, Inspector
 Irene W. Eno, Inspector
 Mary T. Palmer, Inspector
 Florence Willis, Inspector

Precinct Eleven

Thomas H. Finan, Warden
 Fannie B. Ames, Clerk
 Eileen Mullane, Inspector
 Anna King, Inspector
 Pauline O'Rourke, Inspector
 Margaret T. Raftery, Inspector
 Alvin T. Sherman, Inspector
 Paul R. McGoldrick, Inspector
 Roger Manning, Inspector
 Thomas F. Messitt, Inspector
 Frederick J. Love, Inspector
 Marion O'Brien, Inspector
 Catherine M. Collins, Inspector
 William F. Ferguson, Inspector

Precinct Twelve

Ernest L. Fuller, Warden
 Mary J. Sullivan, Clerk
 Joseph A. Craven, Inspector
 Mary E. Howard, Inspector
 Herbert S. Potter, Inspector
 Hubert Rathgebar, Inspector
 Robert W. Taylor, Inspector
 Hughena Jamieson, Inspector
 May S. McLennon, Inspector
 Emma W. Ryan, Inspector
 Margaret L. Hickey, Inspector
 Margaret G. Ward, Inspector
 Mary F. Brennan, Inspector
 Gertrude E. Raftery, Inspector

The election officers were duly sworn.

The Town Clerk, upon receipt of the returns from the twelve precincts, forthwith canvassed the same and announced the result as follows:

COMMITTEE ON PUBLIC FINANCE AND PLANNING — Messrs.
Hickey and Tyler.

Committee on Streets

DISTRICT No. 1, NORTHEAST — Mr. Rollins

DISTRICT No. 2, NORTH — Mr. Tyler

DISTRICT No. 3, SOUTHEAST — Mr. Carver

DISTRICT No. 4, NORTHWEST — Mr. Dane

DISTRICT No. 5, SOUTH — Mr. Hickey

*Appointed December 1, 1942.

ERNEST B. DANE

REPORT

The Selectmen submit the following report for the year ending December 31, 1942.

At the first meeting held following the town election William J. Hickey, Jr., was chosen Chairman of the Board. By virtue of his office as Chairman of the Board of Selectmen, he became also Chairman of the Board of Health and Chairman of the Board of Public Welfare.

Under date of November 18, 1942, the Selectmen received the final report of the Committee on salaries and Classifications. It is believed that the adoption of this classification plan, with its minimum and maximum salary ranges, will do a great deal toward the stabilization of the salary problem with a consequent beneficial reaction on employee morale.

It is with profound regret that the Board records herein the death of Mr. Ernest B. Dane who passed away on April 5, 1942. In the passing of Mr. Dane, the Town has lost an outstanding citizen who devoted freely and unstintingly of his time in civic and community affairs. He had served as a member of the Tree Planting Committee for nearly thirty-four years and as a member of the Board of Selectmen for approximately twelve years. His guiding influence in Brookline affairs did much to establish the high standard of service for which Brookline has been recognized throughout the country.

The Board likewise records with sincere regret the untimely death of General Erland F. Fish on February 18, 1942. An eminent soldier, he served his country well. His keen sense of civic duty brought him to the halls of the State Legislature where he finally served as President of the Senate. General Fish was always vitally interested in town affairs and gave generously of his time on various committees and finally as Moderator of the Town Meeting.

Under date of October 22, 1942, the Selectmen appointed a Committee which has come to be known as the Committee to Investigate Health and Safety Conditions in and about Buildings. This Committee is comprised of the Chief of the Fire Department, the Town Engineer, the Building Commissioner, the Chief of Police and the Tenement House Inspector, and has devoted a great deal of time to the study of the health and safety measures in lodging houses, nurseries, convalescent homes and restaurants to insure compliance

with all local and state regulations. It is interesting to note that this committee was appointed several weeks before the Coconut Grove disaster.

By vote of the town meeting, the Department of Wires and Lights as such was abolished and under the provisions of Chapter 555 of the Acts of 1941 the duties formerly under the jurisdiction of this department were assigned to the Building, Fire and Highway Departments.

Holding true to tradition, the youth of Brookline responded nobly to the Country's call and a Roll of Honor of all Brookline residents serving in the Army, Navy, Marine Corps and Women's Auxiliaries was erected on the Library grounds. This Roll of Honor was dedicated with appropriate ceremonies on November 11, 1942.

Valuation and Tax Rate

Valuation — Town of Brookline — From 1932 Through 1942

	Personal	Real Estate	Total
1932	\$15,463,000 00	\$156,429,700 00	\$171,892,700 00
1933	14,426,500 00	151,493,100 00	165,919,600 00
1934	14,139,500 00	148,892,500 00	163,032,000 00
1935	13,749,500 00	146,976,600 00	160,726,100 00
1936	13,983,100 00	146,234,500 00	160,217,600 00
1937	14,012,900 00	147,156,800 00	161,169,700 00
1938	14,091,200 00	147,480,000 00	161,571,200 00
1939	13,413,700 00	145,564,800 00	158,978,500 00
1940	12,866,100 00	140,406,300 00	153,272,400 00
1941	12,559,000 00	136,254,400 00	148,813,400 00
1942	12,327,700 00	132,068,100 00	144,395,100 00

The valuation of land in the Town decreased from \$47,872,700 in 1941 to \$46,066,700 in 1942, the reduction being \$1,806,000. The valuation of buildings decreased from \$88,381,700 in 1941 to \$86,001,400 in 1942, the reduction being \$2,380,300. The total reduction in real estate valuation was \$4,186,300. The valuation of tangible personal property dropped from \$12,559,000 in 1941 to \$12,327,000 in 1942, a reduction of \$232,000. The total valuation of all property, real and personal, in 1941 was \$148,813,400 as compared with \$144,395,100 in 1942, a decrease of \$4,418,300.

The number of taxable polls increased from 16,395 in 1941 to 16,708 in 1942, an increase of 313. The tax rate was fixed at \$23.90 in 1942 as compared with \$22.50 in 1941. The net amount to be raised by taxation was \$288,353.18 less in 1942 than in 1941.

MAJ. GEN. ERLAND F. FISH

Finances

Debt borrowed under Municipal Indebtedness act	\$619,000 00

State Taxes

The State Tax since 1933 has been as follows:

1933	\$9,000,000 00
1934	10,000,000 00
1935	10,000,000 00
1936	10,000,000 00
1937	12,250,000 00
1938	17,000,000 00
1939	18,000,000 00
1940	16,000,000 00
1941	16,500,000 00
1942	15,000,000 00

Under the Basis for computing the State Tax established by the Legislature in 1941 the Town pays \$21,970 of every million dollars to be raised. Brookline paid \$637,463.40 on account of State and miscellaneous taxes in 1942, for which \$690,514.86 was raised in the levy for 1942, which with the credit of \$14,883.10 carried forward from 1941, made a total of \$705,397.96, leaving a credit of \$67,934.56 to be applied against the 1943 State Tax. Of this amount of \$67,934.56, the sum of \$54,158.58 must be used towards the 1942 deficit of the Boston Elevated which was raised but has not yet been assessed.

Metropolitan Taxes

A comparison of the various taxes paid to the State and its Metropolitan Departments follows:

	1941	1942
State Tax	\$362,505 00	\$329,550 00
Metropolitan Sewer Taxes	60,324 50	58,021 12
Metropolitan Park Tax	33,977 27	33,295 42
Metropolitan Planning Tax	316 94
Metropolitan Smoke Tax	1,690 05	1,638 05
Metropolitan Water Tax	†205,860 15	*194,702 19
Charles River Basin Tax	13,085 26	13,246 03
Boston Metropolitan District Tax	351 96	351 96
West Roxbury Brookline Parkway	1 04
Canterbury Street Highway	1 43
Boston Elevated Deficit Tax
Boston Elevated Rental Deficit Tax	4,479 85
Veterans' Exemption	878 70
Hospital or Home Care for Civil War Veterans	294 00	210 00
Corporation Tax — Public Service '39	1,968 78
	<hr/>	<hr/>
	\$679,286 30	\$637,463 40

*A credit of \$151,345.80 was given the town on this item by the Metropolitan Water Board.

†A credit of \$162,556.91 was given the town on this item by the Metropolitan Water Board.

Condition of Current Special Appropriations

The appropriations closed January 1, 1943, together with expenditures therefrom during the year, and the balances carried to the general unexpended balance accounts are shown in the above table under the heading "closed."

Appropriations Carried Forward, 1943

Reference is made to the above table to show the condition of the special appropriations carried forward at the request of the departments having them in charge.

Summary

The total amount appropriated in 1942 for general expenses including state, county and metropolitan taxes and payment of funded debt and interest was \$4,960,289.00 of which \$4,261,589.22 was spent. Of the total amount of \$755,152.39 carried on the books for special appropriations, the sum of \$294,934.12 was spent making a total of \$4,556,523.34.

Expenditures 1927-1942

1927	\$4,320,543	39
1928	4,352,689	17
1929	5,221,623	66

Annual Appropriations for 1943

The amount recommended for general expenses and the amounts proposed for new special appropriations are shown in the following tables. The amounts asked for general expenses of the public schools, public library, water supply, public parks and grounds, comprising headings F. G. J., and the first item of H. in Table II following, have been recommended by the different boards having those matters in charge and have not received the independent judgment of the Selectmen. Reference is made to the reports of those boards for information as to these appropriations. All other amounts included in the table of regular appropriations are recommended by the Selectmen. The total amount proposed for general expenses, omitting the amounts for state, county and metropolitan taxes, but including payments of funded debt and interest is \$4,037,882.51. The total of the proposed special appropriations included in the Warrant for the annual town meeting is \$268,509.43 of which \$202,509.43 is to be included in the tax levy.

The first figure compared with the figure of \$4,247,393.00 proposed in 1942 for these same purposes is a decrease of \$209,510.49 and the total for proposed special appropriations is a decrease of \$151,812.57 over the total of \$420,322.00 in 1942.

Proposed New Special Appropriations for 1943

Payment of extra emergency compensation	\$209,926 00
For Selective Service Quarters	2,122 00
For War Price and Rationing Board	3,140 00
For Civilian Defense	20,421 43
For rental of voting machines	900 00
For purchasing department	2,500 00
For war damage insurance	
For Town Hall egress	2,000 00
For moving Welfare Department	5,000 00
For Town Hall and Police Station alterations	6,000 00
For underground steam piping	10,000 00
For construction Chatham Circle	6,500 00
For War Bonds	
	<hr/> \$268,509 43

Taxpayers v. Same.
Nancy Whitman v. Oscar B. Lee.
L. Harold Williams v. Patrick A. Colleran.

Suits Settled and Terminated

City of Boston v. Brookline. Three actions, brought in the Suffolk Superior Court by Boston against Brookline to recover money expended by Boston for aid to persons alleged to have legal settlements in Brookline, were compromised by the payment by Brookline to Boston of \$17,289.97.

Brookline v. Boston. This action of contract, brought in the Norfolk Superior Court to recover money expended by Brookline for aid to persons alleged to have legal settlements in Boston, was settled by the payment by Boston to Brookline of \$1,779.78.

Jean Carmody, ppa. v. Brookline

Edward Carmody v. Brookline. These tort actions were brought in the Norfolk Superior Court to recover for injuries alleged to have been sustained by Jean Carmody, a minor, as the result of a fall from a swing on the Brookline Avenue Playground. The cases were settled by the payment of \$100.

Mary Carmody v. Brookline. This action of tort was brought in the Brookline Municipal Court to recover for damages alleged to have been sustained by plaintiff as the result of a fall on the sidewalk in front of No. 32-34 Flora Street. Defendant's motion to dismiss for want of prosecution was allowed, thus terminating the action.

John Carpenito v. John J. Kenney. This action of tort was brought in the First District Court of Eastern Middlesex to recover for damages resulting from a collision on Harvard Street with a snow plow operated by the defendant, an employee of the Highway Department. The case was settled by the payment of \$50 to the plaintiff.

Sterling Dains v. Brookline. This action of tort was brought in the Municipal Court of Brookline to recover for damages sustained as the result of an alleged fall on Prospect Street. The case was settled by the payment of \$125 to the plaintiff.

Elizabeth Edenberg v. Brookline. This action was brought in the Brookline Municipal Court to recover for injuries alleged to have been sustained by a fall on the sidewalk in front of 599 Heath Street. The case was settled by the payment of \$150 to the plaintiff.

Irene Gowdy v. Brookline. This action of tort was brought in the Boston Municipal Court to recover for injuries alleged to have been received from a fall on Beacon Street. The case was settled by the payment of \$125 to the plaintiff.

Timothy J. Hickey v. Richard S. McKenney. This action of tort was brought in the Norfolk Superior Court to recover for alleged injuries sustained by the plaintiff when he was struck by a Highway Department truck driven by the defendant. The case was settled by the payment of \$300 to the plaintiff.

Madelyn D. Hoban v. Brookline. This action of tort was brought in the Brookline Municipal Court to recover for injuries alleged to have been sustained from a fall on the sidewalk near 240 Aspinwall Avenue. The case was settled by the payment of \$150 to the plaintiff.

Rose Jacobson v. Brookline. This action of tort was brought in the Brookline Municipal Court to recover for personal injuries due to an alleged fall on Harvard Street. The case was settled by the payment of \$75 to the plaintiff.

Samuel S. Katz v. Brookline. This action of tort was brought in the Suffolk Superior Court to recover for injuries alleged to have been received as the result of a fall at the corner of Tappan Street and Garrison Road. The case was settled by the payment of \$125 to the plaintiff.

Anna L. Lane v. Brookline. This action of tort was brought in the Brookline Municipal Court to recover for personal injury and property damage alleged to have been sustained as the result of a defect in the sidewalk near 616 Hammond Street. A discontinuance was filed which ended the action.

Newton v. Brookline. This action of contract was brought in the Middlesex Superior Court to recover for welfare aid given to persons with an alleged settlement in Brookline. Judgment for Neither Party was entered by order of the Court.

Constance C. O'Connor, ppa. v. Brookline

William M. O'Connor v. Brookline. Two suits were brought in the Norfolk Superior Court for injuries alleged to have been sustained by Miss O'Connor as the result of a fall on the sidewalk on Manchester Road. These cases were dismissed under the Rule of Court.

William O'Leary, ppa. v. Brookline. This action of tort was brought in the Brookline Municipal Court to recover for damages alleged to have been sustained by a fall into an open manhole on Stedman Street. Defendant's motion to dismiss the suit on the ground of improper service was allowed, thus terminating the action.

Bertha J. Powers v. Brookline. This action of tort was brought in the Brookline Municipal Court to recover for damages alleged to have been suffered from a fall on the sidewalk in front of 228 Pleasant Street. The case was tried and the Court found for the defendant.

Helen R. Robbins v. Brookline. This action was brought in the Brookline Small Claims Court to recover for an alleged overassessment of personal property. After trial the Court found for the defendant.

Ruth Rosenbloom, ppa. v. Brookline. This action of tort was brought in the Brookline Municipal Court to recover for personal injuries alleged to have been sustained by a fall on the sidewalk in front of 93 St. Paul Street. The case was terminated by the filing of a Neither Party Agreement, without any payment to the plaintiff.

Ruth Rotenberg v. Brookline. This action of tort was brought in the Suffolk Superior Court to recover for damages alleged to have been sustained from a fall on the sidewalk in front of 302a-304 Harvard Street. This case was settled by the payment of \$25 to the plaintiff.

Margaret T. Ruscoe v. Brookline. This action of tort was brought in the Norfolk Superior Court to recover for injuries caused by a fall on the sidewalk on Commonwealth Avenue. The action was terminated by a Neither Party Agreement, without any payment to the plaintiff.

Emma Seegraber v. Brookline. This action of tort was brought in the Brookline Municipal Court to recover for injuries alleged to have been sustained on Beacon Street at or near Kent Street. Defendant's motion to dismiss on the ground of improper service was allowed, thus terminating the action.

Elias H. Sondheim v. Brookline. This action of tort was brought in the Brookline Municipal Court to recover for damages caused by an alleged obstruction in the drain between the main drain and the building at 106 Thorndike Street. Defendant's motion to dismiss the action for want of prosecution was allowed, thus terminating the action.

Sophie Walter v. Brookline. This action of tort was brought in the Brookline Municipal Court to recover for injuries alleged to have been sustained from a fall on the sidewalk in front of 64 Babcock Street. Defendant's motion to dismiss for want of prosecution was allowed, thus terminating the action.

Nancy Whitman v. Brookline. This action of tort was brought in the Brookline Municipal Court to recover for damages alleged to have been sustained as the result of a collision between a truck of the Wire Department and a car operated by the plaintiff. Defendant's motion to dismiss for want of prosecution was allowed, thus terminating the action.

New Suits Pending

City of Boston v. Brookline. Action of contract in the Suffolk Superior Court to recover for welfare aid given persons with alleged settlements in the Town of Brookline; ad damnum \$20,000.

Brookline v. Boston. Action of contract in the Norfolk Superior Court to recover for welfare aid given persons whose legal settlements were in Boston; ad damnum \$25,000.

Colonial Beacon Oil Company v. Brookline and Herbert L. Fleischer. Petition brought in the Superior Court for Norfolk County for the assessment of damages in connection with the taking of an easement for the widening of Washington Street.

Annie Diamond v. Brookline. Action of tort in the Brookline Municipal Court to recover for personal injuries alleged to have been sustained as the result of a fall near 9 Washington Street; ad damnum \$5,000.

Margaret Grace Ford v. Brookline. Action of tort in Norfolk Superior Court to recover for personal injuries alleged to have been received as the result of a fall on Washington Street near No. 175; ad damnum \$1,000.

Helen Gellar v. Brookline. Action of tort in the Norfolk Superior Court to recover for personal injuries alleged to have been received from a fall near 19 Hamilton Road; ad damnum \$4,000.

Andrew Harron and Susan S. Harron v. Albert P. Briggs and Brookline. Bill in equity brought in the Land Court to restrain the defendants from selling real estate of the plaintiffs for non-payment of taxes and to make them change their records so that the plaintiffs will receive credit for a tax payment alleged to have been made for their account, thus removing a cloud or encumbrance upon the title.

Anna L. Lane v. Brookline. Action of tort in the Brookline Municipal Court to recover for personal injury and property damage alleged to have been sustained by fall on sidewalk near 616 Hammond Street; ad damnum \$4,000. (Previous action by same plaintiff discontinued.)

Ethel McMurray v. Brookline. Action of tort in the Suffolk Superior Court to recover for personal injuries alleged to have been received as the result of a fall on St. Paul Street near the Dexter School; ad damnum \$4,000.

Josephine Whittaker v. Brookline. Action of tort in the Norfolk Superior Court to recover for personal injuries alleged to have been sustained as the result of a fall in front of the Washington Street Branch of Brookline Trust Company; ad damnum \$1,500.

Tax Appeals

More than eighty tax appeal cases were tried, settled or otherwise disposed of during 1942.

REPORT OF THE TOWN CLERK'S OFFICE FOR 1942

To the Citizens of Brookline:

I submit herewith my report for the year ending December 31, 1942.

The largest number of marriage intentions in the history of the town were filed this year. There were nine hundred fifty (950) intentions as compared to 885 in 1941 which had been the peak year.

The number of births recorded in this office indicate a marked increase. There were 1,134 births registered as compared to 644 in the preceding year.

During the past year the town adopted the Standard Form of Town Meeting Act. Following the adoption of this act, it was necessary to make a division of the town into twelve precincts as voted by the Selectmen. (This of course required considerable extra work being placed upon the clerks in the office.)

The Town Clerk served as chairman of the Honor Roll Committee for World War No. 2, also serving on this committee were Judge Francis S. Wyner, Judge John T. Comerford, and Walter D. Allen as Secretary. This Honor Roll was erected on the grounds of the Public Library with appropriate dedicatory exercises on November 11th. A file of 3,826 names has been established in the office of the Town Clerk, and the list is constantly growing.

The W. P. A. project of Vital Statistics which was begun in May, 1942, has proven very necessary and a worthwhile adjunct to the office.

Statistics of the Town Clerk for the Year 1942 are as Follows:

Marriage Intentions	\$1,830 00
Mortgages recorded, mortgages discharged, mortgage releases, assignments for Benefit of Creditors, Foreclosure notices, Assignment of Wages and Conditional Bill of Sales	1,345 30
Business Certificates	56 50
Married Woman's Certificates	3 25
Dog Licenses collected	5,828 00
Conservation Licenses	1,811 50
Voters' Certificates	50 25
Gasoline Renewals of Permits	30 00
Sales of Street Lists and By-laws	113 55
Miscellaneous, Certificates of Births, Marriages, Deaths and Physicians' Certificates	1,048 57
	<hr/>
	\$12,116 92

Dog Licenses Issued in 1942

1,511 Male Licenses at \$2.00	\$3,022 00
335 Female Licenses at \$5.00	1,675 00
553 Spayed Licenses at \$2.00	1,106 00
1 Kennel License at \$25.00	25 00
	<hr/>
	\$5,828 00

Sporting Licenses Issued in 1942

404 Resident Citizens' Fishing Licenses at \$2.00	\$808 00
190 Resident Citizens' Hunting Licenses at \$2.00	380 00
147 Resident Citizens' Sporting Licenses at \$3.25	477 75
93 Resident Citizens' Women's and Minor Fishing Licenses at \$1.25	116 25
7 Resident Citizens' Duplicate Licenses at \$.50	3 50
2 Resident Citizens' Trapping Licenses at \$5.25	10 50
1 Non-resident citizen Fishing license at \$5.25	5 25
1 Non-resident citizen Hunting license at \$10.25	10 25
	<hr/>
	\$1,811 50

Money for these licenses is paid to the State Department of Conservation by the Treasurer.

Respectfully submitted,

ARTHUR J. SHINNERS,
Town Clerk.

Defense Work

The Federal Bureau of Investigation requested the co-operation of this Department in the investigation of aliens and other individuals suspected of subversive activities.

All aliens residing in the Town registered under the National Alien Act were checked to ascertain if they were living at the same place designated when they registered.

Investigations of persons suspected of subversive activities must be conducted confidentially and entails considerable work.

Persons who have failed to report under the Selective Service Act were also investigated. Complete report on all these cases were forwarded to the FBI.

A large number of persons, who formerly lived in Brookline and are now employed in defense plants throughout the country, have been investigated at the request of the proprietors of these plants.

Auxiliary Police

Three hundred and six men in the Town have been instructed and trained in police work. We have lost fifty through enlistment and change of employment to defense work. These men are being used in black-outs and take their turn on duty nights at the Report Center. In an emergency we feel certain these men will be dependable and render excellent assistance to the regular members of the department.

Open Air Revolver Range

The range located on land in Dedham owned by the Town and under the jurisdiction of the Water Department has been used by members of the department with beneficial results.

Under the supervision of Sergeant George T. Hughes and Patrolman Clinton A. Heitman the members of the Department have been instructed in the use of the Department's Thompson Machine Gun and riot guns.

The New England Police Revolver League sponsored a competitive match and the Brookline Police Team finished in second place. The following members of the team received medals.

Francis P. Lowrey

Edmund J. Makarewich

James F. Holt

John C. Prendergast

Francis F. Fleming

Personnel

In the past year there has been a number of changes in personnel. In 1938 there were 113 patrolmen working on a day off in seven schedule. In 1940 it was voted, at the Town meeting, to grant the members of the department a day off in six. No additional men were appointed to fill the places of the increased number of men on days off.

At the present time, due to deaths, retirements and enlistments, there are 92 regular patrolmen and five temporary men appointed for the duration.

Patrolman Thomas J. Craig	Retired — passed away February 3
Patrolman George W. Piper	Retired — passed away March 8
Patrolman Patrick Ryan	Passed away May 10
Patrolman William C. Barrett	Retired — passed away June 19
Patrolman James J. Powers	Retired — passed away Oct. 29
Patrolman Francis A. Russell	Leave of absence Jan. 12 for six months
Patrolman James P. Meade	Retired — effective January 15
Patrolman Edmund J. Makarewich	United States Army
Patrolman Cornelius J. Crowley	United States Army
Patrolman James J. Carroll	United States Army
Patrolman Alfred J. Falkland	United States Navy
Patrolman Joseph P. Cavanaugh	United States Navy
Patrolman James M. Moreland	United States Navy
Patrolman Arthur P. Murphy	United States Navy
Patrolman John McDonough	United States Navy
Patrolman Francis F. Fleming	United States Navy
Patrolman John F. Magee, Jr.	United States Navy
Patrolman James F. Holt	United States Navy
Patrolman James F. Travers	United States Navy
Temp. Ptl. George B. Murray	United States Navy
Temp. Ptl. John J. Riley	United States Army
Temp. Ptl. John J. Moriarty	United States Navy

Radio

Our new system of frequency modulation radio communications has been in service since September 25. We are pleased with the excellent results. All police cars are equipped with two-way service and also the cars of the Chief and Deputy Chief of the Fire Department, Superintendent and Assistant Superintendent of the Water Department, and Superintendent of the Highway Department.

A great deal of difficulty was experienced in the installation due to the delay in obtaining priorities for the necessary equipment. Auxiliary power supply units are being installed in the six fire stations and it is expected that these units will be in service in a short time. Radio sets for fire stations and water department service stations have been received but not installed because a few of the necessary parts have not been received.

Ambulance

There are many calls for transportation service for persons in sickness and accident cases. The following is a summary of services rendered by this department:

	Ambulance	Radio Cars	Safety Cars
Private	209	212	42
Welfare cases	43	57	14
Old Age assistance cases	59	55	6
Board of Health	6		
Soldier's Relief	1		
TOTAL	318	324	62

While extra duty was necessarily imposed upon many of the members of the department, due to the decrease of personnel, the same high standard of efficiency and loyalty prevailed throughout the year.

To the members of the Department, Justices and staff of the Municipal Court, and the various heads of Town Departments, I extend my sincere gratitude for their generous support and co-operation.

Respectfully submitted,

JAMES W. TONRA,
Chief of Police.

REPORT OF THE BROOKLINE PLANNING BOARD**For the year ending December 31, 1942**

The War has caused a decided drop in the work of the Planning Board, as it has in other municipal departments. Very little new building or street construction is possible under present conditions. As a result, only seven meetings of the Planning Board were held. Two petitions were received for change of zone, and two petitions for consideration of land development, together with ways thereon.

Zoning. The two zoning petitions had to do with the Richardson lot, Essex, Lenox and Mountfort Streets, and the Robert Stone lot on Boylston St. The Richardson petition, which called for a change in zone from single-family to general residential, was given very careful consideration at three meetings, and much local opposition developed. While the Board appreciated the owner's unfortunate position, due to greatly increased traffic, it did not feel that the change would be desirable for the Town and did not approve it.

In the case of the Stone lot, the owners wished a change in zone to allow the house to be occupied by two families. In this case also there was strong local opposition, and the petition was finally withdrawn.

Land Developments. A petition for the extension of Denny Road was considered at a duly advertised hearing, and it developed that some of the land owners involved were greatly opposed, and the plan was therefore not approved.

A petition to accept Cushing Road, from East Milton Road to Walnut Street, was approved.

Several other projects were discussed, but petitions were never submitted.

Population Study. Last year the Park Department recommended to the Town the purchase of several new parks and playgrounds. While all the projects were defeated in Town Meeting, it showed the need of a careful study of the problem. The Planning Board has undertaken such a study and as a basis for this, proposes to make a Population Density Map. This will require data on the age groups in different parts of the Town, and to get this accurately, a new census is desirable. This is particularly important in view of the fact that the last Federal Census in 1940 showed a smaller population than the State Census in 1938, and is probably several thousand less than the correct figure. It was hoped that this could be done in connection with the annual Police Listing in January,

but this was not found practicable. It is hoped that such a census may be made later on.

Vacant Stores. An annual list of vacant stores in different shopping centres would be of great value in determining the need of additional store zones. We have made such a study as of November, 1942, which shows 97 vacant stores in the following centres:

Brookline Village	18
Harvard Street	25
Coolidge Corner	18
Washington Square	9
Beacon St., near St. Mary's	0
Boylston St. & Cypress St.	2
Cypress St. & Washington St.	1
Other locations	24

Traffic Circle. The Traffic Circle at Grove Street and West Roxbury Parkway has been completed by the Metropolitan District Commission and is working well. The appropriation for this was voted last year, after our Representatives had presented bills for several successive years. The Town purchased the land for this project and released it to the Metropolitan District Commission for highway purposes. The State constructed the Circle and paid the total cost of construction.

Speed Limit for Automobiles. The questions of local speed limit for automobiles and the need for additional parking space have been discussed in previous reports. No action is recommended at this time on account of the War, but when conditions again become normal these will be given further consideration.

Zoning Law. The Board is recommending an amendment to the Zoning Law to prevent an abuse of the zoning intent, which has already occurred, and may occur again. Under the present law, the width of a lot in a single house zone is limited to a specified amount at a point where the house is located. There is no limitation to the actual street frontage and as a result, a long, narrow driveway can be extended from the lot to the public street and be considered as part of the lot. This would allow a development in which a number of houses could be built, with no proper street frontage and no proper approach for the Fire Department, etc.

Public Work Reserve. The Public Work Reserve is a planning agency, sponsored by the Federal Works Agency, and co-sponsored by the National Resources Planning Board, established for the following purposes:

1. To assemble data and estimates of potential public improvements of a needed or useful character. These may be used to establish a broad program of public works to absorb post-defense or emergency unemployment.
2. To encourage the assembling of data in preparation of long-range public improvement programs, based on need and ability to finance.
3. To follow the original programs prepared in an annual review so that a carefully developed long-range program of public works is always available and ready.

The Town of Brookline, through its Long-Range Planning Committee, has co-operated with the Public Work Reserve and drawn up preliminary estimates and assembled data for approximately fifty projects. These projects may be classified as follows:

- 11 New Buildings
 - 7 Improvements and renovations of existing buildings
 - 8 Park and playground projects
 - 4 Improvements and additions to the Water Service
- 11 Studies for the alteration and widening of streets, and the building of new streets
 - 3 Studies, including general sewer and drain construction, and of trunk sewers and drains
 - 7 Studies for additions and improvements to various services rendered by the Town, such as a new Destructor Plant, a Sanitation Depot, etc.

Defense. In co-operation with the Engineering Department, the Board worked up and published a set of specifications for plyboard shutters to be used in Air-Raid Shelters. Such shutters had been recommended by the Massachusetts Committee on Public Safety, but no details were available.

During the year Mr. William T. Aldrich was elected Clerk, to replace Mr. Hunneman, while he is in War Duty, but otherwise the membership of the Board has not changed.

The budget for the year 1943 is recommended as follows:

Secretary.....	\$200 00
Clerical help	60 00
Clerical help—Long-Range Planning.....	35 00
Professional advice	50 00
Hotels, meals, travel, etc.	10 00
Postage and mailing	25 00
Advertising	25 00
Printing (Including Long-Range Rep.).....	160 00
Dues (Mass. Fed. Plan Bds.).....	15 00
Books, magazines, etc.	10 00
Stationery, Supplies	20 00

Total	\$610 00
-------------	----------

Respectfully submitted,

GORHAM DANA, *Chairman*,
 CARLETON HUNNEMAN,
 LEON H. ZACH,
 ARTHUR J. SANTRY,
 WILLIAM T. ALDRICH,
Brookline Planning Board.

REPORT OF THE SEALER OF WEIGHTS AND MEASURES AND THE FUEL PURCHASING AGENT

*To the Board of Selectmen,
Brookline, Massachusetts.*

Gentlemen: — The following is the report of the Sealer of Weights and Measures and the Fuel Purchasing Agent for the year ending December 31, 1942.

<i>Scales</i>	Sealing

Oil samples analyzed	31		

The work required under the Weights and Measures laws has been increasing each year so that in order to provide adequate protection from short weights and measures it has been necessary to call on the Welfare Department for assistance, but as the war program practically eliminated unemployment such help has not been available this year. In addition, upon recommendation of the State Director of Standards, the Sealer and his two assistants were appointed Agent and

Investigators for both the Federal Office of Price Administration and the War Production Board and the duties in connection therewith caused a further substantial increase in the work. The assignments covered a variety of activities, some of which required under cover investigations. In addition, considerable work was done to assist in the war effort in disseminating information for the conservation of certain foods and materials needed in the war program. A more detailed report will be submitted to the local Committee on Public Safety which supplied the necessary funds. The sealing and inspection work is done by, or under the supervision of Deputy Sealer William F. Coughlin, who has rendered diligent and conscientious service and who, because of his other duties in the milk and food inspection division, has put in considerable overtime without additional compensation. In addition, to obtain the indicated satisfactory results it has been necessary at times to make use of the personnel in other divisions of service under the Sealer's charge. In order to maintain present standards of service it will be necessary to employ additional help *in* busy seasons when the work of the several divisions mentioned overlaps. The public has been increasingly appreciative of the services of this department as evinced by the demands of both merchants and consumers. As the war program has restricted the use of certain packaging materials manufacturers have been obliged to make changes in types of containers and methods of packaging. The use of thinner paper, fibre cartons and other substitutes has resulted, in many instances, in deficiencies in both content and quality through leakage and undue atmospheric exposure. Following notices to manufacturers of disapproval, more substantial containers have been supplied for many commodities.

Notwithstanding the restrictions in the sale of gasoline and oils the number of pumps in use in the town has not been materially reduced. Nearly all of the old style pumps have been replaced during the year with the meter type having computing and recording attachments. Although these require more frequent inspection and adjustment consumers are better assured of correct measure and charges and thus a condition which has occasioned many complaints is, to a large extent, eliminated.

Sealing. Although there were 87 more pre-sealing determinations made than last year there were 49 fewer weighing and measuring devices that could be sealed. Most of the 650 adjusted required repairs which were made by the Sealer previous to sealing. The 62 non-sealed were those of such value as to warrant their being sent to the manufacturers for repairs while the 150 condemned were either badly worn or

defective to such an extent as to justify their permanent elimination from further use. In comparison with last year's work this indicates a decided tendency towards greater accuracy, which is attributed largely to replacements with more modern devices which, however, require greater supervision.

Reweighings and Measurements. The reweighing of packaged commodities is a primary factor in protecting consumers against short weight or measure and promoting fair dealing by merchants, processors and manufacturers. There were 270 more such determinations made than last year; 303 more were correct, 35 less were underweight and about the same number overweight. It is noted that the discrepancies of those underweight were very much less than in previous years, and a considerable portion of these were due to the inability of manufacturers to obtain materials for containers that would retain the net weight and quality. The largest discrepancy in the weight of coal in transit was only 15 lbs. in a 6 net ton load, which was within the allowable tolerance while those overweight ran from 15 lbs. on a net ton load to 40 lbs. on a 15 net ton load. The coal in paper bags showed only minor discrepancies in weight. It is therefore creditable that on the whole a very substantial improvement is shown.

Inspections and Tests. There were 660 inspections and determinations in excess of those made last year. The major corrections effected included the use of more substantial food cartons and proper labelling of same and also of bread, replacement of improperly calibrated peddlers' and junk dealers' scales and inaccurate clinical thermometers, adequate filling of kindling wood bags, milk jars and cans, oil jars and berry baskets.

Miscellaneous. The additional store inspections were made with the purposes of preventing shortages through the careless use of modern sensitive scales and other faulty procedures. The 22 investigations under this heading included looking up the dependability and equipment of applicants for peddlers' licenses, the status of applicants for appointments as Weighers of Coal, complaints regarding the quality of fuel, and such other matters as were related to the public interest.

Peddlers. Due to the supervision exercised by the Police and frequent inspections by the Deputy Sealers only 2 complaints have been received during the year, investigation of which resulted favorably for the complainants.

Measurer of Wood and Bark. There were but 2 requests for official measurements and certificates were issued for same.

Various additional cubical measurements were made to insure the sufficiency of commodities offered for sale.

Report of the Fuel Purchasing Agent

The following tables show the quality of fuels supplied the town: —

NO. 6 HEAVY FUEL OIL Tappan Street Plant

Contract expired July 1, 1942	Quality Specified	Quality Furnished
<i>Petroleum Heat and Power Company 378,798 gallons</i>		
Price per bbl. \$1.56. Advanced with market to \$2.01 Max.		
Viscosity at 122° F. Not higher than	125 Sec.	122 Sec.

B. T. U.'s per pound		19,400	19,787
B. T. U.'s per gallon		139,796	137,213
Moisture and/or sediment02%	Trace

Heavy Fuel Oil. The oil delivered under the contract expiring July 1st was well above the quality specified by the dealer, there being an average of 1,917 more B. T. U.'s per gallon than that guaranteed in the contract, while the subdivisional analyses were consistent with the higher B. T. U. content. It should be noted that the quality guaranteed by the contractor was the same as the standard adopted by the town. This was a factor in the increased adjusted price payable to the contractor. The deliveries since July 1st, under a sales agreement in accordance with the terms required by the Federal authorities, showed considerable variation in quality. Because of the acute shortage it was necessary in two instances to substitute #5 oil, which is of lower heat value. Distributors in the East have had no control over the quality of oil allotted them from pools and government reserves. However, a considerable portion from Texas was of such high quality as to provide an average of 1,389 B. T. U.'s more per gallon than the standard adopted by the town.

Light Fuel Oil. This oil averaged 615 B. T. U.'s per gallon below that specified in the contract. The decreased heating

value is not chargeable to the dealer for after the government oil Limitation Order L-56 affecting light oil became effective in early May, dealers were obliged to take such oil as was allotted them, some of which was very poor. However, the subdivisinal analyses were consistent with the variable Baumé gravity of the several qualities delivered. This condition was responsible for considerable poor oil delivered since July 1st under the sales agreement required by the government. There was an average of 2,583 B. T. U.'s per gallon below the required standard. This constituted a considerable loss to the town and accounts for the demands received from several of the departments for increased allotments. It is to be regretted that such substantial loss in the heating value of oil should occur at a time of serious shortage but investigation showed it to be general throughout the eastern states and shipments of poor oil are liable to continue.

Coal. The specified standard for ash in egg is 10.5%, stove and nut 12.5%, yard screenings 16% and bituminous 8% and 14,300 B. T. U.'s.

Brookline Coal Co. { Contract to July 1, price all sizes
\$10.95 net ton.
Present Contract, price all sizes \$12.45
net ton.

Everett Fuel Co. Yard screenings, Contract to July 1, price
\$4.35 net ton.

Anthracite	Average Ash	No. of Tons	Tons Below Standard	Penalties	Premiums
* { Egg	11.45	383	196	\$29.40	None
Stove and Nut	12.72	62	None	None	None
Yard screenings	10.36	178	None	None	\$35.65
† { Egg	10.87	561	368	\$33.72	28.94
Stove and Nut		Sample	not completed		
Yard Screenings ...		Sample	not completed		

Brookline Coal Co. Contract to July 1, price \$7.98 net ton, plus increased freight.

Stetson Fuel Corp. Present contract, price \$8.65 net ton. Yard screenings, price \$4.90 net ton. Sample not completed.

Bituminous	Average Ash	No. of Tons	Tons Below Standard	Penalties	Premiums
Av. B. T. U. *14,467 ..	4.81	2,073	2,073	†\$261.36	None
†14,419 ..	4.99	1,504	829	†\$85.52	\$99.36

*Contract expired July 1, 1942.

†Present contract.

‡Premium disallowed because of high volatile matter.

The egg coal furnished under the contract which expired July 1st, averaged somewhat higher in ash than the standard specified in the contract. This was due to one sample representing 196 tons being unusually high in ash, while the stove and nut were well within the specifications. The yard screenings were exceptionally low in ash and free from dirt and slack. Consequently except for the 196 tons referred to all the anthracite coal was of exceptionally good quality. The egg coal furnished under the present contract averaged a low ash content.

The bituminous coal furnished under the contract which expired July 1st, although satisfactorily high in B. T. U.'s and low in ash was practically all high in volatile matter and some also contained excessive slack. Consequently it was penalized by disallowing the premiums which otherwise would have accrued. Such coal is not economical unless used in combination with yard screenings or buckwheat coal. The coal furnished under the present contract has been the most suitable for the purposes needed that we have received during the past seven years. The high volatile coal, upon which the premiums were disallowed, was supplied to the two large heating and power units where yard screenings are used while low volatile coal was furnished the buildings where janitors could not be induced to use yard screenings to retard the heat from passing up the flue. Mechanical tests gave a satisfactory ratio of heat under both slow and rapid combustion.

There has been considerable criticism made by heads of departments because of slow deliveries. However, considering various critical conditions due to war emergencies and the fact that the contract was extended to cover two to three thousand additional tons, the contractor has kept every building supplied and under the circumstances the complaints were unjustified.

Such miscellaneous services were rendered and preliminary analyses made as seemed necessary to provide a satisfactory fuel supply.

Respectfully submitted,

WILLARD E. WARD,
*Sealer of Weights and Measures,
Fuel Purchasing Agent,
Measurer of Wood and Bark.*

REPORT OF THE RECREATION COMMISSION

December 31, 1942.

To the Honorable Board of Selectmen:

Gentlemen:—The Board of Recreation Commission herewith presents its first annual report of the year ending December 31, 1942.

It seems fitting that at this time special mention should be made of the change in the policy of the recreation departments, which was made on March 24, 1942, by vote of the annual town meeting whereby the Gymnasium and Bath Committee and the Playground Commission shall henceforth be under one group of advisers known as the Recreation Commission. This change seemed advisable as the work of the two former committees were of a similar nature. We would like to acknowledge at this time the fine co-operative spirit of those commissioners who have served in the past, and who have given so freely of their time to help make these departments of valuable service to the community.

This Recreation Commission pledges its faithful service to the Community for the building of the future.

Another year has ended and with it a renewed national consciousness that each and every citizen has an important part to play in this world-wide conflict. This is everyone's war and everyone must do his share. It is not only our national obligation to work hard in whatever job we may have to do, but it is definitely our national obligation to keep physically fit.

With people working to mental and physical capacity under the driving force of a war-time step-up program, it seems more imperative than ever that we provide the necessary release from tension which can be derived only from recreational activities. Brookline has served well the community in the past, and it will serve it now in this national crisis.

"Keep 'em flying" is the slogan on everyone's lips. We must do more than this — we must "Keep 'em fit" and by "them" we mean every man, woman, and child.

For the most part the recreational activities of the gymnasium, bath house, evening centers, and playgrounds have been the same as in the preceding years. It seemed advisable, however, to eliminate one or two events of town-wide interest. These were as follows: one, the Old Timer's Night, which always carried a great deal of interest; and two, the joint annual field day of all the playgrounds at the end of

the season. Because of the lack of transportation facilities and the general trend of the times it seemed necessary to forego these events at this time.

This year the Recreation Commission assisted for the first time in the Memorial Day Exercises. This was done in conjunction with the Brookline Post of the American Legion and the Stephen Rutledge Post of the Veterans of Foreign Wars. A fitting program was participated in by members of these groups to honor all those who in the past have helped to make possible our American way of life.

Beginning with the closing of the public schools on December 11th for the extended Christmas vacation, the entire program of three recreational centers was changed from afternoon and evening sessions to morning and afternoon sessions. This seemed advisable in order that the recreational facilities might be offered to the children of all ages through the entire day.

The Bait Casting Club was not reorganized this past fall, because of many of those interested being called to the service of our country.

We would like to acknowledge at this time the entry into the service of two of the department's instructors: namely, Mr. Henry W. Lynch from the Chestnut Hill Recreation Center, and Mr. James Johnson of the Heath School Recreation Center, and Mr. William H. Lincoln of the Bath House.

To all our patrons and to these three employees who are so nobly serving their country's call to arms, we wish good luck and God speed.

On September sixth at approximately 6:30 A.M. a fire was discovered in the apparatus room of the main gymnasium. This caused severe damage to the apparatus room, burned about 625 square feet of the gymnasium floor adjacent to the apparatus room, and 44 feet of railing of the running track. Because of this damage it was impossible to start classes in the main gymnasium on October first. Classes were held, however, in the small gymnasium from October 1st until such time as the main gymnasium was ready for use. This fire was of undetermined origin.

A second fire was discovered on December 1st at about 2:00 P.M. in the main locker room. It was definitely concentrated in one of the dressing rooms. The damage was mostly that of paint finish of the walls, metal lockers and ceiling, and three dressing rooms. The cause of this fire was of incendiary origin.

Because of the new dim-out regulations regarding the necessity of drawn curtains from sunset to sunrise, it was

necessary to suspend all evening activities in both the gymnasium and the bath house from December 1st on due to the lack of curtains in these two buildings. Curtains have since been installed and as soon as the main locker room is ready for use all classes will be resumed.

Victory is our ultimate goal—not only on the war fronts but also here on the home front. To keep physically well and mentally alert during these times of stress and strain is of primary importance in the building of our post-war security for the keeping of this fine American heritage which we so boldly cherish and for which we must sacrifice.

“Keep fit.” It is your national obligation.

Let us serve you and you in turn serve your country.

EIGHTY-SIXTH ANNUAL REPORT OF THE TRUSTEES OF THE PUBLIC LIBRARY

The Trustees of the Public Library of Brookline herewith present their 86th Annual Report covering the activities of the Library in 1942.

The Board of Trustees organized after the annual Town Meeting, is as set forth in the opposite page. Since then there has been one resignation and an election to fill the vacancy. Reverend Abbot Peterson, D. D., as Chaplain of the 26th Division of the National Guard, was called to active service in December, 1940, and became Division Chaplain in the United States Army. Our entrance into the war has made Lieutenant-Colonel Peterson's likelihood of return to Brookline in the near future so uncertain that he felt compelled to submit his resignation as a Trustee. Under the circumstances the resignation was accepted, but with deep regret. At a convention of the Trustees with the Selectmen on December 28, 1942, Reverend William R. Leslie, D.D., pastor of St. Mark's Methodist Episcopal Church since 1921, was elected a Trustee to succeed Lieutenant-Colonel Peterson.

At the request of the Town Fuel Conservation Committee, a special meeting of the Board was held in August to review ways and means of helping in the problem of fuel shortage — in particular how to heat the Coolidge Corner Branch because of a possible rationing of fuel oil. After a deliberate discussion the Board voted that rather than to convert to the use of coal it could co-operate best in the fuel problem by using every means to reduce fuel needs at the Coolidge Corner Branch, and if necessary close it and transfer its staff to the main library.

In May, upon the receipt of a communication from a Town Committee concerning salaries and classifications of staff members, the matter was carefully reviewed. The Trustees advised the Committee that its present policy is compatible with the proposed Town Plan as respects sick leave, and as to vacations for non-professional members of the staff as well as for the janitors. It added that further consideration, however, should be given to the recommendation concerning vacation periods of professional staff members.

Due to war conditions and resignations from the library staff, arrangements and adjustments have had to be made in the library hours. In respect to physical conditions of the main library building, the Board is pleased to report that the

improved lighting conditions, for which the Town appropriation was made, have been achieved, much to the satisfaction of the public, as evidenced by their frequent comments.

During the depression of 1933 the library willingly granted the temporary use of part of its main building to the Town Welfare Department. Since then the need of this space by the Library has greatly increased, and consequently the Trustees had on that account to demand that the Welfare Department be located elsewhere in order that the space can be used again by the Library.

The Board is pleased to acknowledge the receipt from Mrs. J. Emory Hoar of the portrait of her husband who in 1854 was appointed the Town's first Librarian and served as such until 1871. Mr. Hoar for 34 years was principal of the High School. Later he was elected a Trustee of the Library.

Acknowledgment is likewise made of the generous gift of a piano by Mrs. Theodore G. Bremer. It has fulfilled a need which has long been felt for one for the Assembly Hall.

The Board is grateful to the Brookline Garden Club for supplying the Library with flowers, much to the satisfaction of its patrons.

Many citizens of Brookline generously contributed to the Victory Book Campaign by which 21,500 books were distributed among the United States Armed Services. Some also gave time and energy in organizing the campaign locally and in collecting books. Tribute should be paid them as well as to staff members who voluntarily gave liberally of their free time to this task.

Reference is made to the report of the Librarian respecting the details of the administration of the Library, as printed below.

REPORT OF THE LIBRARIAN

To the Trustees of the Public Library of Brookline for the Year ending December 31, 1942:

Both the President and Elmer Davis of the Office of War Information consider libraries "combatants from this time on in all countries where free libraries and a free culture still exist. . . Teachers and writers can and do perform useful services on this front but neither writers nor teachers have at their disposition in their professional work the facilities which the librarian employs. The librarian has around him, or should have, the books in which the facts are presented — the books in which the problems are posed, the considerations are reviewed, and the facts are made evident. Librarians in their professional duty are continually concerned with the problem of directing their readers to the materials which their readers require. In the present war as never before this duty of librarians assumes a first and pressing importance and librarians in consequence carry a responsibility such as they have never carried in our history." The President's message is shorter but has broad implications. "In this war, we know books are weapons and it is part of your dedication always to make them weapons for man's freedom."

In common with all other public institutions, the library has met new responsibilities because of the war. There has been a change of emphasis in the service, and in the materials provided. Ingenuity and increased labor have been required to meet the challenge of providing the war needs without too much sacrifice of the basic cultural needs.

In order to prepare themselves to meet any emergency, the Staff has taken instruction in Air Warden duties and in First Aid. Their working hours are such that extra volunteered services have been confined to library activities. Free mornings and afternoons have been given to sorting books for the Armed Forces, to the assembly of libraries for shipment at the Brighton Deposit Center, to helping with the organization and reference service of the Defense Library of the Mass. Committee on Public Safety. This was a fruitful experience and brought requests for service from the Public Library of Brookline. With the declaration of war, the library began to assemble pamphlets, government documents, books and posters on the war and civilian defense. Lists have been compiled and distributed, covering such subjects as "Science serving Mankind," "Wings over the World," "Garden for Victory," "America in a World at War," "Our Fighting Forces," "Technical Manuals issued by the U. S. War

Department," "War Stories," and "Magazines cover the News," listing unfamiliar periodicals giving up-to-date information on world affairs.

The Victory Book Campaign for 1942 was a major activity during February, March, and April. For the creditable showing of Brookline in this National Campaign, the library is greatly indebted to the Chairman, Senator Richard S. Bowers, whose help and efficient organization made a canvass of the town a complete success, to Mrs. Lewis I. Prouty who defrayed the expenses, to Mrs. Ernest R. Caverly who so unstintingly gave of her time and so effectively managed the sorting and packing of thousands of volumes, to Miss Lewis and Miss Spaulding, Mrs. Corcoran and Mrs. Hobson who gave many hours to the identification and sorting of volumes, to the Kiwanis Club, the Lion's Club, and the Young Republican Club, and Mrs. Stodder for collecting quantities of books, to the Red Cross Motor Corps of Boston for prompt transportation, and to so many other individuals and organizations, it is not possible to mention all.

26,487 volumes were delivered to various ships and Army and Navy centers. The Librarian is personally deeply appreciative of such wholehearted help and co-operation. The press and the radio continue to express the thanks of the Armed Forces.

Book Stock

Here also the emphasis has changed in the selection of books because of unusual demand due to the war. While the proportion of fiction and non-fiction added to the branches remains the same, at the main library 276 titles of fiction and 1,782 titles of non-fiction were added. Another noticeable feature was the acquisition of 251 maps. The most emphasis in buying was for technical books, history and travel, sociology and reference books. 6,652 volumes were added; 4,412 were withdrawn. The total book collection comprised 177,592 volumes December 31, 1942.

Use

The Children's Room at the main library and the Washington Square Deposit Station show the only gains in circulation. The number of adult books borrowed at Washington Square Deposit Station (14,950) is now greater than at Chestnut Hill branch (10,978). Twice as many maps were loaned in 1942. The reading interests parallel the emphasis in purchase. Using the main library as an illustration, history and travel, literature and philology, sociology, useful arts, including technical books and biography were in the greatest demand in the order mentioned. Nearly

half of the books loaned to both adults and children were classed books. The percentage of fiction issued was 55.7%.

Registration

The total number of card holders, December, 1942, was 15,555. Of this total 11,904 are adults; 3,651 are children. Five hundred sixty are non-residents. Analyzing the holders of children's cards by districts with the various schools as centers, Devotion leads with more than 200; Driscoll and Lawrence follow with more than 100 in each school. St. Mary's, Pierce, Lincoln, and Runkle are next highest with more than 50 but with less than 100 each. Baker, Heath, Sewall, St. Aidans, and Baldwin follow with less than 50 each. Fifty-eight children in private schools are registered.

Abstracts from the various department heads follow.

Catalogue Department

Since the beginning of the library's reorganization, the processes in the Cataloguing Department have of necessity felt many changes. The most important of these was the transference of all juvenile shelf-listing and cataloguing to this Department. For many years this work was done by the assistants in the Children's Department because the cataloguers combined with their regular duties many morning routine chores and hours at the Loan Desk. As these scheduled periods are lessened, the Cataloguing Department will be able to devote more time to its special tasks. The juvenile cataloguing is now up to date. Another entirely new operation taken over by the cataloguers is the typing of book numbers on all book cards and pockets. By this method, all numbers are uniform in size and clearness, and the cataloguer has an opportunity to correct any copying errors. Formerly, these were hand-printed by assistants in the mending room as a part of the finishing process. The head cataloguer, Miss Walden, has been granted the opportunity to study at Simmons College in pursuance of her B.S. Degree in Library Science. She is most grateful to the Trustees and to all the assistants in the department for their loyalty and help in advancing the work during her partial absence.

Reference Department

Services rendered by the Reference Department in the past year reveal a library public whose interests and attentions are centered about the problems generated by the war. As a general rule, the practical and utilitarian interests have had a greater appeal than the liberal and cultural. The demand for up-to-date technical books, stimulated in 1941 by

defense preparations, has been accelerated with the country actually at war. Many questions have been received concerning opportunities and demands in defense industries and in the Armed Forces. Interest in geography of foreign countries has been revived as the men in the military forces have been increasingly dispersed around the world in order to meet the requirements of a global war. Since most of the questions which arise as a result of the war are best answered by the U. S. government publications, the library's document collection has been used more than ever before. The Reference Department has issued lists on special subjects from time to time and plans to do much more of this type of work in the future.

Children's Division

So that boys and girls in the seventh and eighth grades might have full opportunity to meet the rising demands of their school work and still follow personal inclinations in reading, the number of books loaned to them for home use was raised from two to four on October 26, 1942.

This measure has probably been largely responsible for the increase in circulation, in the last two and a half months, both at the main children's room and at the Coolidge Corner children's room. A systematic reappraisal of the book collection has been started at the Coolidge Corner children's room for the purpose of discarding useless and outdated material, and for the replacement of useful, necessary books in poor physical condition. In so far as funds will allow, this policy will be continued at our main and Chestnut Hill children's rooms. Our books must not only supplement school curricula, but help develop our children into responsible thinking adults.

School Library Service

The High School Librarian has completed her twentieth year in the High School. In that time the High School library has expanded from one small room with one Librarian to a suite of rooms with an additional full-time assistant. The book stock has increased from 2,131 to 7,000 volumes. The service has projected itself to all High School departments.

In 1942 the attendance in the library was 51,969. Twenty-eight thousand four hundred fourteen books, 6,866 mounted pictures, 3,600 pamphlets were loaned. Thirteen students from the library school of Simmons College did their practice work there under the supervision of the High School Librarians. The Staff also contributed its share to war activities.

The customary contacts with the classes in the elementary schools were maintained. The advisory service to the Murphy Library of the Baker School was increased and the Librarian in charge of work with the grade schools was able

to give much appreciated service in books and counsel on supplementary reading for the revised course of study in the public schools. Seventeen thousand eight hundred thirty-one books were sent to 175 classrooms, one college, and one school library. The service involved in the selection, preparation, and delivery of the classroom libraries cannot be measured statistically.

Conclusion

Details of the losses and gains may be found in the appended statistical tables.

There have been some changes in the Staff with resulting difficulties and delays in finding qualified replacements. As long as war continues, the activities of the library will be modified by its influence, but withal, the library will endeavor to continue its progress and broaden its usefulness as a basic community service.

For the co-operation of the library Staff and the understanding support of the Board of Trustees, the Librarian is deeply grateful.

Respectfully submitted,

ELIZABETH BUTCHER,

Librarian.

REPORT OF THE BOARD OF PUBLIC WELFARE

The Board of Public Welfare respectfully submits its report for the year ending December 31, 1942.

We call attention to the report of Miss Kate Ellis, the Welfare Agent, for the work and activities of the Department which are supervised and carried on by her.

Applications for work on WPA and certifications for the food stamps, the WPA milk and clothing have been carried on as usual in the Welfare Department.

For the detailed report of the work carried on by the WPA, refer to the report of William D. Kerr, WPA Agent.

Summary of Appropriation and Expenditures

Board of Public Welfare.

WELFARE AGENT'S ANNUAL REPORT

January 15, 1943.

To the Board of Public Welfare:

Gentlemen: — As agent of the Board of Public Welfare, I submit the following report for the year ending December 31, 1942.

The defense work and private employment have again cut the General Relief rolls, and have reduced the cases in Aid to Dependent Children. The expenditure for the Department is accordingly reduced, being \$414,484.26 against \$441,827.27 in 1941.

The Stamp Plan, under the Surplus Marketing Administration, which began in Brookline April 1, 1941, has grown in favor during the last year and benefited the participants. There were 1,034 sales made in stamps which amounted to \$30,686 in yellow stamps and \$15,147.50 in blue stamps. The blue stamps were the Government's contribution in surplus foods.

The Department has certified fifty-six women and thirty-eight men for the WPA.

We wish to thank the Boston Branch of Needlework Guild of America for the clothing sent to the Department for the children and babies. We also thank the Brookline Friendly Society and the St. Vincent de Paul Society for their co-operation.

General Relief

During the year, 508 cases have been aided, 170 cases less than in 1941. Of these 508 cases, 222 were family cases, and 286 single men or women, and included the following special types of aid: Hospitalization — fifteen; Convalescent care — thirty-one; Medical care only — twenty-five; children — sixteen.

Ten years ago in 1932 there were 578 cases aided, which makes the present case load the lowest since 1931.

There were fifty-three new cases against eighty-six in 1941. The average number of active cases at the end of the month was 247 against 341 in 1941.

As in former years, a small group has received both WPA and Welfare. The monthly average was eight cases, one-third of the number in 1941. The reason for this reduction is the small number of cases on WPA.

Under the supervision of the heads of the various Town departments, the men and some women have worked for the aid they received at the rate of fifty cents an hour. Follow-

ing are the departments and the number of hours worked for each department:—

Health	608	School	1,216
Highway	2,988	Town Hall	958
Observation Tower	70	Treasury	820
Park	3,128	Walnut Hill Cemetery	548
Public Library	2,817	Welfare	2,318
Recreation	2,653	W. P. A. Commissary	2,361
Total number of hours		20,841	

The 508 cases are listed below according to settlement:

Brookline	286
State	174
Cities & Towns	48

The total expenditure was \$151,390.93 against \$200,730.92 in 1941, as shown in the comparison below:

	1941	1942
Total Expenditure	\$200,730 92	\$151,390 93
Reimbursements	76,238 77	88,122 82
Cost to Brookline	\$124,492 15	\$63,268 11

The appropriation for this category was \$174,000.00

Expended	\$151,390 93
Balance	22,609 07

Aid to Dependent Children

On January 1, 1942, there were ninety cases receiving assistance in this category. During the year, fifteen new cases and seven re-opened cases were added and thirty-five cases dropped, leaving a balance of seventy-seven on January 1, 1943.

The cause of dependency of these seventy-seven cases is, as follows: Widows—twenty-five; Totally incapacitated fathers—thirteen; Legally separated—seventeen; Divorced—eight; Fathers absent for Military Duty—one; Unmarried mothers—two; Relations as Parents—six; Father's Desertion—eight; Fathers in Prison—one.

Comparison of Expenditures

	1941	1942
Total	\$68,588 42	\$66,167 32
From Federal Grant	16,524 90	17,914 59
From Town Appropriation	52,063 52	48,252 73
Less reimbursements from Commonwealth	12,174 68	21,835 79
Net Cost to Brookline	39,888 84	26,416 94

Old Age Assistance

On January 1, 1942, there were 715 men and women receiving Old Age Assistance in Brookline. During the year 160 cases have been added; twenty-two re-opened and 143 dropped, leaving a balance of 754 on January 1, 1943.

The total expenditure was \$356,609.56. As shown below, the Federal Grant receipts and reimbursements from State, Cities and Towns, and individuals reduced the net cost to Brookline to \$48,985.19.

Expenditures

	1941	1942
Total	\$315,194 40	\$356,609 56
From Federal Grants	137,294 95	151,515 05
From Town Appropriations.....	177,899 45	205,094 51
Reimbursements from State, Cities and Towns and Individuals.....	128,700 73	156,109 32
Net Cost to Brookline	49,198 72	48,985 19

Below are listed the 897 cases according to settlement:

Brookline	567
Cities and Towns	130
State	200

Brookline is reimbursed one hundred percent for all cases having settlements in other Cities or Towns and, also, the State reimburses one hundred percent for all cases without settlement.

Infirmary

The Infirmary, under the able management of the Superintendent, Miss Elizabeth McMahon, gave a good home to its inmates.

On January 1, 1942, there was a household of thirteen — twelve men and one woman. During the year there were twelve admissions and fourteen discharges, leaving a balance of eleven — ten men and one woman on January 1, 1943.

During the Summer one man and one woman obtained private employment.

The expenditure for the year was \$9,746.09, a decrease of \$1,387.29. This was due partly to a smaller family and partly to the heating charges being \$600 less than in 1941.

Average daily attendance at Infirmary	11 97
Average weekly cost	\$15 45

Summary of Expenditures and Receipts 1942
From Town Appropriations

Infirmary	\$9,746 09			
Reimbursements		\$9,746 09	\$9,746 09

I wish to thank the members of the Board for their consideration and co-operation.

Respectfully submitted,

KATE ELLIS,
Agent.

REPORT OF W.P.A. OFFICE

January 20, 1943.

To the Honorable Board of Selectmen:

Gentlemen:— I respectfully submit herewith the report of the Federal Relief Program in Brookline under the Work Projects Administration for the year 1942:

Average number employed during the year 1942	180
Earnings of Brookline residents paid by the Federal Government for the year 1942	\$155,520 00
Federal Clothing distributed to Brookline Families	40,436 90
Food Stamp Plan (Surplus Food Commodities)	
Orange Stamps	\$30,685 00
Blue Stamps	15,147 50
Total	\$45,832 50

The personnel employed were engaged in projects of direct assistance to the war effort; for example, the sewing project repaired and tailored Army uniforms, produced sand bags and arm bands for the Defense Committee, sand bags for several Town departments, blackout curtains for the Water Department and first-aid bags and traffic belts for the Police Department.

Manual projects, in addition to sewer and drain work, erected protective fences on the different Water Department properties and removed the remaining street-car rails from Town-owned streets.

The recreation project co-operated with the Playground Department supervising playgrounds and recreation centers.

Respectfully submitted,

WILLIAM D. KERR,
Town W.P.A. Co-ordinator.

•

REPORT OF THE FIRE DEPARTMENT

January 15, 1943.

To the Honorable Board of Selectmen:

I submit herewith the annual report of the Fire Department for the year ended December 31, 1942.

There were 740 alarms during the year. This compares with 858 in 1941, a decrease of 14.32%. Of the 740 alarms 111 or 15% occurred in the month of December. The natural deduction is that the fewer alarms which were answered in the first eleven months reflected the precautions which had been taken by householders in cleaning out attics and cellars in anticipation of air raids. On the other hand, in December the fuel oil shortage forced conversion of many heating systems from oil to coal and greater use of other heating methods such as coal, electric and gas stoves and fireplaces. In consequence many structural defects in chimneys and electric wiring appeared.

The total fire loss was \$149,825.99. Two fires were responsible for \$98,260.24 of this amount, leaving \$51,565.75 loss to be spread over 738 alarms, an average of approximately \$70 an alarm.

At the annual Town Meeting in March, 1942, \$28,624.00 was appropriated for the purchase of two 1,500-gallons-per-minute pumping engines. By the end of the year the Federal Government had issued a priority order for the construction of only one of these engines. Delivery is expected during the spring. Six thousand feet of 2½ inch emergency fire hose was also acquired.

For many years the Fire and Police signal systems had been a part of the Department of Wires and Lights. During the year they were placed under the direction and supervision of the Fire Department where they logically belong.

Two members of the Department entered the Military Service of the United States. They were Private James J. Gannon appointed to the Department Nov. 12, 1929, and Private Thomas F. McInerney appointed April 4, 1925.

Captain George H. Murray, long an outstanding and efficient Officer, who was appointed a Private Jan. 11, 1908, retired on a pension August 31, 1942.

No deaths occurred among members of the Department.

Fire Record

The 740 alarms to which the Department responded in the past year were divided as follows: 274 bell alarms, 430

still or telephone alarms and 34 Boston and 2 Newton alarms. There were three two-alarm and one three-alarm fires.

The causes of the fires were as follows:

Automobile fires	69	Defective wiring	8
Burning rubbish	37	Sparks from chimney	24
Chimney fires	43	Supposed fires	18
Burning fat and meat	22	Careless smokers	102
Brush and grass fires	43	Overheated furnaces	19
Defective flues	16	Spontaneous combustion	5
Overheated electric irons	6	Unknown	28
False alarms	40	Hot ashes	10
Dump fires	20	Defective refrigerators	24
Defective oil burners	35	Set by boys	54
Emergency calls	47	Incendiary	6
Fires in electric cars	4		
Miscellaneous	60		
			740

Fire Alarms for Each Month of the Year

January	63	July	43
February	65	August	34
March	70	September	43
April	67	October	67
May	57	November	77
June	43	December	111
			740

Fire Alarms for Each Day of the Week

Sunday	98	Thursday	104
Monday	109	Friday	103
Tuesday	109	Saturday	110
Wednesday	107		
			740

The loss, valuation and insurance, as nearly as could be ascertained, was:

Value of buildings and contents where fires occurred	\$2,811,280 00
Insurance on buildings and contents	3,104,450 00
Damage to buildings and contents	149,825 99
Insurance paid on buildings and contents	149,825 99

Hose Condemned

2½" hose	600 feet
1½" hose	450 feet
¾" hose	100 feet

Hose in Service

2½" hose	17,600 feet
3" hose	2,950 feet
Small hose ¾"	1,100 feet
Chemical and booster hose ¾"	3,000 feet
1½" hose	6,500 feet
Suction hose	334 feet

In Storehouse

1½" hose	100 feet
¾" hose	450 feet

Inspections

Total building inspections.....	2,465
Oil burners inspected	395

The Department wishes to express its thanks to Dr. Arthur A. Cushing, Dr. Frederick L. Hayes and Dr. Edward L. Kickham for their willingness to render medical or surgical assistance whenever called upon, and to the Department Chaplains, Rev. Daniel F. Burke and Rev. William R. Leslie for their interest taken in the members of the Department.

Respectfully submitted,

CHARLES F. ROWLEY,
Fire Commissioner.

REPORT OF WIRE INSPECTOR

*Mr. Thomas J. Moran, Building Commissioner,
Brookline, Mass.*

Dear Sir: — I respectfully submit the fifty-fourth annual report concerning the inspection of wires. The Board of Selectmen voted on April 27, 1942, that the inspection of wires be under the general direction and supervision of the Building Commissioner, consequently this is the first annual report under the revised jurisdiction.

In general the contractors have shown a willingness to comply with the regulations. The limited use of critical materials due to priorities for work essential to the war effort has created a situation requiring much more time and effort on the part of this inspection division in the matter of approval of substitute materials and in the detection of attempts to install materials not conforming to the code.

Your inspector has continued to assist other departments of the town in matters where the particular technical questions were of a nature where such service could be of value. From June 1, 1942, to December 1, 1942, I have assisted in the enforcement of Blackout and Dimout Regulations promulgated by the Massachusetts Committee on Public Safety. Since December first this enforcement has been handled by the wardens. An application was submitted to the Federal Communication Commission, November 15, 1942, to operate a short-wave two-way radio network consisting of ten stations, to augment the Civilian Defense Communications.

The following is a summary of work done by this division.

Number of permits issued	751
New buildings, lamps installed	5,215
Old buildings, lamps installed	524
Base plugs installed	5,495
Motors installed (less than $\frac{1}{4}$ HP)	277
Motors installed ($\frac{1}{4}$ HP and larger)	202
Electric ranges	39
Electric heaters	27
Neon signs	31
Transformers	93
Fixtures rewired or replaced	170
Electric services modernized	45
Buildings rewired after fire damage	8
Welding, battery charging and X-Ray installations	14
Fluorescent lights installed	2,800

Respectfully submitted,

JOHN J. HENNESSEY,
Wire Inspector.

REPORT OF BUILDING COMMISSION

December 31, 1942.

*To the Board of Selectmen,
Brookline, Mass.*

Gentlemen: — The Building Commission respectfully submits to your Board its report for the year ending December 31, 1942. The commission was appointed by the Board of Selectmen on April 27, 1942, and was duly organized on May 11, 1942, at which time notice of the creation of the commission and an outline of its functions was sent to all municipal boards, committees and departments proffering the assistance of the commission in the study and solution of problems affecting various departments which would come within the jurisdiction of the commission.

At the request of the Board of Selectmen the commission reported on proposed plans for the use of the Town Hall and possible utilization of a portion of the Police Station and Court House for municipal officers. So far as it is now known no further action on this proposal has been taken.

At the request of the Board of Selectmen the commission surveyed the existing conditions in the Municipal Gymnasium and Town Hall relative to safety conditions and reported to your Board with its recommendations thereto. So far as it is now known no further action on this proposal has been taken.

Respectfully submitted,

WILLIAM T. ALDRICH,
EDWARD B. RICHARDSON,
SCOTT McNEILLY.

REPORT OF BUILDING DEPARTMENT

December 31, 1942.

*To the Board of Selectmen,
Brookline Mass.*

Gentlemen: — I submit herewith the fifty-third annual report of the Building Department for the year ending December 31, 1942.

The increased armament and supply demands incident to the stepped up program of war production have resulted in limitation orders of the War Production Board requiring special approval by this Federal Agency for the issuance of permits for erection of new buildings and for alterations and repairs to existing buildings. Through this means critical materials are conserved for their more important war use and many contemplated projects must be deferred until the end of the war.

It has been found that the inability to secure building permits, by reason of such limitation, has brought about to some extent a practice among both owners and contractors of doing work which, under the law, requires a permit and approval of the Building Department, without obtaining such approval. A number of such instances have been discovered and in all cases the owners have been ordered to remove work done without permit and vacate any premises altered in violation of the law. During the last weeks of 1942 one flagrant case of this type of violation was discovered and court action against the owner is pending.

As a consequence of instances of this nature coming to the attention of the department a comprehensive survey of housing conditions is now underway. The limited personnel of the departmental inspection staff was insufficient for a rapid survey of this type and we have been fortunate to be able to avail ourselves of the services of several other municipal departments to assist in this undertaking. This survey is already productive of much information relative to said conditions which will receive immediate remedial action. Inspections have been made by the assigned personnel covering occupancies of buildings used for lodging houses, homes for aged and homes for convalescents. Another type of occupancy which will next receive attention of this staff is that of buildings used for mercantile and business purposes.

The Building Department has made inspection of all premises licensed for the sale of liquor and has made recommendations to the Board of Selectmen relative to conditions found to exist therein. These inspections have shown

their value and have been productive of excellent results in that the Board of Selectmen have made the recommendations of the Building Commissioner a condition of the issuance of the license. The continuance of this practice is certain to be of inestimable benefit to the town.

Francis W. Muldowney, Jr., who joined the departmental staff in 1941, has been assigned to duties in the School Department during the absence on military leave of the supervisor of maintenance of that department. While his absence has increased the work of the remaining members, the department is glad to co-operate with other municipal agencies in arrangements such as this which are of benefit to the municipality as a whole.

The department has continued to co-operate with the Brookline Committee on Public Safety and has set up and trained a Rescue and Demolition Squad under the direction of Inspector A. John Halfenstine. All of the department personnel have taken over assigned positions in this group for which their technical qualifications particularly fit them. The members of the staff continue to serve as volunteer personnel for the Brookline Report Center devoting many hours to this work.

This department has supervised the repairs of public buildings and has advised the several municipal departments relative to proposed alterations in their quarters. In conjunction with the Building Commission plans and estimates have been prepared for several proposed changes which are now receiving the attention of both the Building Commission and your Board.

The department has inspected all locations for which licenses or permits were applied for covering premises to be utilized as gasoline filling stations, garages, automobile parking spaces, lodging houses, convalescent homes, fraternities, nurseries and common victualers. It has also inspected locations for which billboard permits were sought and has represented the town at hearings held by the state commissions relative thereto.

Your commissioner is grateful to the members of the building department for their wholehearted co-operation in carrying out the important function of the department and for the many extra duties they have so unselfishly carried out.

The following summary gives in detail the type, number and approximate valuation of building operations for the year 1942.

	Number of Permits	Number of Families	Estimated Cost
Wood and Frame	21	21	\$121,500 00
Brick and Stone.....	10	5,150 00
Alterations	130	195,440 00
	<hr/> 161	<hr/> 21	<hr/> \$322,090 00
One-family dwellings	13		
Two-family dwellings	4		
Garages	9		
Miscellaneous buildings	5		
	<hr/> 31		

Reports of the Inspector of Plumbing, Inspector of Gas-fitting and Electrical Inspector are appended herewith.

Respectfully submitted,

THOMAS J. MORAN,
Building Commissioner.

REPORT OF THE INSPECTOR OF PLUMBING

*Mr. Thomas J. Moran, Building Commissioner,
Brookline, Mass.*

Dear Sir: — I herewith submit the fiftieth annual report of the Inspector of Plumbing for the year ending December 31, 1942.

The total number of permits issued to install plumbing was 229, of this 30 were for work in new buildings and 199 for plumbing alterations and additions.

The total estimated cost of installations for 1942 was \$81,728.00.

The following is a summary of plumbing fixtures installed.

Water closets	237
Lavatories.....	241
Baths	198
Sinks	183
Wash trays	122
Heaters	90
Other fixtures	62
	<hr/>
	1,133
Total tests made	76
Total inspections of plumbing.....	922
Total inspections other than plumbing	522

All hot water tanks and heaters subject to Chapter 518 of Act of 1941, Section 18, were duly inspected and safety equipment approved.

Annual inspection of all garage traps was made in co-operation with the Metropolitan Sewer District inspector.

As may be seen from the above record the past year has been an extraordinary one, as to the noticeable decrease both in the number of installations and the aggregate cost. All this of course was due to the closing down of all construction work and only essential work being permitted by the government. Nevertheless, the occupational time of the writer has been taken up with other very important duties such as assisting the Engineering Department in compiling new regulations for sewer and drain connections which we expect to have accepted this coming year. Much time has been consumed on inspection of old tenement house property, including one where we found it necessary to vacate six families on account of the unsanitary conditions of the plumbing. Several other cases are pending until court orders are received for further procedure. One case worthy of mention is that of a community grocery store where the drainage was found inadequate and otherwise very unsanitary. Drainage from

surrounding property was allowed to enter the cellar and remain, thus becoming stagnate and constituting a nuisance. With the assistance of the Highway Department the cellar was pumped out and allowed to dry. The owner was given all the help we could render to install suitable drainage.

This division of the Building Department has been active in the following up of reports of inspectors of conditions found to exist in and around buildings in so far as they related to plumbing and drainage. It is felt that much good will result from this work.

During the recent cold spell the writer has rendered much assistance on emergency relief from freezing of plumbing and heating systems.

Examinations were made of many oil heating systems relative to changes necessary to change over to coal for fuel and information was gladly given as to how best to convert and obtain necessary equipment for so doing.

Another assignment, new to this office, has been added to the duties of the writer by the Massachusetts Committee on Public Safety namely, that of assisting citizens who may be obliged to close their homes for lack of fuel, in advising how to prevent the freezing of their plumbing and heating installations during vacancy and to assist in every emergency that presents itself.

It may be noted that the routine work of this office has and will change from its regular functions by the addition of other important and essential duties for at least the duration of the present conflict and is prepared and willing to assist in the many phases of conservation of safety and health for which its background of public service and technical qualifications adequately fits it.

Respectfully submitted,

JAMES P. MAHON,
Inspector of Plumbing.

REPORT OF INSPECTOR OF GAS FITTING

*Mr. Thomas J. Moran, Building Commissioner,
Brookline, Mass.*

Dear Sir: — I respectfully submit the annual report for gas fitting and fixture installation for the year ending December 31, 1942.

The total number of applications received was 403, for which permits were issued. Of this number 49 were for new single houses, 18 for new two family houses, 1 for new court house, 21 for offices, restaurants, bakeries, manufacturing and store buildings, 8 for repairs of fire damage where gas pipes or gas appliances had been damaged, 16 for houses, office buildings, garages and stores heated by gas, 290 for remodelling, repairs and additional appliances installed in homes and buildings erected prior to 1942.

All new work has been carefully inspected and tested including all new gas piping, appliances and flue connections. In addition, many inspections were made of old houses and buildings and where defective flue connections, piping or fixtures were found, same were caused to be made safe.

This year as in the past many homes and apartments have been converted into smaller suites where the Zoning and Building Laws permitted. Thirteen single houses were converted into two apartments, two brick single houses converted into three apartments, one brick single house converted into five apartments, three three-apartment houses converted into six apartments, one twelve-apartment house converted into twenty-four apartments, thus necessitating entirely new gas piping and the installation of modern gas appliances.

Due in part to the housing shortage many violations of the Zoning and Building Laws were found where single houses had been altered into two or more suites using gas for cooking, also in lodging houses numerous hot plates and other cooking facilities were found and same were ordered disconnected.

A number of inspections were made of apartment houses where oil was formerly used for fuel but owing to the serious shortage of oil have now been converted to coal. In many of these apartment houses gas meters and service supply cocks have been found to be entirely covered with coal and impossible to reach in case of fire or other emergency. Section 45 of the Gas Regulations reads as follows: — "The access to main cock or meters must not be obstructed by doors, coal, or other material; free access at all times must be had." When this condition was found owners have been notified and corrections made.

Due to the shortage of oil many calls have been received by the writer from people who contemplated using coal or wood appliances in rooms where they have shut off their radiators to conserve oil. Before using these appliances a competent contractor should be consulted as coal or wood burning appliances should not be vented into a gas flue above gas appliances or into a chimney that is now loaded to capacity. This constitutes a serious hazard. This department is ready and willing at all times to make recommendations as to the advisability and methods of making these changes. Property owners are strongly advised not to neglect vent pipes from gas appliances which have become corroded.

During the present crisis with the shortage of skilled mechanics, priorities on all materials and stock and the freezing of all gas appliances it has been necessary for safety to prevent many people from using formerly discarded gas appliances or make-shift emergency gas equipment.

The writer is pleased to again report that there has been no serious accidents caused by gas but regrets to report one case of suicide by gas on March 29, 1942.

Where violations of the gas laws were found owners have been notified and conditions corrected, with the exception of one owner where work was done illegally and whose case is still pending.

The following is a summary of the work done by this department.

New houses — single	49
New houses — two family	18
New Court House	1
Offices, restaurants, bakeries, manufacturing and stores	21
Changes of various kinds and remodeling	290
Fire jobs	8
Houses, stores, office building and garages heated by gas	16
Mercury tests	385

Gas Fired Boilers, Furnaces, Conversion Burners, Heaters

Gas Hot Air Conditioning Systems	1
Gas Hot Air Conversion Burners	1
Gas Hot Water Boilers	3
Gas Hot Water Conversion Burners	4
Gas Steam Boilers	4
Gas Steam Conversion Burner	1

Arthur P. Crosby

Chairman, ex-officio

*Henry R. Shepley

Committee on Finance

Henry Ware
Arthur P. CrosbyHiram Dexter
Chairman, ex-officio

*Resigned

†Elected Trustee on December 14, 1942 to fill vacancy caused by resignation of Henry R. Shepley

Walnut Hills Cemetery

The following are the details of 'the usual' work of the cemetery during the year.

Number of lots sold	15
Number of single graves sold	52
Interments	104
Removals from cemetery	0
Monuments and boulders set	18
Markers set	15
Headstones set	35
Tablets set in boulders	2
Total interments in cemetery to date	4,249
Total lots sold to date	623
Total single graves sold to date	1,399

During the year the lawns, avenues and trees were given their usual care and attention and are in good condition.

A section designated for family lots was graded and seeded to grass. Seven hundred cubic yards of loam were purchased for this purpose.

A new gasoline powered lawn mower, which cuts a sixty inch swath, was purchased in 1942. This reduced the labor cost of caring for the lawns.

No work of resurfacing drives or laying drains was done this year since the necessary materials were not available. The appropriation for this purpose was not used.

A complete report of the receipts and expenditures of the cemetery will be found in the Accountant's report.

Brookline Cemetery

The usual work of caring for the lawns, drives and trees of the Brookline Cemetery was performed. There were three interments and four foundations built for memorials.

HERBERT B. FISHER,
Clerk and Superintendent.

FREDERICK A. LEAVITT,
ALBERT F. BIGELOW,
WILLIAM T. ALDRICH,
ARTHUR P. CROSBY,
HIRAM DEXTER,
HENRY WARE,
Trustees of Walnut Hills Cemetery.

ANNUAL REPORT OF THE TOWN ENGINEER FOR THE YEAR 1942

*The Honorable Board of Selectmen,
Brookline, Massachusetts:*

Gentlemen:—I submit herewith the report of the expenditures and activities of the Engineering Department for the year ending December 31, 1942.

Amount of appropriation	\$49,135 49
Amount of expenditures	45,325 11
Unexpended balance	\$3,810 38

Administration

Knowing that uniformity and regularity are usually non-progressive and that the best administration can never be designed to operate itself, I have introduced the following necessary elements into the Department, which I believe tend to create better administration; namely, Planning, Organization, Staffing, Direction, Co-ordination, Reporting, Accounting, Budgeting, and Courtesy.

Planning: by working out broadly the things that are to be done.

Organization: Having staff conferences to see that operations are running smoothly and by studying our methods to see whether they are economical and practical.

Staffing: Observing aptitudes and abilities, and making specialized assignments accordingly.
Providing pleasant working conditions.
Encouraging assistants to take advanced educational courses so as to become more valuable to the Town.

Endeavoring to provide proper compensation for the personnel, which in turn, furnishes the incentive by which the Town derives a positive benefit.

Direction: Making the flow of authority run smoothly. Encouraging every member of the Department to feel that he is an important adjunct and insisting that all his reports are based on economy and efficiency.

Co-ordination: Seeing that the Department co-operates with every other Department in such manner as to make the work dovetail with the least amount of overlapping.

Reporting: Keeping detailed reports and the cost of all operations for administrative purposes.

Accounting: A system of specialized accounting has been introduced to fit our needs and activities, and to determine whether our designs and methods of construction are economical and practical, by facts and facts alone.

Budgeting: Preparation of budget; forecasting the work and expenditures, controlling the work and expenditures by a charted course.

Courtesy: Every member of the Department endeavors to be friendly and tolerant to the public.

Article XI, Section 1, of the Town By-laws, covering the Engineering Department, requires that all matters covering engineering services or advice come under the jurisdiction of the Town Engineer. The Town is fortunate in having a staff expert in each of the many and varied fields. These services are available to all town departments and boards, and furthermore, they are entitled to these diversified services, and we not only stand ready, but willing to render this service. Therefore, the requests have been so numerous and varied that I shall only cover them in general.

The Town Engineer attended all meetings of the Board of Selectmen, Planning Board, Safety Committee, and all other committee or board meetings where his presence or services were requested or required. He attended a three-day conference on Aerial Bombardment at Northeastern University, and the Convention of the Massachusetts Federation of Planning Boards, at Holyoke, Massachusetts. As a member of a committee, appointed by the Board of Selectmen, he devoted a great deal of time to a study for converting the heating systems in municipal buildings from oil to coal burning.

Town Planning

The Town Engineer is the Secretary and the Engineer of the Planning Board, and the Engineering Department makes the plans, sketches and estimates for all their studies.

Traffic. In spite of the reduced travel by automobile, due to gasoline rationing and shortage of rubber, traffic congestion continues to be one of the major problems confronting municipalities. As soon as materials are available, proposed improvements, which have been developed from past studies,

should be put into effect. Studies of other problems of this nature will be continued and remedial measures developed.

One of the major traffic problems created by the war is the increase in accidents directly traceable to the dimout. Studies must be made to determine some means to overcome this situation. The solution may rest in educating both the pedestrian and automobile driver to take precautionary measures. The use of white or luminous paint for curbstones at cross-walks and street intersections would undoubtedly aid greatly in increasing the safety of night driving.

The completion of the traffic channelization project on Washington Street, at Brookline Village, and the improvements on Beacon Street, from Coolidge Corner to Washington Square, give indications of the great value of such work. These projects are treated at greater length under the heading of Streets.

The Engineering Department made a design for the channelization of Grove Street, between the traffic circle and South Street. A part of this design was the closing of the existing entrance to the drive serving the stores located here, and the construction of a new entrance about 55 feet easterly. The Board of Selectmen granted a permit to the Metropolitan District Commission for this construction, provided that the Metropolitan District Commission would pay the total cost of the work. A second provision was that the design, as furnished by this Department, be carried out in full and to the satisfaction of the Superintendent of Streets. This provision was not observed, since the new drive entrance was not constructed, and a traffic condition that must be remedied is still present. The movement of automobile traffic is interfered with, and, since a bus stop is located at the present drive entrance, an unsatisfactory and dangerous condition exists.

The alteration and widening of Cypress Street, from Washington Street to Boylston Street, should be constructed immediately after the present emergency. Most of the preliminary surveying has been completed and a preliminary design prepared. The Massachusetts Department of Public Works has approved this project as one of the most important to be done under the provisions of Chapter 90 of the General Laws, when that program shall be resumed after the close of the War.

Among the preliminary and final plans that the Engineering Department has worked out are the following:

Alteration and widening at the junction of Brookline Avenue and Washington Street.

Map showing proposed bus route in the southwest section of the Town.

Channelization at the intersection of Clyde and Newton Streets.

Study for layout of future streets in the southwest part of the Town.

Study for the alteration and widening of School Street.

Study for the alteration and widening of St. Paul Street, from Beacon Street to Commonwealth Avenue.

Study for the alteration and widening of St. Paul Street, from Aspinwall Avenue to Francis Street.

Study of channelization at Washington and Cypress Streets.

Map showing location of traffic bottlenecks throughout the Town, which will require immediate attention when materials are available.

Land Development. At the special Town Meeting of October 3, 1939, the Town voted to accept Chapter 41, Acts of 1932 and Chapter 211, Section 81-A, Acts of 1936, of the Massachusetts General Laws. These vested in the Planning Board the duties formerly the functions of the Board of Survey, and became effective after the 1940 annual town meeting.

The Planning Board approved a plan and profile of Cushing Road, so-called, running between Milton Road and Walnut Street.

A study was made for the subdivision of the Shattuck Estate situated on Clyde Street, near Warren Street, consisting of approximately twenty-two acres.

Zoning. Two plans were prepared for changes in the Zoning restrictions. These proposed changes, which were not approved, were as follows:

Lenox Street at Essex Street.

Boylston Street at Catlin Road.

The Engineering Department conducted a survey of vacant stores throughout the Town to determine whether there should be further expansion of the business zone.

Advanced Planning and Budgeting Committee. The Town Engineer is Secretary of this Committee and the Engineering Department makes all the data sheets for the work.

Individual project prospectuses, including estimates of cost, for fifty of the Committee's future planned projects were prepared. These were made for the Public Works Reserve, a Federal Agency set up to formulate a post-war program of public works improvements to take up the post-war industrial slack.

Master Plan. Brookline is in need of a comprehensive Master Plan in order to determine the present, and in particular, the future requirements of the Town by which its proper development may be formulated, regulated and obtained. This general Master Plan for the Town would include the following elements:

1. Master plan for land uses—(Zoning)
2. Master plan for Population Distribution
3. Master plan for Recreation, school distribution, public building sites
4. Master plan for Thoroughfares
5. Master plan for Transportation
6. Master plan for Public Utilities
7. Master plan for Land Property assessed values
8. Master plan for Topography and Geological data
9. Master plan for Areas of Rehabilitation
10. Master plan for Reconciliation of the Brookline Master Plan elements and those of adjacent communities
11. Integration of the Master Plan elements with the long-term program of public improvements

The Town has already completed several of the above master plan elements and much data has been assembled for others, as follows:

A zoning plan and regulations has been in effect in Brookline since 1922.

A traffic survey of the Town was made in 1930 by Robert Whitten, a Town Planning Expert from New York, who was engaged by the Planning Board to make a study of the problem of altering Boylston Street to care for the Worcester Turnpike traffic. The Massachusetts Department of Public Works made a survey in 1940. These studies were made for the purpose of determining primary and secondary traffic routes in Brookline and the solution of other problems incident to traffic movement.

The Committee for Advanced Planning and Budgeting has assembled data and established a long-term program for public improvements.

The Engineering Department has sought since its establishment to accumulate complete data concerning many of the elements vital to the establishment of a Master Plan for the Town's development.

The Department has a topographical plan of the town and much information on geological conditions.

Complete plans of Public and Private Utilities showing size, type and location are in the Department's possession.

Most of the plans of a geodetic plat of the Town have been completed and it is expected that the full set will soon be available and a geodetic map compiled.

The Engineering Department has a complete set of individual land plans and the measurement, location and type of all buildings in Brookline.

An accident spot map is compiled annually.

Further extensive studies must be made, present conditions surveyed and outlined, analyses made, and the results integrated with other local elements and corresponding elements of neighboring communities. From the results of these, the final Master Plan will be evolved.

Geodetic Report. The official Map Survey Project, also known as the Brookline Geodetic Survey, was inaugurated in 1925. The object of this survey was to establish an accurate basis for the plotting of cadastral plans and eliminate the old system which involved much overlapping, and in which each separate plan was an individual plot and bore no relation to any other plan. To accomplish this purpose it was necessary to establish a high accuracy geodetic survey control system. The work was divided into two parts; the geodetic survey, and the location survey. The geodetic work was confined to a horizontal survey, though some preliminary work was done on the vertical, or level system. The geodetic work consisted of triangulation, first order control traverse and second order traverse. The second order traverse was to be, and has to a large extent been run on each street, and supplements the first order control traverse. The second part of the work is the location survey, and comprises the location of street lines and location of property, with the measurement of all buildings.

In 1933 the Lambert projection was adopted for the State of Massachusetts. The U. S. Coast and Geodetic Survey selected the state projection, and prepared the plane coordinate projection tables to facilitate the computations necessary to transfer a point on the earth's surface, defined by geographic coordinates, to an equivalent position on the plane of projection defined by numerical coordinates, developed on the single state system. At this same time a Civil Works Administration Project, known as the Massachusetts Local Control Survey was in operation. The object was to make the Federal System more accessible to cities and towns. Brookline has three Lambert traverse lines; namely, Newton Street, Boylston Street, and Harvard Street, which are all connected to Brookline's plane coordinate system.

The adjustment in the North American datum for this area has been determined, and a correction is applied to the plane coordinates, and a formula has been derived that will transpose them to Lambert coordinates with a favorable degree of accuracy, and from that point the geodetic position can be determined. This has already been done on 75 per cent of the sewer plans and will be extended to all plans made under this system.

Since 1925, the pressure of other work has permitted but limited time on this local project, but much has been accomplished, and it is to be hoped that in the near future much more can be done toward bringing this valuable undertaking to a point where all future plans and maps may be based on this system.

The following is a brief summary of the work accomplished to date: The triangulation work has been completed and is based on the one geodetic control station that was in existence in 1925, and situated on Walnut Hill. The field work on the first order control traverse has been completed, except for some reobservation work. The traverse, which supplements the triangulation, involved eighty (80) miles of ground work, and comprises numerous marked points, many of which are monumented. Final computations have been made and coordinates established. Eighty (80) per cent of the second order traverse is complete and seventy-five (75) per cent of the field work has been done on the location survey. About seventy-five (75) per cent of the Town is covered by a set of new sewer plans based on this system.

Post-War Home Building Expansion. Prefabricated, or packaged houses, turned out by mass production, will probably be a revolutionary post-war change, and offer a serious threat to the status quo of land and home development. It has many ardent and persuasive adherents, united in the belief that such building is the economic and efficient solution of the post-war home shortage. This type of design and construction becomes a matter of vital concern, not only to building, but to land development and municipal planning. Our task and responsibility is to see that this type of low cost construction does not bring forth hit or miss, unplanned, patternless developments, which would destroy and decay our Town. We should strive to obtain more rigid regulations, which will secure for the future our beneficial interests and purposes, and which will also protect the health and welfare of all future developments and structures in Brookline.

National Defense

The Engineering Department, throughout the year, was in closest collaboration with the Local and State Committees on Public Safety. Maps and studies were prepared and copies are

kept on file of various matters concerning vital defense activities, such as the following:

- (a) A location map showing by symbols the position of various buildings, raid alarms, bridges, etc., throughout the Town.
- (b) A plan for a gas decontamination center at the Gymnasium and Bath Building on Tappan Street.
- (c) Post Warden Sector Map
- (d) Warden's Maps for 12 districts
- (e) Two large precinct maps supplied to Draft Board
- (f) A nutrition center spot map
- (g) Plan of typical city block defense
- (h) Plan of Brookline Field for Defense Day Exercises
- (i) Blackout Shutter Plan and Specifications
- (j) Map showing underground channels throughout the Town, suitable for secret movement of troops

The Engineering and Building Departments made a survey of commercial garages and various other buildings to determine their rating for relative safety from nearby bomb hits. The Planning and Technical Division of the Massachusetts Committee on Public Safety has now prepared standard specifications for rating the relative safety of buildings and it will be necessary for the Building and Engineering Departments to do a great amount of work in determining proper shelters and their ratings.

The Engineering Department designed and supervised the construction of adequate and comfortable quarters for the personnel at the Air Raid Warning Service Observation Tower, located on Corey Hill.

Members of the Engineering Department act as assistants at the Report Center located in the Cabot School on Marion Street. From March 18, 1942, to January 1, 1943, the Engineering Department has furnished men for twenty-four (24) three-day periods as attendants at the Center, or a total of 72 man days.

The Town Engineer is Chairman of the Planning and Technical Division of the Brookline Committee on Public Safety, a member of the Planning and Technical Division of the Massachusetts Committee on Public Safety, and Chairman of Region 5 Air Raid Shelter Technical Corps.

At the present time the following members of the Engineering Department are on active service with the Armed Forces, two being stationed in front line areas:

Major Hazen C. Schouman	U.S.A.
Captain Merle M. Sanborn	U.S.A.
Walter A. Bushway, C.M. 1st Class	U.S.N.R.
Staff Sergt. Thomas D. Rourke	U.S.A.
Walter F. Carroll, Seaman 1st Class	U.S.N.R.
Harold E. Barnes, C.C.M.	U.S.N.R.
Pvt. 1 Class Joseph Molloy, Air Force	U.S.A.
Howard M. Bassett, C.M. 2nd Class	U.S.N.R.
Albert B. Forbes, C.M. 2nd class	U.S.N.R.

Sewers and Drains

In anticipation of the proposed alteration and widening of Riverdale Parkway, between Washington Street and the Boston city line, four catch basins have been constructed. The work was done by the Highway Department, under the supervision of the Engineering Department. The outlets for these catch basins were not built.

Seventeen linear feet of broken sewer in Naples Road, and forty feet of surface water drain in a right of way off Loveland Road, were relaid. The work on Naples Road was done by a contractor, while that on Loveland Road was done by the Highway Department. Both pipes were encased in concrete and supervision was furnished by the Engineering Department. The costs were paid from the Highway Department appropriation.

The main surface water drain, which crosses Longwood Playground, collapsed due to failure of the artificial support. The original construction consisted of an 18 inch akron pipe laid on a wooden platform supported by a pile foundation. The Engineering Department has designed a reinforced concrete cap for the existing pile foundation, which was found to be in good condition. The pipe is to be entirely encased in concrete. The construction work is being done by the Highway Department, while the Engineering Department is furnishing the necessary engineering services and supervision. The cost will be paid from the Engineering Department appropriation for surface water drains, and the Highway Department's sewer and drain maintenance appropriation.

Designs and estimates have been prepared for sewers and surface water drains, which must be laid in connection with the construction of Cushing Road and Cotton Street. A surface water drain design and estimate have been prepared for Essex Street Extension, between Ivy Street and Hall's Pond.

A plan and estimate were made for the construction of a sewer and surface water drain in Lyon Road, near Heath Street, running from Arlington Road to the Newton Line. An application was made to the War Production Board at Washington, D. C., for a priority preference rating to obtain the necessary reinforcing steel for the proposed construction. This application was denied. This necessitated the postponement of the construction. An appropriation of one-half the cost of construction will be included in the 1943 sewer and drain budget in order that agreements, now under negotiation, may be obtained and construction started in 1943 if certain critical materials become available. On May 12, 1942, formal entry was made for a taking of land for the construction of a main drain and common sewer in this so called Lyon Road.

Five plans showing areas liable to sewer assessments have been filed in Dedham in connection with the sewer construction in Dale Street, Garardus Avenue, Larkin Road, Whitney Street, Baxter Road, from Hyslop Road to Channing Road, Hammond Street and Hammond Pond Parkway, from Cedar Road to Hammond Pond Parkway, Grove Street near Bellingham Road and Rockledge Road from Intervale Road to Ogden Road.

Apportionment of sewer assessments have been made for four (4) parcels of land.

There have been 366 inquiries regarding sewer assessments, and reports submitted.

Sewer charges or assessments were prepared for seven (7) parcels of land and amount to \$704.93. The assessments, amounting to \$313.80, have not been levied.

There were 22 buildings connected with the public sewers, and 6 with the surface water drains.

Forty-two permits for house connections were issued to licensed drain-layers as follows:

Thomas McCue & Son	16
Fred Love	5
Harry Sklaver	5
Egidio Filippone	5
James Driscoll & Son, Inc.	3
B. F. Quimby & Son.....	3
M. E. Hennessy.....	2
Bernard Malone	1
John Healy	1
David Kidd	1
<hr/>	<hr/>
Total	42

Seventeen of the above permits were for repairs caused by stoppages, 15 from tree roots, and two from other causes. One of the stoppages was found to have been caused by tree roots

entering the connection from the main sewer and the Town accepted the liability and paid the cost of repairs.

Two new sewer plans were completed this year, making a total of 72 sheets completed to date.

The recording sewer gauges operated for the year without any repairs being required.

Tests were made at regular intervals of the concrete used in all construction.

The practice of bridging all excavations in public streets with a reinforced concrete slab is continued, having been found both practical and economical.

Sewer Rentals and Entrance Fees. Under the provisions of Chapter 79, of the Resolves of 1938 of the General Court of Massachusetts, a special commission was created to investigate the system of sewerage and sewage disposal in Metropolitan Boston. The Commission retained the firms of Greeley and Hansen, and Metcalf & Eddy, as consulting engineers to study and report on this problem. The report has been completed and submitted to the Legislature, and involves the determination of the need of suitable methods for abating the pollution of the Charles River and Boston Harbor, and the probable costs of the necessary remedial sewerage construction. These are as follows:

A marginal sewer along the south bank of the Charles River, at an estimated cost of	\$6,200,000
A sewerage treatment plant on Nut Island, at a cost of	\$3,000,000

The Town of Brookline, being located in this district, will be obliged to bear a proportional share of the cost of the projects when constructed, based on the ratio of the Town's valuation to that of the entire district.

Brookline's share will greatly increase the general taxation, unless it is raised by other means. I believe it is only fair that this assessment should be borne by sewer rental charges based on metered water consumption and not by general taxation. Under this system the charges are proportional to the benefits derived, based on the water consumption, and collected periodically. This will reduce the general tax rate. Our regular sewer assessments would serve as an entrance fee.

A report of the American Society of Civil Engineers, issued in November, 1942, shows that twenty-seven states have adopted legislation authorizing sewer rentals, and 676 municipalities are financing sewerage construction and retiring loans with revenue obtained by this method. Massachusetts is one of the states that has adopted legislation of this nature and

many of its municipalities are operating under a sewer rental plan. Some of the neighboring municipalities are:

Brockton
Framingham
Natick

Reading
Wellesley
Woburn

Separation of Sewage and Storm Water. The design of the proposed Metropolitan District Commission's marginal sewer, which provides for certain factors of dilution between the sewage and storm water, may make unnecessary any further separation of the effluent in Brookline's combined low level system in an area comprising about 1,000 acres, between Commonwealth Avenue and Muddy River. However, the main conduit, which parallels the Boston & Albany Railroad from Kent Street to Longwood Avenue, is badly deformed and must soon be rebuilt. Further study is necessary to determine whether to follow the present location, or to leave it entirely and construct the new line or lines on hard, natural ground. Use may be made of the existing foundation for a smaller sewer, and surface water drains may be constructed elsewhere, which would discharge directly into Muddy River. There are other possible methods of solving this problem. However, upon the results of further study to show what may be the most economical and practical solution, depends the amount of sewage and separation work that the Town must undertake in this low level district.

Streets

No new street construction has been undertaken this year: in fact, no street construction was possible, due to the inability of obtaining necessary materials, principally asphalt, and the restriction imposed by federal agencies created to promote the war effort.

A plan of a 50-foot street, to be known as Cotton Street, from Beacon Street to Chatham Street, was approved by the Planning Board. However, since entrance stairs to the new apartment houses on Beacon Street encroached upon the proposed 50-foot layout, the Board of Selectmen could not approve the laying out of the street.

The contract for the alteration and widening of Washington Street, from the Boston Line to the B. & A. R. R. Bridge, which was awarded to the C & R Construction Co. by the Massachusetts Department of Public Works on September 22, 1941, under the provisions of Chapter 90, General Laws, was extended to May 15, 1942. The work under contract has been completed and the results have most certainly justified the design and expense involved. The traffic tie-ups, so frequent previous to the channelization, have been eliminated and

automobile travel proceeds at a normal speed through the Village. The State has paid to the Town \$30,922.21 as its share of the cost of construction. An analysis of the accident record for this section, for corresponding periods, before and after construction, shows a definite improvement since the completion of the alteration and widening.

The contract with Warren Brothers Roads Company, for the alteration and widening of parts of Beacon Street, between Coolidge Corner and Winthrop Road, which was signed September 15, 1941, was practically completed last year. A small amount of work remains to be done. This work involves the use of materials which have been frozen by government order and are, therefore, impossible to obtain. The Town is protected by a bond covering the incomplete work, and this work will be finished as soon as the necessary materials are available. The work, remaining to be done, in no way hampers traffic.

The alteration and widening of Riverdale Parkway, from Washington Street to the Boston Line, which was proposed for this year, was postponed because it was impossible to obtain the asphalt necessary for the road surface construction. Plans and details are in readiness, and the work may be undertaken as soon as the necessary materials are available. A portion of the drainage for this project was completed this year, as described under Sewers and Drains.

The contract for the reconstruction of about 300 feet of Grove Street, near Bellingham Road, which was awarded on October 14, 1941, to Charles Struzziery, by the Massachusetts Department of Public Works, under the provisions of Chapter 90 of the General Laws, was completed May 4, 1942. This reconstruction removes a condition which was a vehicular menace, and a condition particularly dangerous to the 16 and 20 inch Brookline water force mains. The State has paid the Town \$18,077.79 as its share of the cost of the work.

The Traffic Circle at the junction of West Roxbury Parkway and Grove Street, for which this department prepared land taking plans and a grading plan, has been completed. The work was done under a contract between the Metropolitan District Commission and the C & R Construction Co. The total cost of construction will be borne by the State.

The land necessary for the construction of the Traffic Circle was purchased by the Town and released to the Metropolitan District Commission for highway purposes.

Sixty-nine (69) lines and grades were given to private owners for the construction of steps, walls, grading, etc.

Works Progress Administration

The entire time of one assistant was devoted to the supervision of WPA projects, together with much time of survey parties and office personnel in preparing designs and estimates for the work.

The sewer and drain project in Garardus Avenue, between Dale Street and Goddard Avenue, which was temporarily discontinued June 1, 1941, due to the lack of Federal funds, was reopened in January 1, 1942, and completed on June 9, 1942.

A sewer and surface water drain project in Whitney Street, between Dale Street and Clyde Street, was opened January 8, 1942, and completed on April 22, 1942.

A sewer and surface water drain project was started on Larkin Road, between Dale Street and Clyde Street, on February 4, 1942, and was completed May 18, 1942.

Five hundred eleven (511) linear feet of sewer and 555 linear feet of surface water drain have been constructed during the year under WPA.

Unused street car rails have been a menace to traffic in Brookline streets. From time to time rails have been removed in connection with resurfacing projects. During 1942 the urgent demand of the Federal Government for scrap steel to be used in the war effort, gave the Town the opportunity to make a worthwhile contribution for this purpose, and at the same time rid our streets of a serious traffic hazard. Negotiations were entered into with the Boston Elevated Railway Co., who gave Brookline title to the abandoned rails remaining in our streets. A WPA Project was prepared for their removal and approved by the War Production Board, and other interested Federal Agencies.

All remaining rails were removed from Harvard Street, between Green Street and the Boston Line, and Washington Street, between Park Street and Fire Station No. 7. In Boylston Street two rails were removed between High Street and a point just east of Cypress Street.

This rail removal project was in operation from June 29, 1942, until December 7, 1942. A contract, which had been duly advertised, was entered into with the H. Cohen Co., scrap metal dealers of Roxbury, who paid the Town \$11.84 per ton, the price bid. The entire cutting, handling and disposal of the steel rails was done by the Cohen Company, and the excavation and resurfacing of the roadway was carried out by WPA labor, with the Highway Department furnishing whatever skilled labor was necessary. A detailed summary of the rail removal project is as follows:

From Harvard Street, 12,340 linear feet of rails, weighing 222 tons, were removed. The Town received a gross payment of

\$2,627.53 for these. On this project a Highway Department compressor and truck, including labor, were used, costing \$1,705.08. Materials, furnished by the Town, cost \$526.24. The profit to the Town on Harvard Street was \$396.21.

On Washington Street, 4,460 linear feet of rails, weighing 101 tons, were taken up. The Town received a gross payment of \$1,192.64. Highway Department equipment consisting of a compressor, a one-ton truck and a sidewalk roller, including labor, were used on this section, and cost \$890.07. The Town material used amounted to \$135.93. The net profit to the Town on Washington Street was \$166.64.

The rails removed from Boylston Street weighed 82 tons and their length was 3,900 linear feet. Two State-owned compressors, at no cost to the Town, were used in the work. A privately owned compressor and truck were hired, and a town Highway Department sidewalk roller and truck, including labor, were used. The cost of the hired equipment, Town equipment, labor and materials, amounted to \$1,330.93. For the rails, \$977.12 was received, leaving a net loss to the Town in Boylston Street of \$353.81. When it was seen that the loss was steadily mounting, the project was immediately discontinued. Lack of labor, due to the inability of the WPA to furnish the necessary quota of men, together with the inefficiency of the State and hired private equipment, account for the loss.

On Washington and Boylston Streets the openings made for the rail removal were repaved with a Portland cement concrete base and bituminous concrete wearing surface. On Harvard Street the pavement was removed for the entire width of the track area, about 15 feet, and was repaved with a Portland cement concrete base, which will act as a temporary surface.

All the Portland cement and bituminous concrete were furnished by the Federal Government, and all other materials by the Town. When asphalt is again available, the Town will apply a bituminous concrete wearing surface over the cement base on Harvard Street, at an estimated cost of \$3,500.

The net profit to the Town on the entire rail removal project amounted to \$209.04, and a total of 400 tons of scrap steel was contributed to the war effort.

Since 1935, when WPA was first instituted, the following projects have been completed under the sponsorship of the Engineering Department:

- 2.81 miles of sewer construction.

- 2.67 miles of surface water drain construction.

- Grading Baker School grounds on Beverly Road.

- Grading playground and construction of tennis courts at Baker School.

Grading High School grounds on Greenough Street.

Removal of 400 tons of steel street car rails from Brookline Streets.

Highway Department

During the year the Engineering Department has furnished lines and grades to the Highway Department as follows:

17 lines and grades for setting curbstones.

24 lines and grades for sidewalk construction.

Thirty-seven (37) commercial signs were checked for location, size, type, etc., and the results reported to the Highway Department. This aids in keeping these signs in conformity with the regulations governing their erection.

Assessors Department

Thirteen (13) buildings were measured, their cubicle contents computed, and 13 large scale plans made for tax appeal cases. In connection with these cases 22 photographs were taken, films developed and prints made for exhibits.

Seventeen (17) new houses, 8 garages, 3 tool houses and one coal bunker, were measured and located, together with 39 alterations to existing buildings. These have been plotted on the Assessors Plans, and the first floor areas of these buildings, as computed from field measurements, furnished to the Assessors.

Seven hundred and thirty real estate transfers were received from the Norfolk County Registry of Deeds, placed upon the Assessors plans, and the deed abstracts filed.

Nineteen changes in lot lines and areas were received from the Norfolk Registry of Deeds, noted upon the plans, and filed in the Engineering Department's land plan index.

Tax tables were prepared for the Assessors Department.

Two new precinct maps were prepared and furnished to the Assessors Department.

Twenty-seven (27) bound and nine (9) unbound copies of the Annual Assessors Atlas were purchased by the Engineering Department, at a cost of \$300, and distributed as follows:

BOUND COPIES

Assessors	5	Committee on Public Safety.	1
Town Clerk	1	Town Accountant	1
Treasurer	2	Tenement House Inspector .	1
Engineering Department ...	4	School Department.....	1
Building Department	1	Water Department	1
Highway Department.....	1	Fire Department	3
Forestry Department	1	Police Department	1
Town Counsel	1	Tax Appeal Counsel	1
Selectmen's Office	1		

UNBOUND COPIES

Assessors	4	Forestry Department	1
Engineering Department ...	3	Library	1

Building Department

Thirty-four (34) buildings were checked as to their location in relation to street and lot lines in order to determine compliance with the Zoning Regulations. In many cases these buildings had to be rechecked after the first inspection because of additions to the original layout. This checkup is of great value to the property owners, as any violation of the zoning laws relating to the location of buildings may mean that no mortgage will be placed on the property.

One mounted paper zoning map, scale of 200 feet to the inch, was made and furnished to the Building Department.

Town Clerk

The following classification of plans are regularly prepared for the Town Clerk's records, and after being duly attested to by him, are then returned to this department for indexing and filing:

Planning Board approved streets.

Record plans of public ways.

Order of taking plans.

Right of way and easement plans for sewer, drain, water pipe, and street location.

A record plan and an order of taking plan for the alteration and widening of Beacon Street, from University Road to Winthrop Road, were made and approved. Formal entry was made on June 16, 1941, and three stone bounds, marking the taking, were set.

An order of taking plan for the junction of Brookline Avenue and Washington Street was not approved, due to the fact that releases could not be obtained.

Before each election the limits, within which political advertising may not be distributed, are painted on the curbstones adjacent to the polling places, or otherwise defined.

Considerable time was given to the preparation of tally sheets for the recording of the vote in all elections.

Much time was spent on precinct study plans, and in the preparation of the final precinct map, which divides the Town into twelve precincts instead of nine as formerly.

Individual plans of the 12 new precincts were made.

Twelve (12) signs to designate the polling places for the precincts were made.

Park Department

Cost estimates, engineering and field work were furnished to the Park Department as requested.

The Engineering Department made a survey of the Baldwin School Playground for the purpose of locating the boundary lines.

Lines and grades were given on several occasions at the playground in connection with the placing of about one hundred cubic yards of filling which was used for grading purposes. The filling was surplus from the Harvard Street rail removal project. Approximately 75,000 granite paving blocks from the same project were stored at the Baldwin School Playground. These blocks will be used as brow stone in the construction of Riverdale Parkway, and for other Park Department purposes.

A four hundred feet to the inch scale map was prepared showing the areas of public grounds.

Town Treasurer

Descriptions of each parcel of land, together with the amounts involved, were furnished to the Treasurer and Collector for sewer assessments, sewer charges, and street betterments during the year.

Data was furnished in answer to 337 queries regarding sewer assessments and municipal liens.

Health Department

Two cases, where septic tanks are in use on Craftsland Road, were reported to the Health Department. Connections should be made to the sanitary sewer in both of these instances.

An investigation was made of conditions, conducive to the breeding of mosquitoes, on West Roxbury Parkway at the Boston Line. Surface water drainage flows into an open ditch at this point and must continue to do so until the Metropolitan District Commission provides an adequate outlet.

Walnut Hills Cemetery

The Engineering Department, when requested, staked out burial lots in Walnut Hills Cemetery.

A contract and specifications were prepared for the purchase of loam for grading purposes in the Cemetery.

A drainage study and estimate, together with grading plans, were made for parts of Mt. Walley Avenue, Walnut Hills Avenue, Trinity Avenue, and Chapel Avenue, but no construction was undertaken because materials were not available.

Town Counsel

The Engineering Department makes all surveys, prepares plans and takes photographs for legal cases, where claims have been instituted against the Town. Twenty-eight (28) photographs and one plan of this nature were made during the year.

Descriptions were written and releases obtained for sewer, drain and highway improvements.

Members of the Engineering Department attend sessions of various courts to testify in cases concerning the Town.

School Department

The Engineering Department spent much time preparing reports and plans of a study for the removal of the School Department executive offices from their present location in the Town Hall to the Pierce Primary School Building. These reports and plans were turned over to the School Committee, the Building Commission, and the Board of Selectmen, for study.

A map, showing proposed bus lines in the southern part of the Town, was prepared for the School Department.

Six (6) detailed floor plans were made of the Runkle School and Pierce Primary School.

The Engineering Department was called upon from time to time to give data in regard to the relationship of certain buildings to the Town Line in order to settle questions as to the eligibility of children to attend the Brookline schools.

A plan was made for a proposed change in heating pipes at the Baldwin School.

Police Department

The Engineering Department regularly furnishes the Police Department with plans prepared for the prosecution of parking cases where regulations have been violated and plans are prepared for automobile accident court cases.

Four (4) maps of 800 feet to the inch scale and two of 400 feet to the inch were prepared showing the Police Alarm System throughout the Town, after surveys were made to determine its location.

A traffic map showing one-way streets, scale of 400 feet to the inch, is in preparation for the Police Department.

Bids were canvassed for the driving of an artesian well at the outdoor Pistol Range, located in Dedham on land owned by the Brookline Water Department. Plans for a septic tank for the Range were also made.

An estimate was made of the cost of repainting the Police Department quarters, to be done as a WPA Project.

Fire Department

The Engineering Department made location surveys of the fire alarm system throughout the Town, and prepared 18 maps of 800 feet to the inch, and 2 of 400 feet to the inch scale, showing the locations of the system.

Schedules were compiled of the fire fighting equipment located in the districts which, together with Brookline, comprise that division of Massachusetts known as Defense Region 5, and a map of the Region was made showing the limits of the districts.

Information Desk

The Engineering Department maintains an information counter in its main office. It is the earnest endeavor of all assistants to give prompt, courteous and accurate information in response to the many and varied inquiries of the public. The highly efficient system of cross indexing in use in the department makes it possible to disperse information with the least possible lapse of time.

Private engineers and surveyors may avail themselves of information concerning size and location of individual house lots, street lines and grades.

There were many inquiries and applications during the past year, which are as follows:

- 27 House numbers assigned to buildings
- 67 Inquiries by private engineers pertaining to street lines, etc.
- 3 Inquiries regarding street grades
- 19 Inquiries regarding street locations
- 19 Inquiries regarding street lines
- 30 Inquiries regarding lot lines
- 14 Inquiries regarding sewer locations
- 28 Inquiries regarding sewer connections
- 7 Inquiries regarding street betterments

There are on file approximately 6,700 land plans of separate properties in the Town.

Where available, data concerning geological formations, is given out.

Numerous inquiries of a general nature relating to highways, parks, zoning, buildings, land elevations, etc., are answered daily over the information desk and telephone.

General

Wash Borings. Wash borings to determine the underlying sub-soil conditions were made along the line of proposed construction for the surface water drain outlet in Essex Street Extension, between Ivy Street and Hall's Pond. By means of the samples taken, it was possible to determine the necessary type of construction and the most economical design. The samples were retained and placed on file.

Laboratory. At present tests of materials used in construction are made for the Department by private laboratories. This is most unsatisfactory. Delay is caused by having these tests so made, when time is most important in learning the results of the analyses. The department should have a laboratory of its own. This would create efficiency, and would save the Town much of the cost now expended for this work.

Town Maps. Maps showing the boundary lines of the new precincts were prepared and distributed to the various town departments.

Inventory. An inventory of the property belonging to the Town in the Engineering Department's possession is on file.

House Numbers. A canvass of all house numbers issued is made from time to time, and notices sent to owners of buildings who have not affixed the assigned numbers to their buildings. Twenty-seven new house numbers were assigned during the year 1942.

Equipment. The equipment in the possession of the Engineering Department is in good repair and functioning properly.

The Aneroid Barometer, outside and inside recording thermometers, and wind vane have been found to be of great value and especially now that weather reports have been curtailed because of the war conditions. Weather conditions are charted daily and the various town departments avail themselves of this information.

Extensive renovations and alterations were made in the quarters of the Engineering Department. The result has been most gratifying, and it is felt that the natural increase in efficiency from these improvements, which were done in a most economical manner, have justified the cost.

Underground System. Much work remains to be done to bring the records of the underground structures up to date. Many completed surveys are ready for plotting, but as there is much other work that of necessity must take precedence over this, little time has been available to devote to the underground plans during the year.

The Boston Consolidated Gas Company, the Boston Edison Company, and the New England Telephone and Telegraph Company supply the Engineering Department with a copy of all their plans, showing locations of the underground structures.

The Department has approximately 1,000 of these Public Utility drawings on file. These plans are of invaluable assistance in solving problems which arise in assigning locations for water pipes, gas mains, sewers, surface water drains, electric and telephone conduits. Were it not for these plans, there would be much difficulty in determining the location of the public utility conduits in the Town's highways. It is hoped that time may be available in the future so that the work in this field may be enlarged, and that plans will be available covering the entire Town. All electric, telephone, police and fire alarm wires should be underground for the protection of public and private property. This would tend to raise property values and would be an excellent defense measure. All possible steps should be taken by the Town to accomplish this end.

Tables. Tables relating to streets, sewers, drains, miscellaneous information and meteorological data are appended to this report.

Photography. In connection with the office renovations a dark room was constructed in the Instrument Room on the first floor of the Town Hall Annex. This has long been needed, and will effect a considerable saving in the cost of this work. The department continues to take photographs to supplement our records and reports. An enlarger, projector, screen, and several minor items were added to the photographic equipment.

Seventy-two (72) large pictures were taken, developed and prints made. Several small pictures were taken and some were enlarged with the new equipment. A new fast F2 lens was purchased for use with the Leica camera.

Legal Index. An index of legal opinions that have been rendered in cases pertaining to matters involving the work of the Department has been completed. This index should be of very great value in the future when other problems of this nature occur.

Miscellaneous. The Board of Selectmen appointed a committee to study the policy of constructing house sewer and drain connections. The committee requested this department to perform most of the work involved in the study. An extensive report was prepared on the subject of continuing the policy of constructing, by licensed drain layers, all sewer and surface water drain connections to private buildings. Sewer

and surface water drain connections have, for some time past, been constructed of extra heavy cast iron pipe, but manufacture of this type of pipe was ordered discontinued by the War Production Board early in the year. To cope with this, the regulations for constructing sewer and surface water drain connections were rewritten, proposing a type of construction similar to that used for our main sewers and drains; *i. e.*, akron pipes encased in concrete. It was also proposed that the water services to buildings and other utility service pipes be laid in the same trench as the sewer and drain connections, and be bridged over with a reinforced concrete slab. This would eliminate the disturbance of much of our street surface caused by the former policy of a separate trench for each utility, and, in the case of water services, save the Town approximately \$18,000 per year. A comprehensive study was also made of the Building Law to provide for further recommended changes in the matter of sewer and drain connections. The proposed changes, as contained in this part of the report, will promote better health conditions in and around buildings. I strongly recommend the adoption of these proposed changes at the next Town Meeting.

The Selectmen requested the Town Engineer to investigate the feasibility of relocating some of the town department offices. The Engineering Department prepared alternate plans, reports, and estimates of cost for this purpose. One of the proposed changes recommended moving the Selectmen's offices to the rooms vacated by the Municipal Court in the Police Station Building, and the rearrangement of certain other department offices on the first and second floors of the main Town Hall Building. A study, with plans and estimates of cost, was also made for the removal of the Public Welfare Department from the Main Library Building to the Police Station Building. A WPA Project for this work, based on these plans, which were approved by the Board of Selectmen, was prepared and submitted for approval, but because of the contemplated discontinuance of this Agency, this work, if undertaken, must be done through some other medium.

The Engineering Department designed and made plans for Honor Roll boards to display the names of those in the armed forces, and to be erected on the Library grounds on Washington Street. This work was done at the request of the Committee appointed by the Selectmen. The plans and specifications were accepted by the Committee, and a contract was prepared and bids canvassed for the erection of the Boards. The contract was awarded to Charles R. Burns, of Brookline. The strips bearing the names were lettered by the Engineering Department. The Honor Roll, together with the National Colors and a Service Flag, were dedicated on November 11, with appropriate ceremonies. At present 3,321 names are on

the Boards, with provisions for about 5,000. Monthly additions and readjustments of the names on the Boards will be made by this department. The flags and flagpoles adjacent to the Boards were donated by the Kiwanis, Rotary and Lions Clubs. A fence to enclose the Boards was designed and specifications for the same drawn up, but the erection has not been undertaken as yet.

Automobiles. The department is in possession of five Ford automobiles, ranging in age from four to eight years. The mileage traveled varies from 16,000 to 43,000 miles, depending upon the age and use of the car. The use of these cars is necessary by the field parties and other members of the Department, in conducting surveys, inspection of old and new sewer connections and mains, field work and all other work demanded of them. Three of the cars are now engaged in the investigation being performed for the Committee to Investigate Health and Safety Conditions In and About Buildings. The use of a car is granted to David Wright, Custodian of Town Property.

Investigation of All Health and Safety Conditions In and About Buildings. At the request of the Fire Commissioner, the Board of Selectmen appointed a Committee to investigate health and safety conditions in and about buildings. This committee consists of the following:

S. R. Allen, Chief of Fire Department, *Chairman*

T. J. Moran, Building Commissioner

James W. Tonra, Chief of Police

G. O. Tapley, Acting Tenement House Inspector

S. P. Townsend, Town Counsel

W. A. Devine, Town Engineer, *Secretary*

The opinion of the Committee was that the number of men available in any one department would be inadequate to make all the inspections expeditiously. Consequently, the co-operation of several departments; namely, the Engineering, Fire, Health, Police and Water Departments, was sought, and men from each were assigned to the investigation.

The first classification of buildings to be inspected was that of Boarding Homes for Aged or Convalescent Persons. Questionnaires, to be used in obtaining the essential survey information, were prepared by the Engineering Department. These questionnaires containing the results of the inspections were returned to this department. Necessary computations of cubical contents were made, the reports analyzed, and five typed copies made of each Report. The remedial measures, recommended to correct conditions at variance with building, health or safety regulations, were listed upon prepared forms.

These were then submitted to the Committee, which sent notices to the owners, listing necessary corrections, and notifying them that a further inspection would be made at the expiration of a 15-day period to ascertain if compliance with the recommendations had been made. If these notices are disregarded the license is subject to revocation.

At present, inspections are being made of all lodging houses throughout the Town, and the Committee has voted to inspect all mercantile and business buildings upon the completion of the lodging house investigation.

The Engineering Department has five men engaged full time in this work and two men part time typing reports. Much valuable assistance has been rendered in typing by volunteers from the Women's Division of the Brookline Committee on Public Safety.

The names of the assistants and their classifications are as follows:

Ralph A. Doane	First Assistant Engineer.
Oren M. Moulton	Second Assistant Engineer.
John Forbes	Designer, Streets, Sewers and Drains.
James J. Moran	Designer, Structural.
Arthur E. Spooner	Town Planning, Traffic, Public Information, Defense, Draftsman.
Arthur E. Clasby	Supervisor of W. P. A., Senior Inspector.
Harold D. Grant	In charge of Sewers and Street Assessments, Street Construction Detail, and Contract Plans.
Carleton Parker	Senior Draftsman, Photographer.
Arthur D. Martin	Inspector in charge of Sewer and Drain Connections, and General Construction.
George L. Jackson	Chief of Party, Office Calculations.
*Merle M. Sanborn	Inspector of Streets, Water and Sewer and Drain Construction, Office Calculations.
*Hazen C. Schouman	Chief of Party.
Mildred F. Smith	Secretary to Town Engineer, Correspondence, Indexing and Accounting.
*Howard W. Bassett	Chief of Party, Office Calculations.
†James J. Bain	Chief of Party, Office Calculations.
*Harold E. Barnes	Inspector and Draftsman.
*Walter A. Bushway	Inspector and Draftsman.
*Albert B. Forbes	Instrumentman.
†John N. Squarebrigs	Instrumentman and Rodman.
*Joseph T. Molloy	Rodman and typist.

Temporary Assistants:

†James E. Wallace	Rodman	Sept. 4, 1941 to March 11, 1942.
*Walter F. Carroll	Rodman	Sept. 19, 1941 to May 6, 1942.
*Thomas D. Rourke	Rodman	Sept. 25, 1941 to March 11, 1942.
John E. Guillothe	Rodman	May 27, 1942 to June 9, 1942.
		Sept. 14, 1942 to Sept. 26, 1942.
Frederick P. Young	Rodman	June 4, 1942 to June 27, 1942.
Frank Harrington, Jr.	Rodman	June 22, 1942 to Sept. 2, 1942.
		Dec. 14, 1942 to Jan. 11, 1943.
Edmund J. Burke	Rodman	July 2, 1942 to Aug. 1, 1942.
		Dec. 14, 1942 to Jan. 11, 1943.

James McIntosh	Rodman	July 9, 1942 to Sept. 23, 1942.
Joseph Norris	Rodman	Sept. 29, 1942.
Thomas F. Mahon	Rodman	Oct. 1, 1942.
D. Vincent Coffey	Rodman	Oct. 22, 1942 to Oct. 31, 1942.
Irving C. Brownell	Rodman	Nov. 11, 1942.

*Entered U. S. Army or Navy.

†Resigned for employment with U. S. Engineers Corps.

I take this opportunity to express my appreciation of the co-operative spirit shown by my assistants, the various municipal boards, officials and departments.

Respectfully submitted,

WALTER A. DEVINE,
Town Engineer.

Miscellaneous Data Relating to Brookline, 1942

Area of Town	4,362.5 acres or 6.81 sq. miles
Extent of Town, northeast and southwest	4.37 miles
Extent of Town, northwest and southeast	1.93 miles
Area of Public Grounds (9.06% of Town)	395.10 acres
Area of Metropolitan Park (1.68% of Town)	73.2 acres
Area of Water Surface (.80% of Town)	35.0 acres
Area of Land Assessed (70.38% of Town)	3,070.33 acres
Length of public streets accepted by the Town	86.49 miles
Area of public streets equals 12.09% of Town	527.55 acres
Length of public paths	5,115.00 feet
Length of State highway (Boylston Street)	2.75 miles
Length of Metropolitan Park roadways:	
Hammond Pond Parkway	
West Roxbury Parkway	
Veterans of Foreign Wars Parkway	2.30 miles
Length of Sanitary Sewers in Brookline	104.00 miles
Elevation of summit of Arlington Road Hill	245.00 feet
Elevation of summit of Aspinwall Hill	244.00 feet
Elevation of summit of Corey Hill	265.00 feet
Elevation of summit of Fisher Hill	260.5 feet
Elevation of summit of Hook's Hill (adjacent to Newton Street and Mt. Walley Avenue)	315.00 feet
Elevation of summit of Single Tree Hill (highest point of land in Brookline)	359.00 feet
Elevation of summit of Walnut Hill	315.00 feet
Elevation of summit of Wolcott Road Hill	290.00 feet
Lowest elevation at Beacon Street and St. Mary's Street	17.00 feet

Zoning By-law of Brookline became operative June 24, 1922

Brookline Public Libraries:

- Main Library — Washington Street near the Town Hall
- Branch Library — Pleasant Street near Coolidge Corner
- Branch Library — Heath Street, in Baldwin School Building
- High School Library — Greenough Street
- Deposit Station — 1611 Beacon Street

Brookline Fire Stations:

- Station 1 — Village Square
- Station 2 — Washington Street, opposite Police Station
- Station 3 — Monmouth and St. Mary's Streets
- Station 4 — Boylston Street and Reservoir Road
- Station 5 — Devotion Street
- Station 6 — Hammond Street, near Horace James Circle
- Station 7 — Washington Street, near Washington Square

Brookline Municipal Golf Course (public) — Newton Street

Number of plans showing division of real estate in Brookline, on file in office of the Town Engineer	6,700
Total number of plans on file in Engineering Department, about	25,350
Total number of index cards in Engineering Department, about	105,700

REPORT OF THE HIGHWAY DEPARTMENT

January 15, 1943.

To the Honorable Board of Selectmen:

Gentlemen:—I respectfully submit the annual report of the work done and expense incurred in the Highway Department for the year ending December 31, 1942.

The amount appropriated at the annual Town Meeting for the support of Highways was	\$255,038 00
Amount expended	203,329 01
Balance unexpended	\$51,708 99

Receipts

Street openings	\$1,683 43
Permits	228 50
Gas tax refund	493 41
Sale of scrap metal	2,456 55
Miscellaneous	247 27
	<hr/>
	\$5,109 16

On December 7, 1942, Mr. Arthur A. O'Shea, who has served this department efficiently as Cost Accountant since June, 1925, was appointed to the position of Administrative Agent for the Board of Selectmen. The best wishes of the department go with him, coupled with confidence that he will continue to perform the increased duties of his new office in an acceptable manner.

On April 27, 1942, the Department of Wires and Lights was reorganized and the division of street lights was assigned to this department.

The Roll of Honor of the department contains the following names:

Joseph F. Connors
 John Kilgallon
 William Mahoney, 2nd
 Thomas Melville
 Joseph Schneekloth
 John Higgins
 Philip Russell

In addition to the above Leo Griffin resigned to enter defense work.

The following table of appropriations for the past ten years furnishes convincing evidence that this department has made a determined effort to reduce expenditures. During the past year work has been drastically curtailed, as shown by the unexpended balance of \$51,708.99.

Year	Appropriated	Expended	Unexpended
1932	\$328,071 00	\$292,887 89	\$35,183 11
1933	288,442 00	287,628 17	813 83
1934	316,982 00	305,250 50	11,731 50
1935	349,752 00	332,593 30	17,158 70
1936	326,216 00	326,178 33	37 67
1937	269,809 00	265,235 48	4,573 52
1938	355,581 64	355,581 64
1939	298,307 00	291,080 08	7,226 92
1940	308,018 00	307,557 92	460 08
1941	292,751 00	276,487 89	16,263 11
1942	255,038 00	203,329 01	51,708 99

Welfare Labor

The welfare labor assigned to this department during 1942 amounted to only \$1,487.25 which is \$3,333.75 less than for 1941. For the past two years there has been a substantial reduction in this item due to the increased opportunity for work in private industry and war work. The following is a schedule of labor assigned to this department since 1932, on the basis of \$4 per 8-hour day.

1932	\$22,017 00
1933	23,528 00
1934	8,304 50
1935	11,118 75
1936	12,718 75
1937	12,780 25
1938	14,061 76
1939	15,066 00
1940	11,714 50
1941	4,821 00
1942	1,487 25

The distribution of welfare labor for 1942 is as follows:

Sanitation		
Collecting ashes	\$184 00	
Collecting paper	65 50	
		<hr/> \$249 50
Sidewalks		
Gravel walks	\$70 50	
Granolithic	4 00	
		<hr/> \$74 50
Highways		
Cleaning	\$410 00	
Cutting grass	202 00	
Snow removal	348 75	
		<hr/> \$960 75
Other Departments		
Forestry	\$84 00	
Garbage	118 50	
		<hr/> \$202 50
Total		<hr/> \$1,487 25

Civilian Defense

Civilian Defense activities were a very important part of the work of the department during the past year. Every effort has been made to co-operate to the fullest with national, state and local agencies. The writer was appointed a member of the Brookline Committee on Public Safety, Local Chairman of the Division of Services and Supplies, Blackout and Dimout Officer of the Town, and member of the Salvage Committee in charge of operations. These activities have necessitated much additional work for the department and the spirit of co-operation shown by the employees has been a source of great satisfaction.

Stephen E. Burke, John F. Burns and Henry Schmidt have attended training courses at the Report Center, answering all Blackout and Air Raid alarms, and are assigned to supervisory work in Services and Supplies. John G. Gerrish was appointed Deputy Chief of the Auxiliary Fire Department, and fifteen men have completed training for this work. Patrick Collieran is in charge of a division of men who have completed a twenty-week course in Demolition and Rescue Work. Six men received certificates in First Aid Courses. One man covers the Report Center for approximately sixty hours per month.

On January 1, 1942, Arthur A. O'Shea was appointed Executive Secretary of the Rationing Board and until the Board moved to its present quarters at 1295 Beacon Street on May 18, 1942, all the work was carried on from this office with a resulting increase in the volume of telephone and personal calls. The division of Tire Rationing continued in this department until December 1, 1942.

Since the beginning of the year much time has been devoted to preparation for emergency Blackouts, working in co-operation with the Massachusetts Department of Public Safety, the Brookline Police Department, Brookline Committee on Public Safety, Auxiliary Police and Air Raid Wardens. Arrangements were made with the Boston Edison Company, the Welsbach Street Lighting Company and other public service corporations to extinguish their lights immediately on the sounding of all alarms, and householders were educated for their duties through the local press. Trial Blackouts were held on March 19 and 31, June 14, September 8 and December 15 with increasing success, showing that the Town is now well organized. All preparatory and follow-up work on violations was carried on through this office until November when an arrangement was made to have this work done by the office of Civilian Defense.

On May 3, 1942, Dimout Regulations were issued by the U. S. Army Headquarters, 1st Service Command, and on

July 7, Executive Order No. 31 was issued by Governor Saltonstall ordering the following lights blacked out:

1. All outside advertising signs and outside lights on commercial premises.
2. All lights of any kind in store windows.
3. All outside lights on private property, such as lights on porches, entrances and courtyards.

Street and traffic lights were ordered minimized. As a result of this order fourteen street lights in Brookline Village were discontinued on May 27 for the duration and shields were installed on all electric lights and the globes of all gas lights were painted. The total expense of this work was borne by the lighting companies. To enforce these regulations required constant supervision and check-up on the part of the writer, the Inspector of Street Lights, the Police Department and the Civilian Defense Committee.

In November much stricter orders were issued by the Army and covered by the Governor's Executive Order No. 40 requiring all householders to draw their shades, all store lights to be screened, and all street and traffic lights reduced to a minimum. Two street lights have been discontinued at Washington Square, several have been reduced in power, and all traffic signals have been masked, leaving only a 35 degree opening in each lens. The present modification of lighting has been under constant inspection by the Army and relatively few violations have been reported.

In August a drive was started for the collection of scrap iron and metal, culminating in an all out door-to-door campaign during the weeks of October 5, 12 and 17. Approximately 275 tons of metal were collected and sold to the Roxbury Iron and Metal Company and \$2,456.55 was turned into the Town Treasury. On Sunday, September 27, a Monster Rally was held at Tech Field, and on that day the department trucks collected huge quantities of scrap and joined the Salvage Parade to Tech Field.

Since August the department has been collecting prepared tin cans every week on the regular collection day. Forty-five tons have been collected, hauled to freight cars in Watertown and shipped to the Vulcan Detinning Corporation in Pennsylvania. The government estimates that we should collect one ton of tin monthly for every thousand inhabitants. We have fallen far short of this amount and effort should be made to require householders to prepare their tin cans as required, for those put out unprepared are taken to the open dump and lost to the war effort.

The department has furnished labor and equipment in connection with the removal of rails on Harvard Street

between Green Street and the Brighton line, on Washington Street between Park Street and the Fire Station, and on Boylston Street from High Street to Hill's Garage. This work was done as a W. P. A. project under the direction of the Engineering Department.

The department has also assisted the Civilian Defense Committee in such ways as transporting furniture for the Draft Board, furnishing labor and material in setting up the Rationing office, preparing accommodations for the Canning Kitchen in the old Fire Station on Heath Street, building exhibits for bombing demonstrations at Tech Field, furnishing sand for Air Raid protection, making signs for the Nutrition Center and building equipment for the Canteen.

The following is a statement of expenditures in connection with the above-mentioned activities.

Salvage	\$2,164 23
Sand for Civilians	569 72
Sheds at Tech Field	527 10
Canteen	431 71
Report Center	173 62
Training School	153 26
Blackout	128 64
Nutrition Center	55 45
Canning Kitchen	35 95
Miscellaneous	32 58
	<hr/>
	\$4,272 26

Street Cleaning

Labor	\$40,490 08
Rental of town trucks (including mechanical sweeper)	5,493 06
Brooms, push carts, rakes, etc.	1,214 95
	<hr/>
Total	\$47,198 09

The Elgin mechanical sweeper was operated on double shift from May until December and continued to give excellent results, altho some difficulty was experienced in obtaining necessary brooms and mechanical parts. The general spring cleaning after the snow and ice, and the removal of leaves in the fall continue to be a large part of the above expenditures.

Removal of Snow and Ice

Labor	\$24,251 04
Labor, temporary	1,263 48
Rental of trucks	8,155 03
Rental of town trucks	5,894 10
Rental of horses	1,800 00
Repair and maintenance of equipment	5,678 31
Sand	1,843 47
Calcium chloride and salt	926 24
Property damage	23 41
	<hr/>
Total	\$49,835 08

The total precipitation of snow for the year 1942 was as follows:

January 4.....	8 inches
January 10.....	4 inches
February 15.....	6 inches
February 28.....	5 inches
March 14.....	6 inches
March 30.....	2 inches
April 11.....	2 inches
December 13.....	4 inches
December 16.....	1 inch
December 18.....	3 inches
<hr/>	
41 inches	

Although the amount of snow in 1942 was practically the same as in 1941, there were no storms of extraordinary severity, and I am glad to report a decrease of \$27,105.29 in the expenditure from that of 1941. This is the first year it has been possible to show the normal saving effected by the policy adopted in 1940 of not shoveling sidewalks in the residential districts. On account of the present shortage of manpower and the great need for economy, this would seem to me an opportune time to consider the advisability of adopting a by-law requiring property owners to remove the snow from in front of their own property. This practice is followed in most of the neighboring communities, and I am of the opinion that the adoption of such a regulation would prove advantageous to the tax payers and residents of the town.

As recommended in my report for 1941, the by-laws of the town were amended at the annual meeting in March giving the Superintendent of Streets power to remove any vehicle parked in such a way as to interfere with the work or removing snow.

The usual policy of plowing all roadways and sidewalks and removing snow from business areas has been continued but the removal of snow from several narrow roadways has been curtailed in the interest of economy.

As in former years the Boston Elevated Railway Company has furnished two Barber Greene snow loaders for use on thoroughfares over which its buses operate.

Roadways

Labor.....	\$8,404 17
Asphalt	2,361 63
Stone	723 87
Rental of town trucks	925 00
Small tools	446 70
Lumber	84 59
Kerosene	43 46
Paints, lead, etc.	24 71
Coal	26 64
Contract Work	153 01
<hr/>	
Total	\$13,193 78

Because of governmental restrictions on bituminous material, no reconstruction, resurfacing or flushcoating of roadways was done during the past year. In September requisitions were granted for 9,000 gallons of tar which was used for patching and repairing disintegrated surfaces by what is known as the painting method. At best this is only a temporary measure and every effort will be made to secure sufficient material in 1943 to give many of our streets a surface treatment of tar or asphalt.

The contract for the alteration and widening of Washington Street at Brookline Village was completed early in the season, and the iron fence, ordered in 1941, was erected in the center island from the railroad bridge to the town line. On account of war conditions nothing was done towards beautifying the traffic circle at the intersection of Washington Street and Brookline Avenue. A flagpole was donated to the town for this location by Mrs. Katherine Lapham Honeywell, and the foundation was constructed during the past season, but owing to labor conditions it was impossible to have the pole set.

Traffic Control

Labor	\$5,213 86
Rental of town trucks	1,250 00
Sign maintenance	1,160 44
Cement and pipe	174 65
Traffic Lights	185 46
Total	<u>\$7,984 41</u>

On account of the rationing of gasoline and rubber during 1942, the volume of automobile traffic was materially reduced and, accordingly, there has not been the usual activity in traffic control. Relatively few traffic problems have been referred to the Traffic Committee and few important changes have been made in the Traffic Regulations.

War priorities prevented the installation of any new traffic signals, and, therefore, the pedestrian signals for Beacon and Harvard Streets, as recommended in my report of last year, have not been installed. On order from the U. S. Army parking facilities were provided for the First Corps Area in the vicinity of its headquarters on Amory, Dummer and Essex Streets. Petition from the Boston and Elevated Railway Company for a new bus line to run over South Street between the Boston-Brookline line and Asheville Road in either direction was approved in April and is now in effect.

On May 27 all traffic lights were turned to "flashing" from midnight until 7 A. M., and on November 27, in accordance with Executive Order No. 40 relative to Dimout, all traffic lights were masked and several turned to continuous "flashing"

operation. The following schedule, as recommended by the State Department of Public Works, is now in effect.

Left on normal schedule but masked.

Pre-timed — Automatic

Beacon and Washington Streets
 Beacon and Harvard Streets
 Beacon and St. Paul Streets
 Longwood Avenue and Chapel Street
 Longwood Avenue and Kent Street
 Washington, Harvard and Kent Streets and Davis Avenue
 Mountfort and Carlton Streets
 Washington, School and Cypress Streets
 Harvard and School Streets and Aspinwall Avenue
 Longwood Avenue and St. Paul Street

Fully actuated

Washington, Boylston and High Streets
 Beacon and Carlton Streets

Semi actuated

Beacon Street and Summit Avenue

Manually operated

Fire stations at
 Washington Street at Thayer Street
 Washington Street near Beacon Street
 Hammond Street

Turned to flashing but masked.

Beacon Street and Dean and Corey Roads
 automatic between 4:45 and 6 p.m.
 Beacon and Kent Streets
 automatic between 7:45 and 8:30 a.m.
 Pleasant and Freeman Streets
 automatic between 7:45 and 8:30 a.m. and 12:30 and 1:30 p.m.
 Aspinwall Avenue and Kent Street
 Cypress and Kendall Streets

Care of Yards and General Maintenance

Labor.....	\$15,231 87
Other	51 18
Telephone	57 38
Electricity.....	14 09
Rental of administration car	950 00
Coal	46 80
Hardware	2 40
Cement	81 58
Lumber	99 86
Stone and gravel	99 96
Other — Cinders and asphalt	345 12
Total	\$16,980 24

Labor and trucking in the amount of \$1,251.01 has been furnished to the Town Clerk for setting up election booths and voting machines, servicing voting machines, maintaining bulletin boards, etc., and has been charged to the proper appropriations.

General Expenses

Sick leave	\$5,030 81
Holidays	22,693 83
Vacations	8,088 01
Pensions	16,299 15
Physicians	70 00
	<hr/>
	\$52,181 80

Garage

Superintendent of Equipment	\$3,900 00
Labor	12,441 53
Telephone	182 91
Postage	25 00
Electricity	1,050 88
Gas	43 55
Rental of town trucks	500 00
Heater repairs	889 85
Motor equipment maintenance	10,299 37
Coal	1,396 99
Fuel oil	1,486 00
Gasoline, oil and grease	12,075 36
Small tools	163 75
Tires	2,011 62
Other	1,384 59
Other — office supplies	25 45
Registrations	198 00
New machine tools	171 35
	<hr/>
Total	\$48,246 20
Transfer — use of trucks	\$48,246 20

It has been the policy of the department to replace a certain amount of worn-out equipment each year but on account of restrictions on the purchase of motor equipment, it has been impossible to purchase any new equipment during the past year. This will necessitate a much larger expenditure for new equipment when the government restrictions are removed. The cost of maintaining motor equipment has been kept to the lowest level possible and no major overhauling jobs have been done. In November the heaters in both garages at the Cypress Street Yard were converted from oil to soft coal.

Administration

Superintendent	\$4,000 00
2nd Asst. Superintendent	3,500 00
Cost Accountant	2,841 74
Clerks	4,816 50
Extra Clerk	3 34
Expressage	14
Telephone	359 49
Postage	50 00

Water	\$12 00
Printing.....	54 40
Magazines.....	6 75
Stationery, stencils, duplicating paper.....	311 25
Total	<hr/> \$15,955 61

New Streets and Widenings

Under the provisions of Chapter 90 a section of Grove Street east of Bellingham Road was reconstructed under the direction and supervision of the State and the Town Engineering Department. A traffic circle was constructed at the intersection of Grove Street and West Roxbury Parkway by the Metropolitan District Commission.

Bridges

No work was done on bridges during 1942. The Boston and Albany Railroad has notified us of certain spauling-off of concrete on the Cypress Street bridge, and arrangements are being made to have the necessary work done during the coming year.

Pensions

I regret to report the death of the following named employees of the department.

William Burns
 John Donnelly
 Thomas Messitt
 Thomas Murphy
 Michael Dasey, pensioner
 Ralph Langdon, pensioner
 Michael McAdams, pensioner
 John McNulty, pensioner
 Daniel O'Brien, pensioner
 John Sherry, pensioner

Three new members were added to the pension list, namely:

Daniel O'Brien, died September 8, 1942
 William J. Norton
 Daniel O'Connor

This leaves a total of twenty names on the list of pensioners.

Permits

During the year 1942 there were only 750 permits issued as compared with 1,233 for the year 1941. This was due to the great decrease in building and curtailment of work by

public service corporations. The following is a statement of permits issued:

For occupying streets for building purposes for which a fee of \$15 a month was charged amounting to \$60.00	4
For occupying streets for other purposes: erecting canopies, ladders for painting, etc.	48
For crossing sidewalks	34
For excavating:	
Sewer Connections	29
Boston Edison Company	71
Boston Consolidated Gas Co.	190
New Eng. Tel. & Tel. Co.	19
Brookline Water Department	185
Miscellaneous	16
	<hr/>
	510
Overhanging signs	154
	<hr/>
Total	750

Sidewalks

The amount appropriated at the annual town meeting for sidewalks was	\$51,302 00
Total amount expended	25,896 53
	<hr/>
Balance unexpended	\$25,405 47

The expenditure of \$25,896.53 was distributed as follows:

Labor	\$16,888 91
Auto mileage	355 83
Rental of town trucks	2,750 00
Nails	46 94
Cement	1,414 30
Lumber	870 90
Stone and sand	945 85
Edgestone	657 74
Other — asphalt, grass seed, cinders	1,966 06
	<hr/>
Total	\$25,896 53

Receipts:

Granolithic sidewalks	\$1,924 19
Construction of driveways	684 33
Edgestone	270 75
Miscellaneous	171 92
	<hr/>
	\$3,051 19

Sidewalk construction was very much curtailed because of war conditions. Only forty-eight petitions were received from property owners for new granolithic sidewalks, driveways and curbing, as against one hundred twenty-seven similar petitions in 1941. Receipts were correspondingly less.

For the first time in the history of the department, granolithic sidewalks were laid by the regular town forces, and the excellent results obtained fully justified the change. In this way it was possible to utilize labor normally engaged in road work.

The real estate development on the north side of Chatham Street between Kent and Borland Streets necessitated extensive regrading of the sidewalk and the removal of twelve roadside trees.

The maintenance of gravel sidewalks is a serious problem. During the past year \$6,495.47 was expended in keeping these walks in safe condition. Every spring a great deal of work is required to resurface and level off the ruts caused by the sidewalk tractors and the spring thaws, and during the summer after every heavy rain it is not unusual to spend as much as \$500 to take care of washouts. Moreover, they are a very unsatisfactory type of walk, muddy in the spring, and rough and uncomfortable for walking during the remainder of the year. I believe that, when the present emergency is over, consideration should be given to the question of replacing many of these gravel walks with granolithic or other type of permanent surfacing, assessing the cost thereof back onto the property owners.

Maintenance of Sewers and Drains

The amount appropriated for maintaining and repairing sewers and surface water drains was	\$11,612 00
Total amount expended	10,824 54
Balance unexpended	\$787 46

The expenditures were as follows:

Labor	\$6,365 47
Rental of building	10 00
Rental of town trucks	2,860 00
Repairing sewers	397 38
Other — supplies	314 10
New catchbasin bucket	877 59
Total	\$10,824 54

The main sewers throughout the town have been inspected and thoroughly cleaned except in a small section of the southerly part of the town, and although there were signs of cracking in some localities it is our opinion that with proper maintenance they can be of service for several years to come. There were several exceptionally heavy rains during 1942, as on June 7, June 20 and July 30, when it rained .75 inch, .92 inch and .78 inch respectively during one hour. During the peak of the storm there were several cases of flooded cellars and blocked catch-basins, but immediately after the rain subsided the drains were able to function and there were very few reports of damage.

The catchbasin cleaner was operated from early spring until December and produced excellent results in keeping the basins free of leaves and other foreign material.

Due to stoppage caused by tree roots it was necessary to relay about forty feet of the 18-inch drain on the private way between Loveland Road and No. 621 Chestnut Hill Avenue, and seventeen feet of sewer on Naples Road. Inspection revealed that the drain in Stearns Road had settled and about two hundred feet are being relaid on a reinforced foundation.

Collection of Ashes and Rubbish

The amount appropriated at the annual town meeting for the collection of ashes and rubbish was	\$75,075 00
The total amount expended was	71,626 09
Balance unexpended	\$3,448 91

The expenditure of \$71,626.09 was as follows:

<i>Ashes:</i>	
Labor	\$34,505 08
Printing	40 25
Rental of dump	600 00
Rental of town trucks	8,582 25
Leveling dump	373 52
	<hr/>
	\$44,101 10
<i>Paper:</i>	
Labor	\$20,897 00
Rental of town trucks	4,806 28
	<hr/>
	\$25,703 28
<i>Incinerator:</i>	
Labor	
Contractor	\$1,225 00
Fence	90 05
Landscaping and improvements	506 66
	<hr/>
	\$1,821 71
Total	<hr/>
	\$71,626 09
<i>Receipts:</i>	
Ash and paper tickets	\$869 75
Dumping privilege	240 75
Operation of incinerator	6,125 00
	<hr/>
	\$7,235 50
Net Cost	<hr/>
	\$64,390 59

As stated earlier in this report the department co-operated with the office of Civilian Defense in connection with the salvage drive and substantial amounts of scrap metal and tin cans were collected by the ash trucks.

The five-year contract with Arthur Schwartz for the sorting and disposal of combustible waste expired on December 1, 1942. Proposals for a new contract were publicly advertised but no bids were received, and the plant is being run at the present time under a tentative agreement with Mr. Schwartz. During the first six months of the year there was a substantial increase in the value of paper and under the sliding scale of

the contract the town received \$6,125.00 from the contractor, but during the last six months the paper market fell off and the town was obliged to pay the contractor \$1,225.00.

The department has continued to use the land on Newton Street for dumping purposes. Despite constant vigilance there have been several spontaneous fires on the dump which caused real discomfort to the nearby residents and necessitated considerable labor by the Fire Department and this department. Every precaution is being taken to prevent these fires.

On account of the conversion of so many oil burners to coal there has been a steady increase in the amount of ashes, and a corresponding increase has been requested in the appropriation for 1943.

Street Lighting

The amount appropriated at the annual town meeting for street lighting was	\$126,646 00
The amount expended was	114,538 82
Balance unexpended	\$12,107 18

The expenditure was as follows:

Electric Lights	Number	Price	Amount	
15,000 lumens	355	\$84 40	\$27,216 79	
10,000 lumens	320	75 50	23,391 21	
6,000 lumens	85	65 00	5,115 52	
2,500 lumens	4	39 00	156 00	
1,000 lumens	27	23 25	616 13	
800 lumens	550	20 50	10,490 60	
Bridge	1		103 60	
Subway	2		153 01	
Tower Clocks	2		34 84	
Traffic Lights	19		2,036 59	
Fire and Police Recalls ..	8		55 45	
Spotlights	3		109 54	
Fire and Police Boxes ...	156		3,740 52	
				\$73,219 80
Gas Lights				
Welsbach lights	1,290	26 13	\$33,516 99	33,516 99
Traffic Lights				
Maintenance			\$3,309 04	3,309 04
Supplies				
New posts, globes and boxes			\$1,130 29	
Other — supplies			174 12	1,304 41
Underground				
Beacon Street at Coolidge Corner			\$2,301 01	
Beacon Street at Washington Square			887 57	
				3,188 58
Total				\$114,538 82

The six-year contract with the Welsbach Street Lighting Company will expire on November 6, 1943. Electric street lighting is supplied by the Boston Edison Company in accordance with the Street Lighting Rate E as filed with the Massachusetts Department of Public Utilities.

As stated previously, all gas and electric globes have been painted or shielded for the dimout, and sixteen lights have been discontinued for the duration. The question of decreasing the voltage of electric street lights is under consideration, but the public safety angle will receive most careful study before any change is made as any further reduction in the illumination of our public streets and sidewalks might result in an increase of accidents and crime.

Despite the many difficulties caused by war regulations and restrictions the usual standard of efficiency has been maintained. Due to priorities no new street lights have been added although there are several petitions now pending. Provision has been made in next year's appropriation for the replacement of all dangerous and decayed poles.

Respectfully submitted,

DANIEL G. LACY,
Superintendent of Streets.

COLLECTION OF GARBAGE

January 2, 1943.

To the Board of Health:

Gentlemen: — I respectfully submit the annual report of the expenditures and of the work done for the collection of garbage for the year ending December 31, 1942.

The contract with Mr. L. W. Dean of Cedarcrest Farm, Lincoln and Weston, was extended on the same terms for a period of five years from May 1, 1942.

Thirteen private contractors operating farms were licensed to collect from commercial establishments, including hotels and restaurants. The terms of the permit require daily collections from these premises. The equipment of these contractors is regularly inspected for cleanliness.

The present equipment of 6 operating trucks will meet the demands for the coming year.

The shortage of food is being reflected in the lesser quantities now being collected.

The employees of the department are giving excellent co-operation in the Salvage Campaign for the collection of greases. The grease has been sold to a rendering company and for the past few months the sum of \$140.84 has been paid to the town.

The following quantities by tons were collected by the department during the last five years:

	1938	1939	1940	1941	1942
January	791.1300	844.1400	831.2540	828.0250	832.3500 tons
February	700.8950	774.7000	691.0350	760.2500	766.5000 tons
March	793.7250	832.6760	752.1600	821.5750	845.2500 tons
April	762.6950	796.6500	762.1675	797.3750	770.9200 tons
May	791.5000	881.0000	745.9500	825.9500	761.6000 tons
June	759.7500	827.8150	687.0750	772.0750	778.3500 tons
July	668.2500	676.3750	648.9750	687.3400	706.0250 tons

REPORT OF THE TREE PLANTING COMMITTEE

January 2, 1943.

The Committee reports with deep regret the death of Ernest B. Dane on April 5, 1942.

In the passing of Mr. Dane the Committee has suffered the loss of a valuable member and an outstanding public spirited citizen.

The following resolution was adopted by the Committee at its meeting on April 20.

"Ernest B. Dane died on Sunday, April 5. A member of the Tree Planting Committee since 1908. He was its chairman from 1910 to the time of his death. That the Town of Brookline is so widely known for the beauty and variety of the trees which line its streets must be largely attributed to his knowledge, judgment and constant effort.

"The members of the present Committee wish to express their appreciation of Mr. Dane's great contribution to arboriculture in this town and to testify to their deep sense of his loss."

Mr. G. Peabody Gardner was elected a member of the Committee at the annual Town election in March.

Mr. Edward Dane was elected a member at a joint convention of the Board of Selectmen and the Committee on May 11 to serve the unexpired term of Ernest B. Dane.

It was necessary to prune and remove some of the shrubbery at the Horace James Circle. The shrubbery on the Hoar Memorial on Beacon Street is in need of extensive pruning and replacements. The planting was made in 1925 and many varieties of the shrubs have grown into "heavy wood." It is planned, however, for the duration of the war to defer the necessary replacements.

The pruning and removal of dead wood on roadside trees was done on a more limited schedule than in former years. The work being done only where it was found to be absolutely necessary.

Sixty young trees were planted in the early spring. These trees were replacements for those which had died or were damaged by automobiles.

The pine trees at the Town Forest have been carefully pruned and are in excellent condition.

A serious infestation of canker worms made their appearance early in the spring. Extensive spraying with arsenate

of lead was found necessary in order to control the ravages of this leaf eating insect.

The elm leaf beetle continues to be a serious menace to the foliage on the elm trees. Spraying was done on all roadside elms and on request by 464 private property owners. The cost of the work done on private property is chargeable on the real estate tax bill.

Scouting work has been done for egg-clusters of the gypsy moths. It is gratifying to report that this injurious insect has made no appreciable headway this past year in the Town.

THEODORE LYMAN, *Chairman*,
G. PEABODY GARDNER,
EDWARD DANE, *Secretary*.

REPORT OF SUPERINTENDENT

January 2, 1943.

I respectfully submit the annual report of the expense and work done by the Tree Planting Committee for the year ending December 31, 1942.

Rodent Control	625 00	459 96	840 55
	\$127,625 00	\$118,106 01	\$128,613 34

The reports of the various divisions of the Health Department which follow describe in detail the activities of the Department for 1942.

The death rate for 1942 was 13.26 as compared with 12.56 in 1941. The rate was appreciably raised by the deaths of 18 residents of the town in the Cocoanut Grove disaster. Excluding these deaths the rate was 12.90.

The Health Department suffered a serious loss in the death on July 26, 1942, of John A. Minahan who had served the Town of Brookline faithfully and efficiently since 1918 as Tenement House Inspector.

It was decided by the Board to assign the activities of the office of the Tenement House Inspection to Mr. George O. Tapley and the inspectors of the Division of Fly and Mosquito Control.

The Division of Fly and Mosquito Control has had so many duties assigned to it in recent years that the present title is no longer descriptive. In 1939 the duties of the Sanitary Agent including "rodent control" were transferred to this division. There is also Ragweed and Poison Ivy Control and now the Tenement House Inspection.

It has seemed wise therefore to combine all these activities in one division of the Health Department with the title "Division of Sanitation" and with Mr. Tapley as Director.

In studying the question of the transfer of the work of the tenement house inspector it was realized that there were inspections needed for defects which were a matter of public

safety rather than of public health. Thus, inspections are needed for structural defects of tenement houses, that is, of all houses containing more than two families. More important still there are fire hazards which need to be searched for.

In order to better co-ordinate the various types of inspection required the Board at its meeting on October 26 appointed the following committee to study these problems: The Chief of the Fire Department, Chief of Police Department, Building Commissioner, Town Engineer, Town Counsel and Acting Tenement House Inspector.

This Committee has been actively at work and has started a series of joint inspections of those places where it was felt that the greatest hazards to safety and health are most likely to be found. The Committee was appointed before the Cocoanut Grove disaster.

A new activity this year has been the Nutrition Center which was established in the town-owned American Legion Post No. 11 building at 50 Harvard Street. This has been conducted under the auspices of the Brookline Committee on Public Safety with funds voted for the purpose by the town meeting. The Chairman of the Health Committee, Mr. George O. Tapley, has been Chairman of the Nutrition Committee which acts in an advisory capacity. Mrs. Virginia W. Sargent has served as Nutritionist.

The purpose of the Nutrition Center is educational. The chief activities have been the American Red Cross nutrition courses, a Red Cross canteen course, canning demonstrations, instruction of girl scouts, preparation of newspaper articles, and personal consultation with women attending the prenatal clinic of the Brookline Friendly Society.

WILLIAM J. HICKEY, JR.,
EUGENE P. CARVER,
DANIEL TYLER, JR.,
EDWARD DANE,
DANIEL G. ROLLINS.

REPORT ON THE VITAL STATISTICS

To the Board of Health of Brookline:

Gentlemen: — The undersigned herewith presents the report of the Vital Statistics of the Town of Brookline for the year ending December 31, 1942. The usual details are given in the tabulation appended, but the following is the comparative summary for the year:

	1937	1938	1939	1940	1941	1942
Births (stillbirths included)	535	615	598	708	644	1129
Marriages	839	830	954	1027	1118	1157
Deaths recorded (11 stillbirths included)	838	826	833	892	870	925
Deaths occurring in Brookline (10 stillbirths excluded)	584	592	589	655	602	657
Deaths of residents of Brookline occurring out of town (1 stillbirth excluded)	249	230	234	231	256	257
Deaths of non-residents occurring in Brookline (10 stillbirths excluded)	203	201	229	222	230	248

In the tabulated classification of causes of deaths, the deaths occurring in Brookline and the deaths of residents of Brookline occurring out of town are given separately.

These tables are arranged according to the International Classification of Causes of Deaths, as desired by the United States Census Bureau and the American Public Health Association.

Births

Months	Totals	In Brookline		Out of Brookline		Totals	
		Males	Females	Males	Females	Males	Females
January	88	15	27	21	25	36	52

Respectfully submitted,

ARTHUR J. SHINNERS, Town Clerk.

REPORT OF THE HEALTH OFFICER

To the Board of Health:

Gentlemen:— I have the honor to submit the following report for the year ending December 31, 1942.

Mortality

The number of deaths in Brookline from all causes was 657, of which number 248 were deaths of non-residents, most of whom were patients in various Brookline hospitals. In addition there were 257 residents of the town who died in other places, mostly in Boston hospitals. The total number of Brookline deaths corrected for residence was 666, which with an estimated population of 50,220 as of July 1, 1942, gives a mortality rate of 13.26 per 1,000 inhabitants as compared with 12.56 in 1941.

The mortality rate was appreciably raised through the death of 18 residents of Brookline in the Cocoanut Grove disaster. Excluding these deaths the mortality rate for the year would have been 12.90 per 1,000 inhabitants.

TABLE I

Principal Causes of Death, Total Deaths, Population, and Death Rates for Past Five Years (Corrected for Residents)

	1938	1939	1940	1941	1942
Diseases of heart (all forms)	204	221	245	217	238
Cancer	105	96	108	99	109
Cerebral hemorrhage, etc.	94	80	87	90	84
Pneumonia (all forms)	46	27	24	23	16
Diseases of arteries	3	11	15	16	24
Diseases of kidneys	32	13	25	16	39
Tuberculosis (all forms)	9	9	9	11	7
Diabetes	20	19	16	20	15
Automobile accidents	7	3	1	8	8
Accidental fall	12	13	15	14	15
Other external causes	17	10	13	23	39
Total from above causes	549	499	558	537	594
Total from other causes	72	95	106	91	72
Total deaths from all causes	621	594	664	628	666
Population, July 1 (estimated) ..	52,158	52,724	49,759	49,989	50,219
Death rate per 1,000	11.91	11.27	13.34	12.56	13.26

A complete record of the causes of all deaths will be found in the Town Clerk's report on the Vital Statistics.

There were comparatively slight changes in the number of deaths from the principal causes. There was a decrease in the number of deaths from pneumonia as compared with the

previous ten year average and an increase in the deaths from diseases of the arteries and kidneys. The increase in deaths from "other external causes" was due to the Cocoanut Grove tragedy.

For the second consecutive year there have been no deaths resulting from pregnancy and childbirth, a record which show what good pre-natal, obstetrical and post-natal care our mothers are receiving.

There was only one death from appendicitis which is also a good record.

As pointed out in previous reports we have a population with relatively few children and many old people, our birth rate being lower than our death rate. The causes of death which tend to increase our mortality rate, are those found largely in older people.

Communicable Diseases

In tables II, III, and IV, will be found the cases of communicable diseases by months, by ages and sex, and also for the past ten years. The deaths do not include those of non-residents in the town, but do include deaths of residents outside of the town if they had the disease while living in the town.

Diphtheria. There were no cases reported during 1942. The preventive work which has been carried on during the past nineteen years is certainly yielding good results.

During the year 160 children of the public and parochial schools were Schicked, and if found susceptible were given the diphtheria toxoid. There were 181 children re-tested who had received the toxoid the previous year of which number 163 or about 90% had become immune. There were 221 children immunized by private physicians, and at the Health Centre of the Brookline Friendly Society 120 young children, mostly under two years of age, were given the toxoid, a most helpful contribution to the work of protecting our children against this disease. About 60% of the children under five years are *known* to be protected, although there are doubtless many more immunized of which we have no record.

Every infant whose birth is recorded has an immunization card on file at the office of the Health Department. If at the end of a year the child's immunization has not been reported, the mother is contacted through telephone call or a home visit by a nurse. This is repeated yearly if it is found that the child has not been immunized. It shows the parent that the Health Department is interested in the protection of the child and considers it important.

Scarlet Fever. There were only 73 cases reported with no deaths. Of these 41 were hospitalized and 32 were quarantined at home.

Measles. There were 651 cases of measles with no deaths. The Department has continued its efforts to have all children under five years of age, who are known to have been exposed to measles, given the protection of an injection of placental extract or immune serum during the incubation period.

Whooping Cough. There were 141 cases with no deaths as compared with 100 cases in 1941.

Smallpox. There has been no case reported since 1929, and only two in the past 38 years. The result has been that in this and other communities of greater Boston there are many individuals who are inadequately protected against this disease by vaccination. The stage is being set for a good-sized epidemic some time.

Infantile Paralysis. No cases have been reported since 1937.

Typhoid and Paratyphoid Fever. No cases of these diseases were reported. Two residents of the town were determined to be typhoid carriers.

Pneumonia. There were 28 cases of lobar pneumonia reported with only 3 deaths. The yearly average number of deaths from this disease for the ten years 1930 to 1939 was 17, showing what a marked reduction has been brought about by the use of the new sulfa drugs. The fatalities were all in elderly persons, their ages being 86, 76, and 77. At this age it is recognized that these drugs are less effective.

There were 11 deaths from broncho-pneumonia as compared with an average of about 24 per year for the ten-year period 1930 to 1939. It is obvious that the sulfa drugs are reducing the mortality from this form of pneumonia also, although not to such a marked degree. Fatalities from this form are especially prone to occur in persons weakened by some other diseases as well as by old age.

Tuberculosis. There were 45 cases of pulmonary tuberculosis reported and 3 of other forms of the disease, as compared with 38 from all forms in 1941. Excluding deaths of non-residents and including deaths of residents wherever they occurred, there were 8 deaths from pulmonary tuberculosis and one from other forms. These 9 deaths give us a rate of 17.92 per 100,000 population as compared with 22.2 in 1941.

TABLE V
Deaths from Tuberculosis by Age and Sex, 1942

	0-9	10-19	20-29	30-39	40-49	50-59	60-69	70-	Total
Males	0	0	0	2	3	2	0	0	7
Females	0	0	1	0	0	0	1	0	2

At the Tuberculosis Dispensary, Dr. Horace K. Boutwell has been the attending physician, and Mrs. E. R. Jarvis, the "tuberculosis nurse." There were 95 clinics held at which 801 chest examinations were made of 305 persons, of which number 148 were new patients. The total number of visits of patients to the Dispensary was 3,003. There were 31 patients sent to hospitals, 14 through the Dispensary.

On December 31, 1942, the records of the Dispensary showed the location of 201 tuberculosis cases as follows:

Active pulmonary cases at home	15
Arrested pulmonary cases at home	135
Other forms at home	21
In Brookline Tuberculosis Hospital	18
In other hospitals	12

201

Mrs. Jarvis made 2,738 home visits in connection with her tuberculosis work, and assisted at 84 clinics. In addition to her duties in connection with tuberculosis Mrs. Jarvis acts as Supervisor of Nurses, assists in the diphtheria prevention work at the Parochial Schools, and helps the Health Officer in collecting statistical data.

School Examinations. During the year tuberculin tests were made of 533 children in the public and parochial high schools. Of this number 47 or about 8.8% were positive and these were subsequently X-rayed by the State Department of Health. No active tuberculosis was found.

Rehabilitation. Many patients on discharge from the hospital have no occupation that is suitable for them, and they are seldom able to work whole time. Very often they try to work and break down, as a result of which a year or more of additional treatment at the hospital is required, or as too often happens they do not recover from the relapse. This has been one of the weak points in our campaign against tuberculosis.

By "rehabilitation" is meant training patients to take up work that is suitable for them, beginning as a rule with only a few hours a day.

Mr. Cornelius E. Smith, Rehabilitation Agent of the Norfolk County Health Association, spends one day a week at our hospital to assist patients in preparing to resume community activity after their discharge from the hospital. This gives hope and encouragement to the patients and is of great value as a morale builder.

The Rutland Training Centre at Rutland, Mass., offers courses of various kinds to fit persons with arrested tuberculosis for suitable occupations. While in training they are

under medical supervision and their hours of work are carefully regulated. Two young men from our hospital were at this Training Centre and on leaving were able to secure work.

Valuable Assistance from Other Agencies has been received. The Brookline Anti-Tuberculosis Society, whose funds come largely from the sale of Christmas seals, sent to summer camps and homes 65 children who had been exposed to tuberculosis or who had signs of the disease. This is a most valuable contribution to our work. They also gave warm clothing for the sanatoria patients. The Elks have been most generous in gifts to needy cases.

Venereal Diseases. All cases of these diseases seen by physicians should be reported without the patient's name to the State Department of Health. If a patient does not continue treatment until cured the physician should report him by name. In Table VI is given the number of cases according to disease and sex so reported.

TABLE VI
Venereal Diseases Reported 1942

	Gonorrhea			Syphilis			Both Total
	Male	Female	Total	Male	Female	Total	
Reported to State	11	9	20	24	28	52	72
Lapsed Treatment.....	0	0	0	1	0	1	1

Other Diseases Reported

Dog and Cat Bite	122
German Measles	127
Mumps.....	72
Septic Sore Throat	2
Meningitis	4
Suppurative Conjunctivitis	1

Public Health Nurses

Miss Mary A. MacDonald and Miss Regina A. Thomas have served throughout the year.

The nurses visit the homes in which the cases of contagious disease have been reported. They placard the house if that is required; they obtain information in regard to the source of infection; they give advice in regard to precautions; they investigate the health of the other members of the household and see that the children are excluded from school.

Miss Thomas acts as "School Nurse" for the Parochial Schools, and as far as time permits investigates the cause of absence of pupils from these schools.

Summary of Nurses' Work, 1942

Visits to absentee pupils	491
Visits to schoolhouses	167
Visits for Dental Clinic	35
Settlements and investigations	78
Visits for correction of defects	225
Diphtheria Immunization	254
Visits for tuberculosis prevention	20
Quarantine visits	1,640
Clinics, assisted at	154
	<hr/> 3,064

Infant Mortality and Birth Rate

There were 2 deaths in the town of Brookline infants under one year and 12 infants of Brookline parents died outside the town, or a total of 14 deaths.

There were 617 live births to Brookline mothers, which with the 14 deaths gives a rate of 22.7 per 1,000 births as compared with 30.3 in 1941.

The birth rate per 1,000 population based on all births to Brookline mothers was 12.29 as compared with 9.92 in 1941.

TABLE VII
Deaths Under One Year by Cause and Age, 1942

International List Number	CAUSE	Under 1 day	1 to 2 days	2 to 3 days	3 days to 1 week	1 to 2 weeks	2 to 3 weeks	3 weeks to 1 month	1 to 2 months	2 to 3 months	3 to 6 months	6 to 9 months	9 to 12 months	Total under 1 year
157 g	Congenital Malformations of digestive tract	1			1									2
157 m	Other congenital malformations	2												2
159	Prematurity	6			1		1							8
161 c	Hemorrhagic disease					1								1
182	Accidental Suffocation									1				1
	Total	9			2	1	1			1				14

There was one stillbirth. In the above table the deaths of non-resident infants are excluded and deaths of infants of Brookline parents occurring out of town are included.

Child Welfare Work — 1942

Each spring the Health Department undertakes the medical examination of children who are soon to enter the public and parochial schools. The object of these examinations is the correction of physical defects as early in life as possible so that the child will be in the best possible health when he

begins his school work. There were 361 pre-school children examined, and 84 were vaccinated.

There were 227 pre-school children whose teeth were cared for at the Dental Dispensary.

Except for the work for the pre-school children just referred to, all the infant and child welfare work is carried on by the Community Health Centre of the Brookline Friendly Society. This private agency has covered this important field of public health with great success for many years, and the services furnished have been scored high in the Health Conservation Contest. The citizens of the town should appreciate that except for the salary of one nurse which is paid by the Health Department, this excellent service is furnished without expense to the taxpayers.

The Health Centre submits the following report:

During the year of 1942 the Child Welfare Department of the Brookline Friendly Society has had under supervision 703 infants and pre-school children. They have had 97 Well Child Conferences with an attendance of 1,937.

All children under supervision are given a physical examination routinely every six months or oftener if indicated and a well-qualified pediatrician is in charge at each conference. Mothers are advised in regard to feeding and health habits and only well children are permitted to attend the conferences. All sick children are referred to the family physician or the nearby hospital clinics. The Child Welfare nurse visits the child in the home to see that the doctor's orders are carried out and to check up on the child's progress. There were 429 children under two years of age attending the baby clinic and 274 between the ages of two and five years were under care in the pre-school clinic. All of both groups have been immunized against diphtheria and vaccinated.

When the child is two years old he is given an appointment at the Pierce School Dental Clinic to check up on dentition and to accustom the child to dental service. A record of the child's teeth is kept at the clinic and any necessary prophylactic work is done.

Children under supervision.....	703
Attendance at Child Welfare Conferences	1,937
Home Visits made by Nurse	2,464
Children immunized against Diphtheria	124
Children Schick tested	108
Children vaccinated	101
Preschool children attending Dental Clinic	190
Attendance at Dental Clinic	500

Medical Inspection of Parochial Schools

Medical inspection of the pupils of St. Mary's and St. Aidan's Parochial Schools is provided by the Health Depart-

ment. This work has been in charge of Dr. David M. Hassman who is also Medical Director of the public schools. One of our health nurses devotes the greater part of her time to the care of the pupils of these schools.

The Health Bulletin

The Bulletin has been published quarterly and distributed by the Police Department to every house in the town. We believe it is serving the purpose of promoting education in health matters, of informing residents of the quality of the milk sold by the various dealers, the sanitary scoring of eating places, and of giving publicity to the various activities of the department.

The Hospital Relief Fund

The sum of \$17,300.77 was expended to provide prompt hospital care to 238 individuals not receiving welfare aid but in need of such care, and unable to pay the hospital charges. This is the group, often referred to as the "medically indigent" — those able to provide themselves with food, shelter and clothing, but quite unable to bear the expense of serious illness, requiring hospital care.

Rabies Control

There were no rabid dogs reported during the year. There were 122 persons reported as having been bitten by dogs or cats. Anti-rabic vaccine and the expense of its administration was furnished by the Health Department for two persons, one of whom had been bitten by an unknown dog and the other had been exposed to a rabid dog outside the town.

THE BACTERIOLOGICAL LABORATORY

A total of 3,339 examinations was made during 1942 as follows:

Diphtheria. There were 50 cultures and 4 swabs examined from persons suspected of having diphtheria, all of whom were negative. There were 123 cultures for the detection of carriers. The total number of cultures and swabs examined was 177.

Tuberculosis. There were 280 sputum examinations of which 71 were positive.

Typhoid and Paratyphoid. There were 50 specimens of blood submitted for the diagnosis of typhoid and 50 for paratyphoid, none of which gave a positive reaction.

Ophthalmia, Gonorrhea. Of 165 smears made for the diagnosis of gonorrheal infections 31 were positive; there was one negative ophthalmia smear.

Vincent's Angina (Trench Mouth). There were 4 examinations to diagnose Vincent's Angina. Of these none was positive.

Milk Examinations. There were 699 samples of milk and cream submitted by the agent for the Inspection of Milk and Provisions which were plated and the number of bacteria per cubic centimeter counted. The results of these milk counts have been published in the *Health Bulletin*. There were 699 samples examined microscopically for the presence of pus and streptococci. Counts were made of 40 samples of ice cream.

Water Examinations. The Municipal Water Supply and the water from the Bath House Swimming Pool have been examined weekly, a total of 226 examinations of 112 samples having been made. Plate counts were made of these and also 114 tests for the colon bacillus. The average of the counts of the town water for the year was 5.51 per cc, as compared with 29.42 in 1941.

Examination of Eating and Drinking Utensils. During the past five years the Health Department has been examining bacteriologically the eating and drinking utensils of the various restaurants, soda fountains and other eating and drinking establishments in the town. The utensils examined are those that go to the mouths of the patrons, chiefly glasses, cups, spoons and forks.

Swabs moistened with sterile salt solution are rubbed over the inside and outside of the lips of the glasses and cups and

then rinsed in a tube of salt solution and the number of the bacteria in the salt solution counted by the plate method. The results have shown very definitely whether or not these utensils have been properly sterilized as required by the health regulations.

There were 880 of these examinations, which included 4,308 different utensils.

Miscellaneous Examinations. In addition to the above, there were 7 special bacteriological examinations and 25 guinea pig inoculations.

Outfits. There were 1,447 outfits for cultures and for the collection of specimens made up and distributed to the doctors from the Laboratory.

Antitoxin, Vaccine, etc. There were 641 outfits furnished free by the State Department of Health distributed from the Laboratory to physicians.

The Fly and Mosquito Control work is directed by Mr. Tapley, bacteriologist from the Laboratory. Attention is called to his report of this work.

Respectfully submitted,

FRANCIS P. DENNY,
Health Officer.

THE DENTAL CLINIC

Committee in Charge

Clinicians

Arthur P. Connelly, D.M.D.

Joseph A. Conway, D.M.D.

Dr. Connelly submits the following report:

With our great Nation at war, there has been an interruption in many of the activities of our daily life. The Dental Clinic has suffered from the effects of this crisis during the past year.

In planning our work for the year 1942, we fully realized the obstacles that confronted us. We looked forward with a fervent hope that this conflict would be over, but to our sorrow, it has become more involved.

This year we cannot boast of any great record of accomplishment, but we have maintained a high standard of service, which to me is an important factor in oral health.

Early in the school year, we lost the services of Dr. Joseph A. Conway, one of our Clinicians, who entered the United States Navy. Dr. Conway has been a valuable cog in the dental program of the Town of Brookline, and it has become a difficult task to replace him. We are looking forward to his return.

During this past year, we have had the services of Dr. John A. Hopkins as our anaesthetist at the Health Center. He is a competent surgeon and anaesthetist, and his help has been most satisfactory.

In this brief report, we cannot forget to express our feeling in regards to the Health Center. Under the direction of Miss Moeberg, much excellent service has been rendered our children.

In conclusion, we hope that the "Dove of Peace" is near, and that the dental service of Brookline will again return to its normal routine. It is our desire to give the children of Brookline the best dental service that we can possibly render.

In Hospital Jan. 1, 1943	18					18	9	9

Of interest, but not included in the foregoing table of statistics are the following items which reflect some of the major activities of the hospital during 1942:

Pneumothorax treatments, totalling 693, were administered to the hospital and outpatient groups. Of those who were hospitalized 55% were treated while in the hospital, and a number of them were later discharged improved, and joined the outpatient group for a continuance of the treatment.

Five patients underwent major surgical operations — four of the chest and one of the abdomen. Each made satisfactory recovery and at the close of the year were in good condition.

We record six deaths, five of whom died from tuberculosis after hospitalization of from two days to four months. In other words they were far advanced in their disease when admitted, and serve as additional examples of the reason for the campaign to uncover and hospitalize patients in the early stage of the disease. The sixth patient died of an old heart affliction.

X-Ray examinations were afforded persons from several groups in the Town as follows:

Requested for hospital patients	152
Requested for Dispensary patients	320
Requested by private doctors	42
Requested by Board of Public Welfare	9
Requested by Park School (staff)	4
Requested by Brookline Friendly Society (staff)	7
Requested for Highway Department	1

As a matter of history it is herein written that because of war and the resultant shortage of nurses due to the demands of the Army and Navy Nurse Corps, and because the cases usually admitted to our contagious division were scattered incidents, and that therefore, nurses to staff the ward would be used to serve only a very few patients at any one time, all cases of contagion, with the exception of one sailor, were sent to the Haynes Memorial Hospital in Allston. To offset this lack of use of the ward it was made available to the 5th Mobile Unit of the Brookline Civilian Defense organization and became headquarters for the ambulance and canteen services of the American Red Cross.

The year 1942 saw the beginning of a new service to the patients — a rehabilitation director in the person of Cornelius C. Smith, B.S., a member of the Norfolk County Health Association. Mr. Smith was on duty at the hospital once a week to assist patients in preparing to resume community activity after their discharge from the hospital. His emphasis was on educational subjects and in co-operation with the State Department of Education, the Brookline High School and St. Mary's High School, patients who elected to do so, studied and were tutored in English, mathematics, languages and engineering.

We again make note of our gratitude to the several fraternal organizations and thoughtful individuals of the Town of Brookline who helped us through the year by furnishing entertainment, books, magazines and flowers.

Respectfully submitted,

ELIZABETH A. McMAHON; R.N.,
Superintendent.

REPORT OF THE TENEMENT HOUSE INSPECTOR

To the Board of Health, Brookline, Mass.

Gentlemen: — I have the honor to submit the thirtieth Annual Report of the Tenement House Inspector for the year ending December 31, 1942.

Mr. John A. Minahan, Tenement House Inspector for the past twenty-five years, passed away July 26, 1942, and the work of the Department was relocated in the office of George Otis Tapley, Bacteriologist-Director of Fly and Mosquito Control.

Following is the report of the Inspection Work:

Tenement Houses		No.
Basement Occupancy — no permit		2
Building defects		6
Leaky roofs		3
Defective plumbing		18
Defective rainwater conductors		7
Insanitary refrigerator sinks		11
Insanitary water-closet bowls		43
Obstructed drainage		28
Encumbered egresses		113
Fire hazards		224
Hallways not properly lighted		50
Insufficient heat		103
No hot water		13
Odors in apartments		36
Overcrowding		2
Smoke nuisances		11
Unightly walls and ceilings		6
Untidy cellars		123
Untidy yards		3
Miscellaneous nuisances		22
Bedbugs (houses infested)		2
Cockroaches (houses infested)		8
Leeches (houses infested)		1
Mice (houses infested)		3
Court Case		1
Permit to keep horse		1

Lodging Houses		No.
Basement Occupancy — no permit		1
Defective plumbing		3
Encumbered egresses		39
Fire hazards		82
Insanitary water-closet bowls		41
Odors		3
Unightly ceilings		1
Untidy yards		21

The total number of inspections made during the year of Tenement Houses, Lodging Houses and Fraternity houses was 2,219.

JOHN A. MINAHAN

On October 26, 1942, the following Committee was appointed by the Board of Selectmen:

Thomas J. Moran, *Building Commissioner, Chairman*
Selden R. Allen, *Chief of Fire Department*
James W. Tonra, *Chief of Police Department*
George Otis Tapley, *Acting Tenement House Inspector*
Walter A. Devine, *Town Engineer*
Simon P. Townsend, *Town Counsel*

The title of the Committee is, "The Committee To Investigate Health and Safety Conditions In and About Buildings." Composite inspection forms for all related services were made up; twelve men in pairs were immediately sent into the field to begin inspection. Several hundred inspections have been made to date and followed up with reinspections. Results are most gratifying.

Every indication points to the need of permanency of this Committee. Future expansion with co-operation with the Planning Board, Park Department, Nursing Services, Nutrition Center and others, is indicated.

Respectfully submitted,

GEORGE OTIS TAPLEY,
Acting Tenement House Inspector.

REPORT OF THE QUARANTINE INSPECTOR

To the Board of Health, Brookline, Massachusetts.

Gentlemen: — I respectfully submit the following report for the year ending December 31, 1942.

It is pleasing to note a very substantial reduction in the services required of this division, covering the cases of communicable diseases occurring within the town. The fewer cases reported, with but one major and three minor violations found, emphasize the value of the educational work done by the personnel of the Health Department and the vigilance of its nurses. Twenty-four quarantine inspections were made, 31 milk jar restrictions placed, 2 food handlers quarantined, one medical examination, 2 diagnostic examinations of blood specimens and one throat culture required, all of which were negative; 3 rooms, one bathroom, the police ambulance, 5 lots of school books and 17 lots of library books were disinfected with formaldehyde or 40 c. p. formalin solution. Miscellaneous services requested by physicians and others included instructions to householders pertaining to the care and removal of laundry and other articles exposed to infection, the proper treatment of dog kennels following disease and the furnishing of disinfecting solutions in connection therewith.

The out-of-town quarantine work in connection with incidences and outbreaks of communicable diseases which might be transmitted through the medium of milk (and occasionally of food) intended for distribution in Brookline requires, under recommended public health procedure, restricted reports for psychological reasons, for experience has shown that many persons will change their milk supply or even temporarily discontinue it upon knowledge of such conditions, especially if of epidemic extent. In this connection it is pertinent to state that when transmittable diseases occur in a milk producing area if prompt and adequate preventive measures are enforced and continued until the end of the incubation period, the milk from such district is safer than that from other districts where there might be an unreported case or cases not under such supervision. For the third consecutive Fall season it was necessary to enforce such quarantine restrictions and make such temporary exclusions as would definitely protect our milk supply from possible infection. This work required considerable additional expenditure of time and money in one area. As the allotted funds for such work were insufficient a portion of the cost was charged to

Milk and Food Inspection. An increased amount to cover such unforeseen emergencies is included in the 1943 appropriation.

Respectfully submitted,

WILLARD E. WARD,
Quarantine Inspector.

REPORT OF THE AGENT FOR THE INSPECTION OF MILK AND PROVISIONS

*To the Board of Health,
Brookline, Massachusetts:*

Gentlemen:—The following is the report for the year ending December 31, 1942.

It is my duty to again call attention to the urgent need for a suitable location for the milk, food and fuel laboratory now located in the basement of the Town Hall Annex. The dampness which penetrates through the floor, the base of which is brick, has a very injurious effect on the equipment, especially the expensive precision parts. The inaccessibility of the sensitive parts makes it impractical to take them apart for protective treatment and reassemble frequently enough to avoid replacements, consequently there is a great waste of money and valuable time much needed for other work. To add to the difficulties, the two very small office rooms, in one of which is the large cabinet containing the government weights and measures standards, are so crowded as to make it difficult to conduct the various branches of service under my charge with economy and continue the present standards of efficiency.

The more recent scientific and experimental work has revealed new conditions which are responsible for milk and food borne diseases and devised methods for their elimination and control. It has been the aim of this division of service to act upon any information or adopt any procedure that would offer further protection to the public health. Quite recently a survey by the Federal Public Health Service disclosed that the use of insanitized serving utensils, especially beer and soda glasses, was more largely responsible for the spread of communicable diseases than had been supposed. Through our own initiative it was found that ice cream novelties were being manufactured in such an insanitary manner as to be a positive menace to health, especially that of children, because of extremely high bacteria (some of which were of pathogenic type) and the potential danger of spreading disease. It is an obvious fact that expansion of these and other phases of the work would afford greater protection to the public health but the available personnel is now taxed to the limit. Consequently it is recommended that the desired expansion be provided for through the assignment of part-time assistance from another division or the employment of another girl who could be trained in the work and also take care of the additional clerical work required. It is regretted that extremely few public health agencies in this part of the country are making any real effort to eliminate the dangers from the two conditions

indicated, which has made our work more difficult and unpleasant. It is pertinent to state that with some phases of the work it has been very hard to obtain progressive results because of the acute shortage of labor and the inability of dealers to purchase required equipment even with the priority ratings, consequently it has been necessary to expend greater effort and time in enforcing corrective measures. The work as detailed in the tabulation and charts warrants limiting further comment except where it is desirable for clarification and comparison.

SUMMARY Milk, Cream, etc.

Chemical Analyses			
Milk and milk beverages .	682	Milk below standard	0

Milk beverages	3,660	0	2.20	1			
Cream, 5 grades to							
Dec. 1	7,435	3		1			
Ice Cream	6,725	0		1			
Ice cream novelties . .	5,614	2		1			
With 1 bad sample	416,882						

The present bacteriological standards per c. c. for pasteurized milk are a maximum of 20,000 for Market, 5,000 for Grade A, 3,000 for Special, 300 for Certified; for pre-pasteurized milk a maximum of 400,000 for Market, 50,000 for Grade A, 25,000 for Special, 10,000 for †Certified when sold raw. The bacteriological standard for cream is a maximum of 40,000 per c.c., for ice cream and ice cream novelties 50,000. The butter fat standards for milk are a minimum of 3.35 per cent for Market, 4.0 for Grade A, 4.4 for Special, 3.5 to 4.0 for Certified (or fat content stated on label), for cream, 16 to 48% according to grade.

Pasteurized Milk. The chemical and bacteriological analyses of the pasteurized milk showed that the purity and nutritional values have been maintained with the exception of that portion of the Grade A supplied by the larger dealers, which although well above the standards in richness and purity continued to be deficient in solids-not-fat. This is due to the addition of cream to milk of low food value in order for it to comply with the legal fat standard for Grade A milk, Massachusetts being one of the few states which does not prohibit this practice. Such milk is deficient in bone-building elements and is therefore less suitable for children than some market milk supplies. Your Agent has for years in published statements insisted that all milk should contain normal food values. There is a movement under way by the Federal authorities to eliminate this and other classifications which mean little more than a deceptive sales argument.

Pre-Pasteurized Milk. The large number of bacteriological reports from approved agencies and from dealers comprise samples from individual producers. The data under pre-pasteurized milk includes only the samples examined by agencies under our control. The reports from dealers cannot be considered wholly reliable in determining the quality of pre-pasteurized milk for investigation showed that in some cases reports of bad conditions were withheld to avoid exclusions which are made when second consecutive violations are reported. It is significant that such counts are inconsistently lower than those of composite samples of the same milk taken from tank cars and trucks when received at pasteurizing plants, at which point the actual quality of pre-pasteurized milk should be determined. From all samples of raw milk reported 98 cases of mastitis were located. The work, covering both pre-pasteurized and laboratory pasteurized milk resulted in effecting corrections through temporary or permanent exclusion of milk and the elimination of diseased animals. The verification of more than 47,000 reports with the sending of warning and exclusion notices in connection therewith added greatly to our overtaxed clerical and filing facilities.

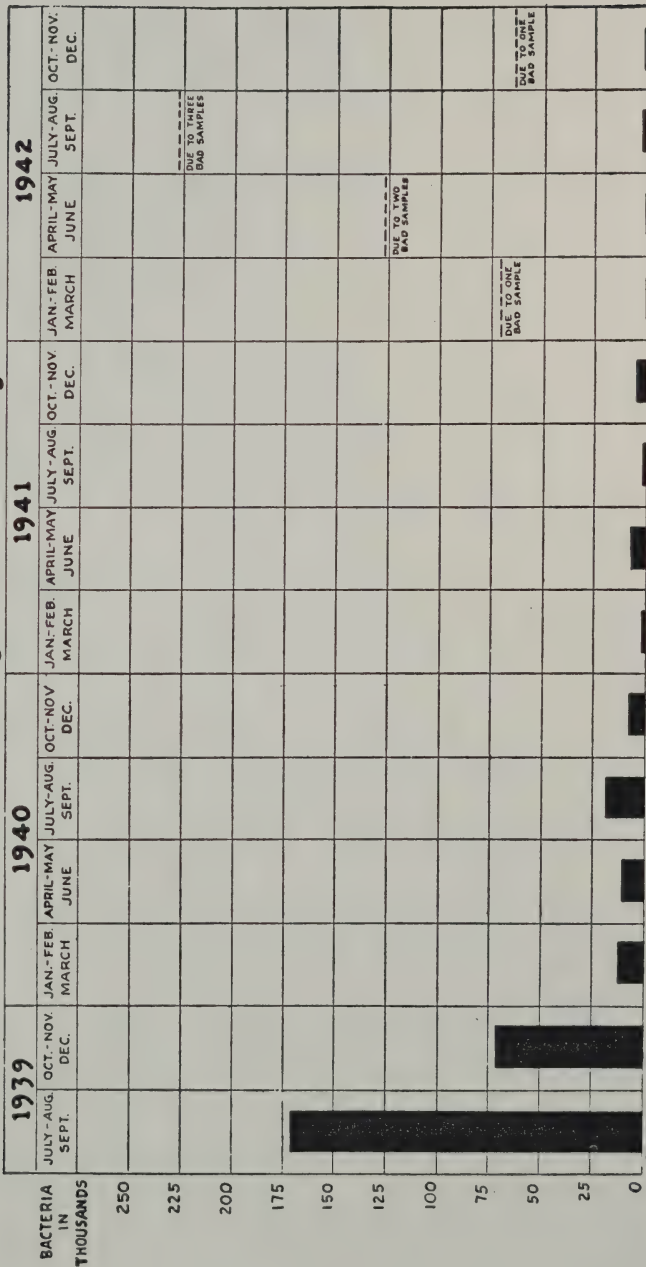

School Milk. This milk ranks highest in nutritional value, thus making it exceptionally suitable for growing children. In addition to the average of 4.91% butter fat the solids-not-fat averaged 9.28% while the average sanitary dairy score was 96.2.

Goat's Milk. The one licensed supply has conformed to all sanitary, chemical and bacteriological requirements.

Chocolate Milk and Milk Beverages. The chocolate milk was furnished the public schools. Upon recommendation of your Agent it was made from milk from the same source of supply as that furnished the schools which accounts for its higher fat content and it was also high in other nutritional values. The milk beverages sold elsewhere are much lower in nutritional value.

Cream. A decided improvement over last year was due to the exclusion of two supplies and the substitution of three others of a more satisfactory quality. Effective December 15, the Federal Department of Agriculture limited the fat content of cream to not more than 19% when sold to consumers. Cream is shipped from country creameries to distributing plants at 40% butter fat where it is standardized to 19% with skim milk which is often of doubtful age and quality, thereby affecting the flavor of the finished product, consequently the greater use of skim milk has caused increased complaints of off-flavor.

Chart Showing Improvement Made In The Sanitization of Eating and Drinking Utensils

STARTING WITH JULY 1, 1939 THE SAMPLES WERE TAKEN IN ROTATION TO OBTAIN REASONABLY CORRECT AVERAGES. DASH LINES IN 1942 REPRESENT BACTERIA INCLUDING EXTREMELY HIGH COUNTS. PERMISSIBLE BACTERIA NOT MORE THAN 500 PER UTENSIL.

Sediment and Microscopical Examinations. These were responsible for locating and eliminating the causes of contaminated milk and were instrumental in detecting diseased animals.

Per Capita Consumption. Using the standard method of computation this is conservatively figured at 12.3 ounces of milk and 1.9 ounces of cream daily. Educational activities to increase consumption have been continued.

Ice Cream. The Federal authorities have reduced the manufacture of this delectable and nutritious product by 50%. There was but one supply found to be below the required standard which was immediately corrected after analyses showed one ingredient to be inadequately processed. There has been a decided improvement in both purity and food value.

Sanitization of Serving Utensils. The chart submitted indicates progressive improvement. The upper broken lines indicate the average bacteria per utensil when those samples which contained bacteria too numerous to count and were conservatively computed at 5,000,000 were included. While there were violations there were no unreasonably high counts in the remaining 907 samples, as indicated by the gradations at the bottom of the columns. It is significant that with one exception the extremely high counts were repetitions at establishments where it has been difficult to enforce other sanitary measures. It is hoped that the suspension of common victuallers' and liquor licenses at two of such places and the revocation of a third for general insanitary conditions will serve as a warning that safe serving utensils and cleanliness must be maintained. (See opposite page.)

Ice Cream Novelties. The chart submitted clearly shows the value of this phase of public health work, the black lower line being a true index, for the two bad samples in 1941 and the one in the past year which contained 14,400,000 bacteria per c.c., indicated by the broken lines, were taken at stores. The single extremely bad sample was due to lack of refrigeration and the proprietor immediately discontinued selling these commodities rather than install a separate refrigerator. It is clearly indicated that manufacturers are now putting out a product which is well within the permissible limit of 50,000. (See next page.)

Dairies, Creameries, etc. Because of the critical shortage of farm labor greater effort and time have been required to insure the safety and cleanliness of our milk supply. Due to arrangements made with the State Milk Regulation Board and changing from two supplies to one which had fewer producers but larger volume and better quality it was possible to considerably reduce both the number of inspections and the number of dairies approved. The inspections included second inspections

BLACK FULL LINE = AVERAGE WITHOUT BAD SAMPLES
PERMISSABLE STANDARD NOT MORE THAN 50,000 BACTERIA PER C.C.

of Special and Grade A dairies, which the law requires to be qualified twice annually. They did not include inspections made following violations of the temperature regulation. Of twenty-nine blood specimens sent to the State Diagnostic Laboratory for examination two were positive and permits to handle Special milk were refused two employees.

Because of the Government's critical need of metal for war purposes and the delay in obtaining replacements through priority ratings it was necessary to make many more reinspections at creameries than usual. At a few plants of more than one processing unit where needed replacements could not be obtained such changes were made in operating hours as would admit of using only such units as were put in sanitary condition and discarding the others. Of paramount importance were the installation of safe water supplies at two plants and elimination of cockroaches and other vermin through the use of modern steam diffusers or other methods. Copies of the inspection reports were sent to the Federal Milk Market Administrator and the State Milk Control officials which made it easier to obtain prompt corrections especially at plants where their standards were not being maintained.

Inspections at ice cream manufacturing plants and of railroad and motor milk tanks revealed no serious deficiencies except in one instance where the chemical was not being efficiently used in sterilizing motor tanks. In the transportation of milk to creameries corrections were effected when it was found that the product was being unduly exposed or inadequately iced.

Licenses and Permits. Because of insanitary conditions attending production and processing three applications for milk licenses and one to manufacture ice cream in an underground basement were refused. Because of continued violations of bacteriological or sanitary standards the permits of twenty-seven producers of Grade A milk and two of Special milk were permanently revoked in order that the quality might be improved; for the same reasons eight permits for market milk and two for cream for acceptance by licensed dealers were also revoked.

Food Sanitation

Analyses. The analyses of food revealed nine instances where food was unfit for consumption and subsequently destroyed while three commodities were adulterated and four illegally labeled. Corrections were made by the manufacturers and processors. A great many inquiries have been received regarding quality and ceiling prices of food which required considerable time in clarifying. Requests for information concerning the potency of the various vitamin products have been

received. Because of the medicinal importance and the fact that the potency can only be determined by biological procedure the matter has been taken up with the personnel of the Massachusetts State College Experiment Station and our Dr. Dubois has been assigned to co-operate.

Inspected. This work covered such foodstuffs as required no analysis to ascertain their fitness for consumption. Under authority of Section 146, Chapter 94, Revised Laws, there were seized and destroyed four lots of meat, fowl and fish, three lots of cooked meat and following a fire one lot of miscellaneous foodstuffs.

Store Inspections, etc. The 1,360 store inspections were far below the number prescribed by the American Public Health Association's Committee on Municipal Public Health Practices to effect reasonable compliance with sanitary regulations. While maximum attention has been given to the sterilizing of utensils and adequate protection and refrigeration of susceptible foods, the ever-increasing duties in the several divisions under your Agent's charge and the limited assistance provided made it impossible to make the desirable number of inspections. It can, however, be definitely stated that the sanitary conditions at our food stores are well above the average while at those establishments which serve prepared food and beverages the safety of the serving utensils through sterilization, as shown on the chart, is not excelled in the eastern section of the country. Frequent requests from individuals and organizations (many from out-of-town) for copies of our records and charts for the purpose of determining the safest and best places to eat and drink emphasize the value of this work. This undoubtedly increases the patronage of establishments where thorough sanitization of utensils is maintained. There were eight thermostatically controlled sterilizing units and three step-up hot water attachments installed at eating places and twenty-two additional major corrections of a miscellaneous nature effected at stores. There were a few instances where noisy vehicles were corrected.

Hearings. These were given for the purpose of obtaining corrections without recourse to prosecution, cancellation of licenses or permits and to determine whether or not applications for various licenses could be rightfully certified to as approved. These resulted in effecting major corrections at six food establishments, refusal to approve one ice cream manufacturing license, two basement permits for handling or cooking food, two victuallers' licenses and one for a slaughtering establishment. Upon refusal the applications for the latter three were not presented to the Board.

Appreciation is expressed for the opportunity to acquire valuable information through attendance at conferences pertaining to the newer phases of milk and food control.

Attention is called to the preceding report of the Quarantine Inspector and that of the Inspector of Animals on the following page which are related to the activities outlined in this report.

Respectfully submitted,

WILLARD E. WARD,
Agent, Milk and Food Inspection.

REPORT OF THE INSPECTOR OF ANIMALS

January 1, 1943.

To the Board of Health, Brookline, Massachusetts:

Gentlemen:— I have the honor to submit my annual report for the year ending December 31, 1942.

SUMMARY OF WORK

Cattle inspected	42
Swine inspected	34
Horses inspected for Glanders	8
Dogs inspected and quarantined for biting	326
Dogs inspected for Rabies	160
Cats inspected for Rabies	5
Squirrels inspected for Rabies	2
Barns and premises inspected	4

Meat Inspection

Meat condemned and destroyed (lbs.)	140
Fish condemned and destroyed (lbs.)	60
Fowl condemned and destroyed (lbs.)	115
Store inspections	12

Dairies

Cows inspected — Special Dairies	410
Cows inspected — Certified Dairies	480
Creameries inspected	5

The annual inspection of Domestic animals was made in December; all animals were found to be healthy with one exception. This one was suspicious of Bang's Disease, but has since been blood-tested and found to be healthy.

Contagious Diseases

During the past year there were no cases of Tuberculosis in animals in the town.

The few horses that were away at summer camps during the last season, were carefully inspected for contagious diseases but were found to be in good health.

Rabies

There were no cases of Rabies during the past year, although this disease has been prevalent in near-by cities. There have been a great number of private vaccinations against Rabies, which afford protection to a certain extent.

There have been a great many persons bitten by dogs which have been quarantined for the two weeks observation period. Also, five cats and two squirrels were quarantined for biting.

Several cases have occurred where dogs were biting children. As a safeguard, I have recommended these dogs be destroyed, as these injuries are not only painful and disfiguring if about the face of the child, but are apt to cause infection even if the dog is free from disease.

Dairies and Creameries

At the request of Mr. Ward, a great deal of time was spent on dairies and creameries. As a result of these inspections, I found a number of cases of disease affecting the milk. These animals were removed from the herd and treated until recovery had taken place, when they were returned to the herd.

There was one herd with a number of tubercular animals found. These were removed and destroyed. The herd is still under observation and retests are being made to detect any further outbreaks.

Meat — Fish — Fowl

At the request of Mr. Ward, several inspections were made in stores and in a number of instances where meat, fish or fowl were found unfit for human consumption these were condemned.

Respectfully submitted,

CHARLES W. DELANO, M.D.V.,
Inspector of Animals.

REPORT OF DIVISION OF FLY AND MOSQUITO CONTROL

Brookline, Mass., January 1, 1943.

To the Board of Health, Town Hall:

Gentlemen:— I have the honor to submit the following report for the year, ending December 31, 1942.

The function of the Sanitation office and personnel is primarily that of interpreting regulations and assisting individuals in complying with both the letter and spirit of the law. In some fields, we assume responsibility for a certain amount of continuous supervision, *i.e.* garbage, private and business; manure; privies; stables; hensheds; and grass heaps. It is our plan to decrease the necessity for routine supervision through educational work and thereby cause the public to take more and more responsibility for maintenance of favorable sanitary conditions.

A. SANITATION

(Fly and Mosquito Control)

1. <i>Garbage</i> (Householders, business districts, vacant lots)		
Total Inspections	10,510	
Violations	5,388	
Abatements	4,711 (87.5%)	
2. <i>Miscellaneous</i> (Strewn papers, grass heaps, etc.)		
Total Inspections	4,012	
Violations	2,523	
Abatements	1,917 (75.8%)	
3. <i>Incinerators</i> (In apartment buildings and backyards and 2 electric disposers)		
Total Inspections	493	
4. <i>Manure</i> (From hensheds and for garden purposes)		
Total Inspections	14	
Violations	9	
Abatements	8 (88.8%)	
5. <i>Privies</i>		
Total Inspections	4	
Violations	3	
Abatements	1 (33.3%)	
6. <i>Other Inspections</i>		
Henyards, pigeon cotes, duckpens (33)	33	
Stables (Rabbits, goats, guinea pigs, pigs, cows, and horses) (21)	22	
7. <i>Sanitary Services Requested</i> and referred to Refuse Collection Department; found during regular inspection		
	5	
Total of all Outside Sanitary Inspections	15,093	

The Appraisal Form for Local Health Work of The American Public Health Association, January 1941, indicates a Standard of 25 inspections per 1,000 population for environ-

mental sanitation work. Our services are giving over 30 inspections per 1,000 population (based on United States Census for 1940). Actually this is not a safe enough margin because the population of Brookline in 1942-43 is probably nearer 53,000 which means only about 28.5 inspections per 1,000 population.

A total of 678 Citizen Service Requests received in the office were responded to in the order of their numerical rating: Unsightliness (126); ragweed (67); odors (66); strewn garbage (55); poison ivy (55); mosquitoes (47); mice and rats (40); pools and stagnant water (35); uncovered garbage pails (27); strewn paper (25); flies (20); grass cuttings (12); the remainder involving: fleas, hornets, bees, dumping, pigeons, dirty garbage receptacles, garbage thrown from windows, dust, ants, feathers, leaves, dead animals, insects, bats, dog manure on side-walks, other manure, and smoke and weeds.

B. MOSQUITO CONTROL

1. <i>Inspection by Hand-Dipping by Sanitary Inspectors</i> for mosquito larvae, in 3,643 receptacles, ornamental pools, ponds, ditches, roofs, garbage containers, street gutters, private catch basins, and others	14,562
Larvae found: in 215 pools and 128 receptacles.	
2. <i>Inspections by Hand-Dipping by Oiling Crew:</i>	
Permanent swamps, ditches and catch basins .	1,760
Ornamental pools (110), swamps, gutters and catch basins	16,710
	<hr/>
	18,470
Total of all Mosquito Inspections	33,032
3. <i>Oilings by Oiling Crew</i> (routinely)	
Catch basins — public private (7,500)	112,000
110 permanent pools, swamps, ditches — (about 16 oilings each during season)	1,760
	<hr/>
Total Oilings	113,760
4. <i>Ditch Maintenance by Field Crew</i> (estimated)	
53,000 feet of ditch kept clear of obstructions	
15,600 feet of ditch excavated	
250 feet of ditch constructed	
1,000 feet of ditch stone wall repaired.	

5. *Mowing (estimated)*

About 82,000 feet of ditches mowed and/or brush cut away from sides and banks and cuttings taken to town dump. About 12 acres of swamp mowed (6 acres twice) and cuttings removed to dump. Eighteen unsightly locations cleaned up and material taken to town dump.

6. *General*

Seventeen loads of water plant and one load of rubbish taken from Hall's Pond to town dump. A survey of mosquito

species in Brookline by Norman A. Stearn, a resident of Brookline, and a Research Assistant of Professor Renn, Harvard School of Sanitary Engineering, showed eight locations where *Anopheles quadrimaculatus* breeds. Some of these locations were found to have contained the same species in 1939. These areas will be specifically worked this summer because men are returning from Guadalcanal and the Solomon Islands with malaria.

Ragweed

Inspections (Locations card indexed)	3,007
Abatements (99%)	3,005
(1941 — 1928 Locations — 81% Abatement)	

A house-to-house inspection was made. Each Inspector carried a grass whip and cut down the ragweed plant wherever it was found. Citizens were shown what the weed looked like and were told how and when to cut or pull it.

Scythe mowers cleared the more extensive stands on empty lots, tree lawns, golf courses, and freshly excavated soil.

Educational material was published in local newspapers; and a special booklet was published in collaboration with The Massachusetts Horticultural Society.

Poison Ivy

Inspections (Locations card indexed)	215
Abatements (59%)	127
(1941 — 318 Locations — 31% Abatements)	

More complete abatements were secured in 1942 than in 1941 because a translocated spray (ammonium sulfamate) was used.

Rodent Control

Poison Bait Deliveries (To householders, storekeepers, apartment house operators)	8,339
---	-------

Forty Citizen Service requests specifically were responded to; to advise and instruct in rat-mouse control. We prepare and deliver the bait Friday of each week.

Civilian Defense Activities of Department

Mr. Tapley is (1) Health Chairman of the Division of Health and Social Service Division, B.C.P.S., Dr. F. P. Denny, Director. Also, (2) he is Chief Gas Officer of the Chemical Warfare Division, Protection Division, B.C.P.S; (3) a member of the Executive Committee, B.C.P.S; (4) an instructor of the Protection Division, M.C.P.S.; (5) a graduate of Edgewood (Md.) Arsenal 12th Civilian Defense School, and Events Chairman, Brookline Blood Donor Center, American Red Cross.

All men of this Division are on volunteer duty, B.C.P.S. Up to date they have been on duty over 1,100 hours since the first opening of the Report Center.

With two exceptions all men have taken and passed the prescribed Chemical Warfare Course and 20-hour American Red Cross First Aid Course, and have been sworn in as members of the United States Civilian Defense Corps.

All men in this Division volunteered their services during the fuel emergency of the past winter conducted by the B.C.P. S., Evacuation Division, under George V. Brown, Jr., Chief. They manned our equipment week-ends and many nights up to 3 A.M.

These men are: Joseph J. Sullivan, Edward P. Maloney, John P. Kelly, James Douglas Watt, William David Hedge, John J. Cannon, John J. McCarthy and George B. McCaffery.

The following men are in the armed forces: Robert W. Ryan, Wiley Vaughan, Edward M. Nixon, Jr., and Joseph Grady.

Miss Margaret M. McCarthy, Secretary, is a graduate of the Standard American Red Cross First Aid Course.

Respectfully submitted,

GEORGE O. TAPLEY,
Division of Fly and Mosquito Control.

REPORT OF THE PARK COMMISSIONERS

The Board of Park Commissioners respectfully submits the following report of its operations during 1942 with the estimate of expenditures for 1943.

The various projects for additional playgrounds that were prepared upon the urgent appeal of many citizens were rejected at the Annual Town Meeting, thereby eliminating the proposed capital expenditures for such purposes by the Department.

During the year all activities centered around the War demands. It was impossible to replace some of the men taken by the Services and the peak mid-summer work was done, and excellently, by the skeleton force remaining. Superintendent Sheehan is entitled to much credit for meeting the situations as they arose and for planning so as to avoid neglect and consequent deterioration of the Department areas and structures.

The skating areas were well patronized and called for constant care by the Department. Through the kindness of the Rivers School in offering to the Town the facilities of the skating area on their old grounds many children in that area were given a place to skate.

During the nation-wide drive for scrap metal the Department collected 14 tons which was disposed of for \$147.34.

The Town is indebted to the Arnold Arboretum for the gift of over 200 flowering crabs and other trees. These have been planted at various places where they will be most effective.

Municipal Golf Course

The course was open from April 15 to Dec. 3 and functioned smoothly throughout the season. The fees were unchanged. The operation and upkeep of the Course cost the Town \$147.53 for the year. There was a substantial decrease in play by residents due to the absence in the Services of so many of the men players. This was partly offset by the increased use of the Course by non-residents who found it comparatively easy to reach by public conveyance.

Players

Residents	11,973
Non-residents	7,576
Season permits — residents	155
Season permits — non-residents	50

Receipts

From residents	\$9,384 25
From non-residents	7,686 50
Tournament	2 53
From season lockers	396 00
From daily lockers	345 55
From concessions	352 09
From season permits — residents	3,320 00
From season permits — non-residents ...	1,250 00
Club House rentals	10 00
Telephone reimbursements	23 47
	<hr/> \$22,770 39

The gross and net cost of the operation of the Course for the past five years is as follows:

Year	Gross	Net	Profit
1938	\$24,781 74	\$2,305 32	
1939	23,804 89	2,737 46	
1940	23,541 26	2,885 80	
1941	23,530 12	\$12 06
1942	22,917 92	147 53

Tennis Court receipts were \$1,324.75

Brookline Field rentals were \$150.00

Marcien Jenckes was elected a member of the Board in March.

The following summary shows the amounts expended for 1941, 1942 and recommended for 1943.

BUDGET SUMMARY

	Actual Expenditures		Requested for 1943	Recommended for 1943

REPORT OF THE WATER BOARD

The Water Board herewith submits its sixty-seventh annual report for the calendar year ending December 31, 1942.

At the annual election held on March 10, 1942, Timothy J. Burke, Esq., was re-elected a member of the Board for three years, until 1945. The Board organized on March 13, 1942, electing Timothy J. Burke, Esq., Chairman, (this being his eighteenth year in that post and his forty-third as a Board member,) and appointing Lawrence E. Hanson, Register and Clerk of the Board and Walter B. Bushway, Superintendent of Works for the ensuing year.

Much of the time and effort of the Board has this year been devoted to the war effort, both in adaptation of the facilities of the Department to the exigencies of war preparations and in the substitution of materials and supplies wherever necessary or advisable in the administration of its functions, as a protection to health or safety. It has made recommendations to the local Defense Committee looking toward the prevention of undue, sudden demands for water in emergency conditions, for other than protective purposes. One of the significant steps taken was the inclusion in water bills of a notice to all property owners of the things recommended to be thought of before air raids should occur, as well as what should be done during and after any such air raid. Owners in many cases co-operated by requesting hundreds of copies of this notice, which they, in their good turn, forwarded to tenants and to janitors for their guidance.

Early during the year the Board felt it wise to look into the possibility of procuring a quantity of coal, for storage against future need, in face of anticipated increasing difficulties of transportation and of higher cost. By special arrangement sufficient funds were made available for the purchase and storage of more than a year's supply of bituminous coal, at both pumping stations, on contract awarded to the lowest bidder. It was fortunate that so large a storage of coal could be provided, as subsequent events more than bore out the feelings of the Board and the judgment of the Superintendent, for there followed numerous demands upon all oil-burning installations capable of conversion to coal-burning to immediately convert and that entailed, or would have entailed, delays in deliveries for storage.

During the month of May there came a suggestion that the old water storage tank on Single Tree Hill might be dismantled and moved to some point nearer railhead for the storage of oil for public buildings. It was found, however, upon sound study, that this project was not feasible, due to

the cost of moving, re-assembling, servicing, etc., contrasted with the foreseeable benefits of a general conversion of heating units to coal-burning instead.

The old materials that normally tend to accumulate about a pipe yard or a shop were salvaged and turned into the scrap drive, in line with the demands of the war effort.

It has been the Board's privilege to vote its approval and adoption of the recommendations of the committee on Salaries and Classifications, both with regard to the amended policies concerning vacations and sick leaves, and to salaries and Civil Service classifications, as embodied in the reports of the Special Committee.

The Board has gladly co-operated with the new arrangements perfected by the Board of Selectmen for the centralization of purchasing of office materials and supplies, through the Town Accountant.

In line with the policies established for the Commonwealth as a whole, in the matter of procuring for emergency use the services of Auxiliary Water Works personnel, the Superintendent has devoted much time and thought to the creation of a workable organization of independently functioning groups of volunteers under the foremanship of regular water works personnel, each such unit so co-ordinated as to bear a relationship to the whole problem dependent upon the district served and to the resulting responsibilities which such unit must face.

A different type of hydrant was authorized for replacement of a type which is more difficult to service.

It has been the Board's pleasure to supply, on loan basis, quantities of water pipes and fittings needed by the War Department for installation at near-by cantonments. All materials so loaned have been replaced.

War Damage Insurance has been recommended to the Board of Selectmen, as to real and tangible property of the Department, in harmony with the Executive Order of the Governor of the Commonwealth that such policies are "Necessary and expedient for meeting the supreme emergency of the existing state of war." The Board has added to the protection under its boiler insurance policies, clauses against strike, riot, civil commotion and malicious acts.

Late in October, the Board, with the Superintendent of Works, visited the Quabbin Reservoir area of the Metropolitan District Water Supply Commission, to see at first hand the developments since its last visit and to familiarize itself with the entire project.

The Department maintains a running inventory of all materials and supplies, as is required by the Federal Govern-

ment. The inventory records show that it is becoming more and more difficult to replace items, as so many are critical materials needed in the War Production Program. There results an inability to purchase materials and supplies. The outlay during the year has been somewhat smaller than would have been the case under the plans of the Board when the 1942 budget was prepared. Therefore, the unexpended balances at the year's ending are a reflection of the procurement difficulties, wholly abnormal, and do not afford an adequate basis upon which to judge what the Department's future requirements are to be.

It was the Board's policy in the larger view, during the year, not to insist that orders given for materials and supplies be filled regardless of consequences, even to the substitution of alternative materials, but rather that only such things as might be easily had should be purchased. Thus the orders for materials were held to the minimum. In that sense and in that spirit the budget requests for the ensuing year have been prepared and submitted, as representing the nearest possible approximation that can be made now, not of probable outer limits of expenditure, but rather of minimum essentials for continuous, satisfactory operation.

During the year warrants for commitment of water rates, extension and maintenance charges were filed with Albert P. Briggs, Collector for the Town of Brookline, as follows:

For Water Rates	\$368,741 24
For Extension & Maintenance	2,105 48

In addition thereto, the Department supplied water to various Town Departments during the year, as follows:

Highway Department, for dump fire ...	\$2,700 00
All other Depts, including fire use	41,000 00

TOTAL VALUE OF WATER DISTRIBUTED \$412,441 24

TIMOTHY J. BURKE, *Chairman*,
FRANCIS W. HAMILTON,
WILLIAM D. PAINE,

Brookline Water Board.

ATTEST:

December 31, 1942. LAWRENCE E. HANSON,
Clerk.

SUPERINTENDENT'S REPORT

Brookline, Massachusetts,
December 31, 1942.

To the Brookline Water Board:

Gentlemen: — I have the pleasure to submit the sixty-seventh annual report of the Superintendent for the year ending December 31, 1942.

During the year the activities of the Department were considerably restricted because of war conditions and difficulty purchasing certain maintenance materials. We were fortunate, however, in having on hand a substantial inventory of cast iron materials, service pipe with fittings, gate valves, lubricating oils, and coal for the pumping stations. From time to time the Board recommended the release of cast iron materials to the Army upon receipt of proper credentials. Late in the fall these materials were replaced by the Government.

Our personnel has been reduced approximately 10% by enlistments, leave of absence, and resignation. It was considered advisable not to make replacements until such action becomes imperative.

In the absence of extension work, which was prohibited by the Federal Government, the year afforded an excellent opportunity for working on long deferred underground work, such as cut-off, relays, and replacements. At the close of the year about 50% of this work had been completed.

Supply

All driven tubular wells and gravel packed wells were thoroughly serviced and wells which had failed or collapsed were re-driven or cut off.

Because of the continued low height of the river, we were able to scour and widen the canals and ditches. The rainfall deficiency over a 4-year spread, at the end of the year, totalled 29 inches. During the year, it was necessary to follow the practice adopted last year by flooding sections of the well field with large gasoline driven pumping units. By so doing, we were able to replenish the receding ground-water table.

Early in the year one of the concrete gate dams was constructed by W. P. A. labor. The usual attention was given to clearing the area of undergrowths and weeds.

Filters

The filter plant has received the customary care and attention and continues to deliver the same quality of untreated

water. This operation of the filters is under constant control with daily analysis at our laboratory, weekly analyses by the Town Bacteriologist and monthly investigations by the State Department of Public Health. No changes were made in the method of operating the plant. During the year none of the filter units was re-sanded. The new filter pump was proved to be a sound investment by the saving of labor and filtered water when washing sand.

Late in the fall we washed the coke in the aeration tank and cleaned the sedimentation chamber. An additional shed for the storage of construction and filter maintenance materials was constructed by our personnel, using left-over lumber stock. At the same time the pipe yard was enlarged and all heavy materials re-arranged for rapid handling.

Pumping Stations

By referring to the reports of the Chief Engineers of the Low Service and High Service Pumping Stations, it will be noted that the condition of the equipment and buildings is satisfactory and that the usual maintenance work has been carried out.

We were unable to use our appropriation for an additional electric pumping unit at the Auxiliary Station on Reservoir Road because this equipment would involve the use of critical materials. A special priority rating was requested and refused by the War Production Board. Fortunately, during the year, we were not confronted with a sustained heavy consumption. However, the installation of this additional stand-by unit is of prime importance. The enlargement of the High Service Pumping Station together with the installation of a larger steam pumping unit must be considered within the next five years.

Anticipating serious situations with respect to steaming coal, a year's supply has been stored at the pumping stations and it is proposed to keep this supply in reserve until after the war. This coal is checked regularly for temperature rises in order to anticipate the possibility of spontaneous combustion.

Buildings and Grounds

The grounds at the Fisher Hill Reservoir, the Single Tree Hill Reservoir, the Pumping Stations and service shop have been carefully maintained and present pleasing appearances.

Sprinkler systems were installed at the storage sheds at both pumping stations and in the second floor of the service shop.

At the close of the year, the three shops and the sub-station on Reservoir Road were being converted to coal burning.

Distribution

As reported earlier, this year has offered a fine opportunity to correct many conditions underground. Abandoned lines were cut off, unsafe and leaking services were relaid, faulty valves replaced, gate boxes and wrench tubes brought to grade, and additional gate valves installed in order that smaller areas would be affected by closing street mains.

All gate valves from West Roxbury to the Reservoir on Fisher Hill and throughout the entire system were operated. The same was true with reference to service valves and stop cocks.

The work on our force mains and high service mains in Grove Street near Bellingham Road, where the concrete highway bridge was erected, was completed during the spring and a serious situation which continuously threatened our pipes has been eliminated.

Periodic leak inspection surveys have been made as usual and many incipient breaks were detected and repaired.

Because of prohibition by the Federal Government, no new extension work was started on street mains and no new service lines were laid after July 1, 1942.

During the year 7 fountains and 3 hydrants were broken.

Settlement of sewer structures and consolidation of fill caused breaks in 2 street mains, and 35 leaks in services were repaired.

The consumption record for 1942 was 1,763 million gallons or 73.5 million gallons less than the consumption for 1941. Of this latter amount 17.8 million gallons is apportioned to Low Service and 35.7 million gallons to High Service. During the year 118 million gallons were furnished by the M. D. C., a decrease of 52 million gallons over 1941.

The Department supplied the Town with about 94% of its water, from its own sources, at a cost (delivered to the reservoirs), of about 40% of what the cost would have been if supplied by the Metropolitan District Commission.

Shops and Garages

All general repairs such as welding, automobiles, meters, and equipment were made at the shops with the exception of occasional heavy work for which we were not equipped.

The carpenter shop, and stock room in the service building have been completed. At this shop, where tools and construction equipment are stored, are located our screw cutting machines.

Early in the year the new meter shop was put into commission with modern and efficient methods and equipment for testing and repairing meters.

Defense Activities

The Brookline Water Department comprises a unit of the Mutual Aid Water Works organization for Metropolitan Boston. Through this arrangement we are in a position, during the emergency, to give or receive aid of water, men or materials.

We are directly responsible to the Boston Center and co-operate at the same time with the local Civilian Defense Committee. In co-operation with other departments in the Town we assume at regular intervals, Civilian Defense responsibilities at the report center.

From time to time during the year simulated air raid tests were given at the Report Center where our Department is represented by Mr. Robie, Assistant Superintendent, and certain selected men of the Department who are qualified by experience to determine the range and scope of emergency shut-downs and the placement of emergency men and equipment. The Department has a private line at the Defense Headquarters which is immediately taken over by our operators during these so called C P X simulations and "Alert" calls.

All reservoirs, pumping stations and the filter plant are now protected by chain link fences, 11 feet in height. The stations and filter plant are further protected by flood lights and departmental guards.

W. P. A. Projects

Under the direction of Mr. Robie, a concrete dam was constructed at one of the main canals in the fields in Dedham.

Fence materials for high chain link fences were purchased and erected around Single Tree Hill Reservoir, the High Service and Low Service Pumping Stations, and the Filter Plant. These fences with gates are eleven feet in height and are surmounted by a 3-strand section of barbed wire 12 inches in height.

A project to re-classify all of the meters owned by the Department was completed during the year. During this work all premises were identified with the meter or meters serving them.

In closing I wish to express appreciation to the Water Board for its advice and co-operation and to the loyal personnel who have remained in our service under trying conditions.

Attached hereto may be found the statistical records of the Department and the reports of the Chief Engineers of the Pumping Stations.

Respectfully submitted,

W. B. BUSHWAY,
Superintendent.

LOW SERVICE ENGINEER'S REPORT

Low Service Station,
West Roxbury, Mass.,
December 31, 1942.

To the Brookline Water Board:

Gentlemen: — I hereby submit the annual report of the Chief Engineer for the year ending December 31, 1942.

The amount of water pumped during the year was 1,645,046,879 gallons.

Rainfall

The rainfall recorded has been 40.64 inches — about 3 inches below normal. Only 38% of this year's rain fell during the months when it was most needed, that is, the period from April thru September. During the past four years the fall of rain has been 29 inches below normal.

Engines

Nos. 3 and 4 Allis engines and Skinner engines, are doing good work and have required only the usual amount of upkeep and care.

Boilers

The boilers have been regularly inspected by the Insurance Company and they have always rendered a good report of their condition. A new boiler feed pump has been installed.

Filters

The filters and tricklers have received the usual care and cleaning necessary for their proper functioning.

Buildings

A new tool shed has been built at the filter plant. The other buildings and grounds have been kept in good condition by men of the department.

War Emergency Work

During the year we have followed the blackout and other wartime regulations with apparent success. We still have two guardsmen patrolling the grounds at night and taking due precaution against sabotage, etc.

Included with this report are the tables showing the pumping records, all of which are respectfully submitted.

FRANK HENDERSON,
Chief Engineer.

Low Service Pumping Station, West Roxbury, Mass.

370 Gallons of Water Pumped per Lb. of Coal

HIGH SERVICE ENGINEER'S REPORT

*To the Brookline Water Board,
Brookline, Massachusetts.*

Gentlemen: — I have the honor to present herewith the report of the Chief Engineer of the High Service Pumping Station for the year ending December 31, 1942.

The amount of water pumped this year, including 5,493,000 gallons pumped by the Sub-Station on Reservoir Road, is 431,656,690 gallons.

Boilers

Boilers are in good condition. Some minor repairs have been made during the year to furnace and piping.

Engines

No. 2 Engine has done nearly all the work. Both engines are in good running order.

Respectfully submitted,

LEWIS A. GOLDSMITH,
Chief Engineer.

MRS. EDITH CLARK BAKER

REPORT OF THE SCHOOL COMMITTEE

The year 1942 was one of continuous uncertainty. It was a year of anticipating the unanticipatable. It was a year of irreparable losses.

Deaths

Percy C. Idell, a member of the School Committee since 1937, was elected chairman on March 16, 1942, and died suddenly on April 13. His backlog of engineering knowledge and business experience, his calm, judicial temperament, and his friendly manner made him an exceptionally able member of the Committee and one who had the confidence of the Town Meeting to an unusual degree.

Our other loss was in the retirement and death of Mrs. Edith C. Baker, a member from 1900 to 1942, at which time she was not a candidate for reelection. Mrs. Baker died on October 3, greatly beloved by the teachers — most of whom she had had large responsibility in selecting — revered by her colleagues on the School Committee, and ardently admired and trusted by the Town's citizens.

“A spirit quick of understanding
Clear in utterance
Loving what is good
Beneficent, steadfast, sure.”

Military Service

Edward H. McGrath, Jr., a member of the Committee since 1939, is now absent on military service.

New Members

At the annual election in March, Dr. James A. Hennessey and Miss Edith E. Wright were elected to membership on the Committee; and on May 11, Charles H. Moore was appointed by joint convention of the School Committee and the Board of Selectmen to succeed Percy C. Idell.

Assistance to Selective Service and Rationing Boards

Our teachers and other members of the school staffs assist the Selective Service Boards in registering men on February 15 and 16, April 26 and 27, and again on June 30. They assisted the Rationing Board in connection with the rationing of sugar on April 28 and 29, and on May 4, 5, 6 and 7. They helped with the rationing of gasoline on May 12, 13 and 14, and on July 9, 10 and 11, and of fuel oil on October 27, 28, 29 and 30.

All the activities were carried on without compensation, of course, and with the closing of the elementary schools on only one day, February 16, and with no closing at all of the High School. In a few instances, there was an early closing of the school session; but whenever there has been wartime work to be done, it has been the aim of all to do it in addition to and not in place of the regular school work. Schools have been in session more than the number of days required by law, and there has never been the slightest thought of asking the State Department of Education for an exemption from any requirement because there has been extra work for the members of the Department in connection with emergency activities.

Our Responsibility for Today's Children

While the war must be fought on the home front as well as abroad, those who are of school age now must be educated now to prepare them for the responsibilities which will soon be theirs. Our point of view is well expressed in the following excerpt from the December first issue of *EDUCATIONAL BULLETIN* published by the Department of Public Instruction of the State of Iowa.

"There are some things which the American people must give up to make our war effort more effective. There are other things which we must retain and strengthen if our war sacrifices are to be justified. We must retain and strengthen our public-school program. To fail here will cost us bitterly in terms of juvenile delinquency now and in the defeat of our high hopes for tomorrow.

"Twenty-seven million world citizens of the decade beginning in 1950 are being prepared in our public schools now for the world that is being shaped with so much 'toil and blood and tears.' How futile our every war effort if these citizens of tomorrow are not fitted for their places!"

The object of the Committee during this year of war has been to maintain the amount and quality of education at its previous high level, and at the same time to meet every demand which the unusual conditions have thrust upon us. Conscious of the steady increases in federal taxes, we have tried by very legitimate means to reduce local taxes so far as they are affected by school costs.

Wartime Economies

At the annual Town Meeting an appropriation of \$960,463 was made for the support of the public schools. This included \$10,900 not recommended by the Advisory Committee, a sum which at that time was believed by the School Committee

essential to carrying on its work. At the same time the School Committee applied itself diligently to the task of finding ways and means of reducing expense without seriously interfering with the quality of our educational program.

It reexamined the expense of maintaining kindergartens, which are not required by statute, but which in the opinion of your Committee are an integral part of an elementary school education. It realized that half the \$34,000 which annually has been spent for kindergartens could be saved by having each kindergarten teacher take charge of two classes, one in the morning and one in the afternoon; and while it felt that the long-established three-hour morning session was preferable to the two-session arrangement, it also felt that in the present circumstances the less expensive plan should be followed as a temporary expedient. There was some opposition to this in the community, particularly on the part of the parents immediately concerned, and also within the Committee itself; but it appears to the majority of the Committee that the less expensive two-session plan is the wiser one to follow at this time.

Then the Committee considered the matter of evening schools or adult education. It appeared that because opportunities for employment and civilian defense activities had greatly increased, not to speak of the large numbers who were entering military service, evening schools could safely be curtailed with consequent savings of at least \$9,100.00. The Committee stands ready to provide evening instruction necessary to the war effort, but very little such demand has arisen.

By combining positions in some instances and by refraining from filling certain vacancies, other economies, which should be regarded as of a temporary nature, have been effected. In addition, the number of retirements and resignations was larger than usual because the retiring allowances for teachers were reduced after July 1 through the adoption by the Massachusetts Teachers' Retirement Board of new life expectancy tables; and of circumstances due to the war. Savings in these ways amount to approximately \$30,000.

The Committee is making a study of the sums required for interscholastic athletics and the supervision of afternoon play, but is reluctant to reduce these because it believes there is a fairly close relationship between such activities on the one hand, and the morale of young people and our comparative freedom from juvenile delinquency on the other.

Transportation

In January, the Committee gave notice of its intention to discontinue at the end of the school year all private bus transportation. It now provides transportation by the buses of the Boston Elevated Railway to the Baker and Heath Schools in

cases where the distance and safety make it desirable. The estimated yearly cost of this plan of transportation is \$2,600, as compared with \$8,079 in 1936.

Salaries

The Committee is greatly interested in the report of the Town's Committee on Salaries and Classifications. The sections of this report affecting the School Department have been received from the Board of Selectmen and are under careful consideration. The School Committee believes there are inequities in the salaries and wages of many non-teaching employees of the Town, and that these should be corrected on a town-wide basis by a proper use of such a report as that of the Committee on Salaries and Classifications. The School Committee will not agree with this report in its entirety—the recommendations regarding vacations, for example, cannot be satisfactorily applied to conditions in the School Department—but, in general, the School Committee feels that the report contains much that should be adopted. The absence of a salary or wage schedule by which faithful and efficient employees could receive merited increments in their remuneration without recourse to personal solicitation by or on their behalf has been one of the greatest weaknesses in the Town's relationship with its civil service employees.

The School Committee is aware of the fact that economic conditions are changing rapidly and may change even more rapidly in the next few years. It sees clearly that there may soon be a need for revising the salary schedule of the teachers and has asked the Teachers Club to make a preliminary study of what a modern salary schedule should include and should accomplish. New schedules have been adopted recently in Newton and Springfield, to mention only two leading school systems, and the time cannot be far distant when our salary schedule of 1927 must be brought up to date.

Maintenance of Buildings

Adequate maintenance of our \$4,400,000 worth of school buildings has been carried on during 1942, subject to the limitations imposed by the scarcity of certain materials needed for war purposes. Ordinary repair work and painting will be done in 1943, but probably little more. Obviously no new construction can be undertaken at present, and any expenses for capital outlay will be small indeed.

The School Year

It became evident last summer that serious shortages of oil were impending, and it was thought at that time that shortages of coal and transportation for fuel might also develop.

Consequently, the Committee decided to begin the fall term on September 1 instead of September 14, and to increase somewhat the length of the Christmas recess. The need for young people to work in the stores and post offices before Christmas influenced the Committee to begin the recess period on December 11, and as a result large numbers of High School boys and girls were enabled to render much-needed services and to earn considerable money.

Conservation of Fuel

At about the same time it became imperative to convert the heating plants at the High School and at the Baker School for the use of coal instead of oil. This has been done, and all buildings were ready for use at the end of the winter recess on January 11.

In its studies relating to fuel conservation the Committee has been greatly helped by the Town's Committees on Fuel Conversion and Fuel Situation, appointed by the Board of Selectmen.

To conserve fuel, school buildings other than the Manual Training Building have not been heated in the evenings since September for any school use (with three exceptions) or for use by outside organizations. Even the classes of the civilian defense organizations have been conducted in the Manual Training Building, which is already in use 24 hours a day. The machine shop in that building is now used almost entirely to train women employees of the Watertown Arsenal.

The John C. Packard Fund

The Committee acknowledges with gratitude the gift of \$1,000 by Mrs. Ella Mabel Packard on behalf of her late husband, Dr. John C. Packard, from 1890 to 1937, Head of the Science Department of Brookline High School. This gift will make possible certain awards for excellence in science, as explained in the report of the Superintendent of Schools.

The Budget

The appropriation of \$957,094 requested for 1943 is less by \$22,416 than that of 1942.

The appropriations which the School Committee has voted to request at the Town Meeting in March, 1943, and the corresponding appropriations for 1942 are as follows:

	Appropriated 1942	Recommended 1943
I. General Control	\$18,891	\$19,696
II. Instructional Service	759,894	735,604
III. Operation of School Plant	116,883	125,005
IV. Maintenance of School Plant	45,050	39,766
V. Auxiliary Agencies	20,234	20,102
VI. Pensions	5,702	5,699
VII. Capital Outlay	5,162	8,492
VIII. Vocational Classes	7,694	2,730
Total	\$979,510	\$957,094

The condition of the several appropriations at the end of the fiscal year, December 31, 1942, is shown by the following table:

	Appropriated 1942	Expended 1942	Balance
I. General Control	\$18,891	\$18,380 35	\$510 65
II. Instructional Service	759,894	735,776 35	24,117 65
III. Operation of School Plant	116,883	116,859 70	23 30
IV. Maintenance of School Plant	45,050	42,711 69	2,338 31
V. Auxiliary Agencies	20,234	19,377 10	856 90
VI. Pensions	5,702	5,200 82	501 18
VII. Capital Outlay	5,162	5,134 78	27 22
VIII. Vocational Classes	7,694	3,918 78	3,775 22
Total	\$979,510	\$947,359 57	\$32,150 43

In addition to \$32,150.43 which the Committee returned to the Town at the end of the fiscal year in unexpended balances in regular appropriations, \$1,199.50 was returned in unexpended balances in special appropriations, making a total returned to the Town of \$33,349.93.

Attention is called to the fact that in making the annual appropriation vote "for maintaining the public schools," the following clause is always added: "All money received for tuition fees or otherwise shall be paid into the Treasury and is not appropriated for school purposes." Under that clause the following amounts have been paid into the Treasury during the past five years.

Fiscal year ending December 31, 1938	\$69,338 62
Fiscal year ending December 31, 1939	68,478 80
Fiscal year ending December 31, 1940	69,196 55
Fiscal year ending December 31, 1941	71,879 32
Fiscal year ending December 31, 1942	69,183 06

**MEMORANDUM CONCERNING AMOUNTS RECEIVED
BY THE TOWN TREASURER
DURING 1942 ON ACCOUNT OF SCHOOLS**

I. From the State of Massachusetts:		
1. General Fund (Reimbursement from Income Tax for salaries of teachers, G. L., Chapter 70).....	\$59,280 25	
2. State-aided Vocational Classes:		
a. Tuition of Brookline pupils at trade schools in other municipi- palities—reimbursed at one-half total cost	624 83	
b. One-half the maintenance cost of Women's Evening Practical Art Classes	2,043 67	
3. Pensions on account of teachers	1,885 41	
4. State Wards:		
Elementary	\$96 94	
Secondary	35 20	
	132 14	
5. Reimbursement for Americanization Class—one-half the cost of instruc- tion.....	155 00	
Total from the State		\$64,121 30

REPORT OF THE SUPERINTENDENT OF SCHOOLS

"Without popular education no government which rests on popular action can long endure; the people must be schooled in the knowledge and if possible in the virtues upon which the maintenance and success of free institutions depend."

—Woodrow Wilson.

Education in Peace or War

In peace or war a superior quality of public education is essential to the preservation and improvement of what we are pleased to call "our American way of life." While the world is at war and billions upon billions of dollars are being poured out to keep democratic nations from enslavement by the ruthless might of those to whom human life means nothing, there is serious danger that education, from which rises an understanding of democracy and a desire for its continuance, may be neglected.

Rigorous self-denial in non-war activities is generally endorsed as desirable public policy, and no reasonable person will question the discontinuance of most of our peace-time luxuries and the curtailment of many necessities so that the time and money of all the people may be devoted to establishing the world in peace with freedom from bondage, any kind of bondage, its chief characteristic. It is unlikely that any one who believes in a government of the people would deliberately break down the education of those youth on whose integrity, intelligence and devotion that government of the people soon must rely. Their education is being threatened in the country as a whole by shortages of teachers, reductions in appropriations, and skimping of services; and, because of the mobility of our population, what threatens the country as a whole threatens every part of it, our own included.

Maintaining Quality in the Teaching Staff

We continue to have many applications from those who would like to teach in Brookline, but those who can meet our requirements of personality, general education, professional training, and more-than-ordinarily-successful experience are few indeed, and apparently becoming fewer. The schools from which our new teachers come are finding it difficult to replace those they lose, and training schools are seriously lacking in new students. We can go on for a time maintaining the highest standards for additions to our teaching staff, but, if the sources of superior teachers are drying up, we shall be unable to find what does not exist.

Our policy of requiring at least three years of teaching experience before appointment here has been adhered to with

scarcely an exception, and in normal times this amount of "seasoning" has been a good requirement when consideration is given to the complex and exacting demands made upon our teachers. It might be well, and it may become necessary, to consider teachers with only two years, or even one year, of experience provided they possess all the other qualities upon which we have been accustomed to insist. It is always better to have an exceptionally good teacher with little experience than to have an ordinary teacher with a record of many years of teaching. If the war continues more than another year, it is doubtful whether enough superior teachers can be found to meet all our needs; and in that case we shall be forced to sacrifice something either of quality or quantity in our work. When that time comes, the choice will not be difficult to make.

In fact, we have begun to make it already. The dominant motive for reducing the number of kindergarten teachers from 18 to 9 may, perhaps, have been economic; but the result is that we have 9 superior teachers in our kindergartens, whereas we should soon be finding it very difficult to fill as many additional places with teachers of comparable quality. Certain other positions on the staff may have to remain unfilled temporarily because of an inadequate supply of outstanding candidates, but temporary makeshifts are better than permanent disappointments.

At the end of the calendar year we had 282 teaching positions as compared with 296 one year ago, whereas our pupil population numbered 4,387 in the elementary schools, 12 more than last year, and 2,037 in the High School, 85 less than last year. The decrease in the number of teaching positions is accounted for by discontinuing 9 kindergarten positions, allowing 2 supervisory positions to remain unfilled temporarily, and by not filling 3 other vacancies.

The Remuneration of Teachers

Many of the teachers, in common with other employees of the Town, have received since April a temporary addition to their salaries of 10 per cent, but not in excess of \$250, and nothing which would raise any salary above \$3,000 a year. There is no doubt that this additional amount has been helpful and altogether necessary as a partial offset to the rapidly rising cost of the essentials of living. Twenty-five per cent of the teachers, however, many of whom are men with wives and children dependent upon them for support, received no living cost adjustment of their salaries and as a result they are now forced to make difficult downward adjustments in their standard of living. Neither teachers, nor any other civilians, can expect to escape entirely from the inconveniences and sacrifices of war, and I am sure that those who are receiving the full

10 per cent adjustment are, nevertheless, obliged to curtail their wants. Teachers receiving \$3,000 or more, especially those with dependents, should not, however, be without some relief in the present circumstances, and I hope that the next Town Meeting will find it just and feasible to include all employees of the Town in any plan for offsetting to a slight degree the economic severity which descends at such a time as the present on every employee with a fixed income.

Registering and Rationing

The public has been generous in its praise of teachers, in Brookline and elsewhere, because of their efficient voluntary service in registering men for the Selective Service Boards and in relieving Rationing Boards of extensive responsibilities of interviewing, calculating, and recording which, it is probably literally true, could not have been accomplished in any other way. Our teachers, assisted in some instances by other volunteers, chiefly parents, have gladly given of themselves, and are prepared to do more, when occasion requires, to carry on the many intricate tasks necessary to the war effort. Not only have teachers performed these wartime duties without thought of remuneration, but they have done so, for the most part, without depriving the children of their full time for instruction. The closing of schools, which apparently has been found necessary in some places, has not been the practice of this Department.

Problems After Pearl Harbor

Immediately after Pearl Harbor there arose a multitude of wartime emergency problems, some pertaining to the schools in their relation to their pupils and others concerning the use of school buildings as shelters and temporary hospitals and feeding stations in cases of air raids. More recently there has arisen the possibility that some of our buildings might be required as temporary housing for those whose fuel supplies have become exhausted. I am glad to say that there has been no need yet for any such uses of the buildings and I earnestly hope there never will be. But we are ready.

Never have we had more occasions than during the past year to co-operate with other departments of the Town, with local, state and national committees, and with such semi-official agencies as the Red Cross, for which since the first of September quarters have been provided in the Pierce Primary School. Tied together in a spirit of common danger, we have found great satisfaction in our uniformly gratifying relations with all these groups.

Air raid drills in the schools were organized in December, 1941, and have since been held at frequent intervals. Courses for air raid wardens and school wardens, sponsored by the

local Committee on Public Safety, were pursued by most of the teachers and many others. Evening musters of men teachers and janitors have been held to determine the readiness of the school buildings as first-aid stations and feeding depots.

Four hundred or more High School boys have been constantly in readiness as junior young men's police, and have rendered dependable assistance whenever there has been a general air raid drill. Numerous other groups of boys and girls have been organized at the High School to serve as stretcher bearers, messengers, and first-aid helpers, and to do anything within their power in case of need.

Then, two of our School Committee members, one member of the general administrative staff, three teachers, two janitors, an uncounted number of our graduates, and some undergraduates have entered the military service. Many High School upperclassmen would have gone had they not been urged by the School and in some cases by the military authorities to finish their school course, if possible, or at least not to leave before graduation unless summoned by their Selective Service Boards. By heeding this advice our young men have shown admirable self-restraint and true patriotism.

Serving the 18-Year-Olds

As soon as it was known that boys who had reached their eighteenth birthday would become liable for military service, there was formed a faculty committee known as the "Committee on 18-Year-Old Boys." The work of this Committee has since been broadened to include girls, whose services in the war effort are becoming increasingly significant. This Committee has been meeting constantly, and with great diligence has worked to keep ahead of the problems of the war affecting youth of high school age.

First, the Committee caused a redoubling of effort to be sure that all who are 18 or nearly 18 and can possibly be graduated at the end of this school year will be given unusual opportunities to complete their work. Extra studies and shop work which might not be advisable in ordinary times were arranged, and the opportunities presented individually to the students concerned.

Then an intensive physical fitness program, designed to provide training intermediate between that of a high school physical education course and that of a military camp, was prepared, and established at once so that not a single day of training might be lost to those who will soon enter the army or navy. A part of this program is setting-up drill, marching, and strenuous athletics, and a part is physiology, hygiene, first-aid, and proper care of the body in outdoor life. Since the

class meets daily, diploma credit is possible in some cases. Approximately 50 boys have enrolled for this work, and probably more will enter during the second half-year.

Intensive pre-induction courses are in full operation in the automobile shop, electrical shop, and machine shop, and the instructors are making extraordinary efforts to offer work which can be carried over directly into military life. Much of it will be useful after the war, also, as a pre-vocational program.

In the machine shop the work is carried on without interference with the extensive training given new employees of the Watertown Arsenal (now all women) and provides flexibility of operation designed to permit new students to enter at any time. As an illustration of the enthusiasm with which students are accepting these opportunities, I will mention that the machine shop has only recently been opened to High School girls, yet 9 girls began work there immediately after Christmas, two weeks before the time set for the reopening of school. They entered upon a thirty-hour-a-week training program, and of their own accord worked overtime to gain as much knowledge and skill as possible. And more girls are expected to enter at the beginning of the second half-year or earlier.

Courses in communications and in pre-flight aeronautics began last September, and instruction in blueprint reading, typewriting, and in other fields which may from time to time appear suitable for pre-induction training are ready to be offered.

War Stamps and School Savings

We consider it good education as well as patriotic to promote the sale of war bonds and stamps in addition to the depositing of money in school savings accounts. Pupils have responded with enthusiasm with the result that the purchases of stamps in December was nearly double the purchases in January. During 1942 the aggregate value of stamp purchases was \$55,183.45, and savings bank deposits amounted to \$26,619.02. These are the amounts purchased and deposited through the schools, in co-operation with the Brookline Savings Bank, and undoubtedly are only a part of the total purchases and savings of pupils and teachers. Many teachers, as an example to their pupils, have bought war stamps in their schools, and in addition have bought stamps and bonds elsewhere, either by payroll deductions at the Town Treasurer's office or by independent purchases.

Toward the end of the year it became possible for schools to fly the blue Treasury "Minute Man" flag on the flag poles outside their buildings if at least 90 per cent of the pupils were purchasers of stamps. Eight of our 11 schools gained this privilege almost immediately, and may reasonably be expected

to continue to fly their "Minute Man" flags as long as the war lasts.

Courses of Study

That type of public education which may be a source of pride to Brookline, or any other community, depends first, upon intelligent and interested citizens who want a superior rather than a mediocre quality of education, and are able and willing to pay for it; secondly, an able staff of teachers, whose professional competence increases with the passing of years; and thirdly, work policies and programs, specific in their nature, adequate in their scope, continually revised and improved. These work programs have been constantly undergoing revision by our committees on courses of study, and many useful documents have resulted. Chief among these are the courses in kindergarten and first, second, and third grade social studies; fourth, fifth, and sixth grade social studies; seventh and eighth grade geography; high school community civics, high school modern history, high school United States history (non-college); and high school Problems of Democracy, which are the result of five years of intensive work by our committees on the courses of study in the social studies, and which were formally adopted by the School Committee in October. Other courses of study, nearly ready for adoption, are being carefully tried out in the classrooms before being presented to the School Committee. This course-of-study-making is a part of teaching often not recognized by the community and sometimes not properly evaluated by the teachers themselves. It is, of course, work which is performed when school is not in session—afternoons, evenings, Saturdays, and during vacation periods. It is work which requires a high degree of professional competence and painstaking study. It is work which brings little glory to the individual teacher, but which greatly improves the facilities of all teachers and increases the probabilities that their pupils are being well taught. A course of study is to a teacher what a budget is to one concerned with finance, or a long-range plan is to one concerned with the progress of an institution or a community.

New Textbooks

Every year new textbooks come from the publishers' presses, and many of these are carefully examined by our directors, heads of departments, and committees. Good teachers are entitled to the best textbooks, their implements of instruction, that can be found; and while a book is not necessarily good because it is new, many new books do contribute materially to the effectiveness of the classroom.

Lest any one should think that books in good condition are discarded because new books are adopted, I should say that all

textbooks wear out with use and only when books are in need of replacement are new books considered for purchase. As a good workman should have the privilege of using tools with which he gets the best results, so a good teacher should have the opportunity to use textbooks which are likely to enhance the success of his teaching.

New Subjects of Study

The School Committee has approved several new subjects of study for the High School. *French Language and Life* and *Spanish Language and Life* follow the pattern of a similar course in Latin, which has been successfully taught during the past 5 years. The college preparatory requirements in foreign languages are so extensive and exacting that there is little opportunity in the conventional high school courses to teach some of the most interesting facts about the countries and the philosophy of their peoples. These new courses give considerable attention to the human side of the language, while not neglecting the language itself with its forms and its vocabularies. The courses are primarily for those who do not expect to attend liberal arts colleges, though certain of these colleges have shown a willingness to allow admission credit for them.

Mathematics for Modern Life is an answer to the cry for more mathematics in secondary schools, yet not the conventional algebra and geometry commonly taught to meet college entrance requirements. This is a program in which Ralph D. McLeary, our Director of Mathematics from April, 1937, to September, 1942, and now Superintendent of Schools in Barrington, Rhode Island, was particularly interested and in the preparation of which he had been engaged for a number of years.

Two new courses, one entitled *Operas* (for students of music) and the other *Introduction to Radio* have enriched the High School offerings, in accordance with the practice of recent years of providing instruction in those subjects which are capable of influencing secondary school students to understand and enjoy the significant out-of-school opportunities for broadening their educational experiences. These courses are not primarily college preparatory nor vocational, but, on the other hand, they might well be described as "interpretative" courses. I think I should call them "cultural" had that word not been greatly overworked and so often used to imply "disciplinary" or other vague values; whereas the values of these interpretative courses are to be found in a world in action, rather than in the recesses of a contemplative mind.

The titles of the new courses in *Pre-flight Aeronautics* and in *Communications* show clearly their nature and purpose.

Brought into the High School program to meet a wartime need, they may or may not have permanent significance. At this time they are intensely meaningful for those whose next responsibilities are likely to be military and who want to be prepared.

The curtailment of the evening schools for the present indicates an important change which has come about in the habits of the people. More men and women are at work, and are working longer hours, than in times of peace; and large numbers are engaged in all kinds of civilian defense activities. While the School Department stands ready to provide any afternoon or evening courses which will advance the war effort, almost no need for these has arisen.

The John C. Packard Award in Science

In accordance with the wishes of the late John C. Packard, in which his wife shared, Mrs. Packard has given to the Town \$1,000 to establish a fund from which \$100 shall be awarded annually by the School Committee to that undergraduate member of the Science Department of the High School "who, in the judgment of the Head of the Department or the Headmaster of the High School shall have made the greatest improvement during the school year." I express for the faculty and students of the High School their deep appreciation of the kindness of Dr. and Mrs. Packard, and here note that the purpose of their gift is in keeping with the spirit of that great teacher whose life inspired thousands of Brookline boys and girls from 1890 until his death in 1940.

Deaths

We have lost by death one person on the retired list and two who were in active service. Miss Alice Shaw was a kindergarten teacher from 1890 to 1926, and after her retirement she became Mrs. Alice Shaw Merryman. Her death occurred on January 2.

Miss Frances C. Barnaby, a school nurse since 1930, died on April 24; and Miss Abbie F. Hearn, teacher at the William H. Lincoln School since 1902, died on December 27.

Retirements

Teachers who have retired from active service, with the years in which their service in Brookline began, are:

Grace E. Murray	1906
Ida M. Holden	1908
Lelia Smith Raymond	1910
Annie G. Burnham	1911
Ora D. Hutchinson	1912

Helen L. Soule	1912
M. Alice Connor	1913
Maude Doolittle	1914
Alice M. Wyman	1914
Louise A. Hannon	1919
Florence G. Perkins	1920
Laura G. Willgoose	1922

Catherine Frawley, janitress at the William H. Lincoln School since December, 1923, retired on April 1.

Promotion

Benjamin D. Roman, teacher of Latin since 1928, and from September, 1935, to June, 1939, Master of Lincoln House at the High School, has been appointed Principal of the John D. Runkle School.

Military Leaves of Absence

Leaves of absence for military service have been granted to D. Joseph Hennessy, Supervisor of Maintenance; William H. Logan and James P. McGrath, janitors; and August C. Miller, Jr., Newton Rodeheaver, and Charles E. Weymouth, teachers.

Distinction

Headmaster Wilfred H. Ringer of the High School has been elected President of the New England Association of Colleges and Secondary Schools. He is also a member of the executive committee of the National Association of Secondary School Principals and for 5 years preceding last October was a member of the executive committee of the College Entrance Examination Board.

With continued appreciation of the loyal and effective work of my fellow teachers and of those who have been elected to serve on the School Committee, this report is respectfully submitted.

ERNEST R. CAVERLY,
Superintendent of Schools.

STATISTICAL REPORT

1. CENSUS OF ALL CHILDREN BETWEEN 5 AND 16 YEARS OF AGE, OCTOBER 1, 1942

As required by General Laws, Chapter 72, Section 2, a census was taken of all children between 5 and 7 years of age and 7 and 16 years of age as follows:

Age 5-7		Age 7-16		Total		Total
Boys	Girls	Boys	Girls	Boys	Girls	
542	480	2,972	2,915	3,514	3,395	6,909

On October 1, there were 13 children between 7 and 16 years of age, who on account of mental or physical defects were not enrolled in school. From January 1-December 31, 6 children, physically incapacitated for school instruction, were taught at home for periods varying from 26 hours to 68 hours by teachers assigned by the School Department.

2. SCHOOL YEAR — 1941-1942

Sessions for all schools began on September 8, 1941, and closed on June 24, 1942.

Total	32

The Supervisor of Attendance was present in court at all cases involving juvenile residents of Brookline.

During the year mercantile establishments, theatres, bowling alleys, poolrooms, and work-shops were visited. In only a few instances were violations of the law discovered. All employers of minors have co-operated in complying with the laws relating to the certification of employed minors.

Liaison has been maintained with the Police Department, Probation Officer, and the Board of Public Welfare. These Departments have been most helpful, and have assisted the Supervisor of Attendance greatly in the performance of his duties.

The School Department acknowledges the kindness of the fraternal and church societies in Brookline which throughout the year have given articles of wearing apparel to children of school age.

Percentage of graduates admitted to advanced schools and colleges .		48.7	52.6	50.3	56.2	59.7				

*One boy admitted without graduation.

Note: (Diploma) indicates those admitted upon evidence of graduation from high school, (Certificate) indicates those admitted without examination on the basis of a satisfactory school record.

(Old Plan) indicates those admitted by the Old Plan Examinations which cover the necessary fifteen units, some of which were passed one year before the date of entrance; also part examinations and part certificate.

(New Plan) indicates those admitted by the New Plan Examinations which require four examinations in subjects at the end of the year prior to entrance, plus a school record satisfactory to the college concerned, or, in the case of some girls' colleges, two examinations at the end of the junior year and two at the end of the senior year; or, as in the case of Dartmouth College, the Selective Process.

TOTALS	214	253	467

9. STUDENT-AID PROGRAM AT THE HIGH SCHOOL

Since 1935 the National Youth Administration of the federal government has made available to high school pupils, sixteen years of age or over, a plan whereby those in need of some income to continue their high school course may be employed at tasks within the school and remunerated at not more than \$6.00 a month. Under this program pupils at the High School have participated as follows:

School Year	Number of Pupils Participating	Total Amount Earned
1935-36	9	\$175 68
1936-37	16	745 17
1937-38	19	699 39
1938-39	39	1,429 41
1939-40	55	1,979 40
1940-41	39	1,559 58
1941-42	29	816 34

On account of greatly increased opportunities for employment, no pupil was receiving aid in December.

10. PHYSICAL EXAMINATIONS**September and October, 1942**

TOTALS	334	70

14. INSTRUCTIONAL SERVICES AND INSTRUCTIONAL COSTS

The Survey Committee appointed by the Town Meeting in 1936 recommended that the School Committee endeavor to reduce instructional service salary costs 10% over a five-year period. The following table shows what has been accomplished since 1932-33, the year used as a base at the beginning of the study. (See School Committee Report for the year ending December 31, 1938, pp. 337, 338.)

	SCHOOL YEARS		
	1932-33	1940-41	1941-42
All Day Schools:			
Average membership . . .	5,796	6,478	6,507
Salaries	\$689,979	\$715,224	\$714,479
Per capita cost for salaries	\$119.04	\$110.41	\$109.80
High School:			
Average membership . . .	1,726	2,106	2,110
Salaries	\$251,020	\$279,311	\$289,403.32
Per capita cost for salaries	\$145.43	\$132.63	\$137.18
Elementary Schools (including kindergartens):			
Average membership . . .	4,070	4,372	4,397
Salaries	\$438,959	\$435,913	\$425,075.68
Per capita cost for salaries	\$107.85	\$99.71	\$96.67

During the past nine years the average membership has increased 384, or 22.2%, in the High School, and 327, or 8.0%, in the elementary schools. The aggregate salaries paid to teachers in the High School have increased 15.3%, and decreased .30% in the elementary schools. Furthermore, the per capita cost for salaries for the past nine years has been reduced 5.7% in the High School and 10.4% in the elementary schools.

TEACHERS ENGAGED IN ADMINISTRATIVE OR SUPERVISORY WORK

POSITIONS	JANUARY, 1934						JANUARY, 1943

SALARY COSTS IN THE ELEMENTARY SCHOOLS

The following is a study of the salaries of regularly-appointed and temporary classroom teachers in each elementary school.

SCHOOL	JANUARY, 1934				JANUARY, 1943				
	Number of Persons	Aggregate Salaries	Actual Membership Last Day of January	Average Cost Per Pupil	Number of Persons		Aggregate Salaries	Actual Membership Last Day of January	Average Cost Per Pupil
					Per-ma-nent	Tem-por-ary			
Baker	5	\$10,600	118	\$89.83	15	2	\$32,500	503	\$64.61
Baldwin	4	8,400	71	118.31	3½	7,650	72	106.25
Cabot	31	67,800	941	72.05	21½	3	51,625	879	58.73
Devotion	18	37,750	462	81.71	18	1	37,950	616	61.61
Driscoll	13	27,200	323	84.21	6½	2	19,700	270	72.96
Heath	1½	1,050	21	50.00
High (Kindergarten)	17	36,550	480	76.15
Lawrence	17	35,400	416	85.09	17	36,450	501	72.75
Lincoln	22	48,600	530	91.70	15	3	33,850	409	82.76
Pierce	19	39,350	528	74.53	16	33,700	502	67.13
Runkle	20	43,600	568	76.76	13½	2	7,350	111	66.21
Sewall	6	11,600	145	80.00	3½
Totals	155	\$330,300	4,102	143	\$298,375	4,364
Average Salary	\$2,131	\$2,087
Average Cost per Pupil	\$80.52	\$68.37

This table includes all the regularly-appointed full-time teachers and temporary teachers and their aggregate annual salaries. It does not include teachers of ungraded classes nor of such subjects as physical education, art, etc. For these see p. 38.

Salary Costs of Teaching Various Subjects

The following table shows the salary cost of regularly-appointed and temporary teachers in various subjects in the elementary schools and in the High School. The salaries of directors, heads of departments, and supervisors are included in these figures. The parts of the housemasters' salaries chargeable to administration are not included.

ELEMENTARY SCHOOLS

	JANUARY, 1934		JANUARY, 1943	
	No. of Persons	Teachers' Salaries	No. of Persons	Teachers' Salaries
Art.....	1 $\frac{4}{5}$	\$4,687	1	\$3,550
Domestic Science	6	13,500	4 $\frac{1}{5}$	8,780
French	3	6,600
Health.....	1	2,400

LEON L. ALLEN, TOWN ACCOUNTANT

REPORT OF THE TOWN ACCOUNTANT
FOR THE YEAR ENDING DECEMBER 31, 1942

Brookline, Mass., January 11, 1943.

To the Honorable Board of Selectmen:

Gentlemen: — In compliance with Section 61 of Chapter 41, General Laws, I herewith submit to you the forty-sixth annual report of the Accounting Department.

During the Town's fiscal year, ending December 31, 1942, I have examined the accounts of Albert P. Briggs, the Treasurer, at the close of each month's business, and have verified the cash balance by actual count of the cash and by reconciliation of bank balances. I have examined and checked all notes, bonds, and coupons paid during the year and have found them properly cancelled.

I have also examined his accounts as Collector and have set forth my findings under schedule "C" entitled Summary of Collector's Accounts.

His accounts as Treasurer of the various Trust Funds of the Town have been examined, the securities checked, and all are found to be as reported by him and set forth in Schedules H and I.

I have examined the accounts of the Town Clerk, the Librarian of the Public Library and the Superintendent of the Gymnasium and Baths, and find them to agree with the books of the Treasurer.

I have also examined the books of the Retirement Board in charge of the Town's Pension System which went into effect January 1st, 1934. All accounts were found in order with investments and balances as stated, but the actuary's report was not available.

There is held in escrow at the First National Bank, Boston, \$6,100.00 for over-due coupons and bonds as follows: Coupons — \$100.00; Bonds — \$6,000.00.

The detail of the financial transactions of the Town are set forth in the following schedules:

A—Tax Levies and Tax Collections.

B—Per Capita and Net Bonded Debt.

- C—Summary of Collector's Accounts.
- D—Special Assessment Revenue not yet due.
- E—Balance Sheet.
- F—Statement of Appropriations.
- G—Receipts and Expenditures.
- H—Summary of Trust Funds.
- I—Trust Funds.
- J—Estimated Value of Town Property.
- K—Classified Statement of Funded Debt.

Respectfully submitted,

A handwritten signature in dark ink, reading "Leon L. Allen". The signature is written in a cursive style with a large, stylized initial "L".

Town Accountant.

Respectfully submitted,

Leon L. Allen

Town Accountant.

REPORT OF THE ASSESSORS

The Assessors herewith submit their report for the year 1942.

The Board has consisted of the following members: James H. Henderson, David B. Church and Scott McNeilly. At the last town election, Scott McNeilly was elected for three years. James H. Henderson was chosen Chairman of the Board.

The net amount to be raised by taxation was \$102,741.39 more than in 1941.

The total valuation of the town was decreased by \$4,418,300. The rate was fixed at \$23.90.

The following tables give details of the State, County, and Town taxes; and the Town's valuation; together with comparisons with those of the previous year.

1942 Town Expenses to be raised.....	\$4,366,615	00
